The Dynamics of Wage Relations in the New Europe Linda Clarke, Peter de Gijssel, Jörn Janssen, 2012-12-06 The debate on The Dynamics of Wage Relations in the New Europe is an offspring of a research project on Disparities in Wage Relations and the Reproduction of Skills in Europe At a meeting of the advisory committee for this research held at the University of Westminster in London on 14th November 1994 it was decided by Linda Clarke and Jörn Janssen to set up a larger international committee to develop a programme and seek funding from the European Commission for a symposium of experts on wage relations This committee of ten scientific experts was formed and invited to a number of meetings throughout 1995 and 1996 by DG V of the European Commission in order to develop a programme and proposal for a symposium to take place in 1997 Eventually the proposal formally submitted by University of Westminster London University of Maastricht Netherlands Fachhochschule Dortmund Germany and University of Osnabrück Germany was accepted by the European Commission in May 1996 Additional funding was then obtained from the Hans Bockler Stiftung and the Dutch Organisation for Scientific Research allowing in particular participants from Central and East European countries to be invited The subject of wage relations as a central issue of European social policy was intended to be tackled in an open debate between scientists and policy makers the latter as individual experts rather than representatives

The Rent of Form Pedro Fiori Arantes, 2019-06-11 A critique of prominent architects approach to digitally driven design and labor practices over the past two decades With the advent of revolutionary digital design and production technologies contemporary architects and their clients developed a taste for dramatic unconventional forms Seeking to amaze their audiences and promote their global brands starchitects like Herzog de Meuron and Frank Gehry have reaped substantial rewards through the pursuit of spectacle enabled by these new technologies This process reached a climax in projects like Gehry s Guggenheim Bilbao and the Bilbao effect in which spectacular architectural designs became increasingly sought by municipal and institutional clients for their perceived capacity to enhance property values which author Pedro Fiori Arantes calls the rent of form Analyzing many major international architectural projects of the past twenty years Arantes provides an in depth account of how this architecture of exception has come to dominate today s industry Articulating an original compelling critique of the capital and labor practices that enable many contemporary projects Arantes explains how circulation via image culture consumption particularly through tourism the division of labor and the distribution of wealth came to fix a certain notion of starchitecture at the center of the industry Significantly Arantes s viewpoint is not that of Euro American capitalism Writing from the Global South this Brazilian theorist offers a fresh perspective that advances ideas less commonly circulated in dominant English language academic and popular discourse Asking key questions about the prevailing logics of finance capital and revealing inconvenient truths about the changing labor of design and the treatment of
