Restructuring Krakow Desperately Seeking Capitalism:

Restructuring Krakow Jane Hardy, Al Rainnie, 1996 A critical analysis of the transformation of the Krakow regional economy in the context of both Poland's transitional national economy and the emerging global division of labor This work focuses on foreign direct investment privatization the development of small firms and the importance of the role of organized labor It is based on original research in Krakow involving interviews with union members management officials of the Regional Labor Office regional government the Ministry of Privatization and national Solidarity officials Case studies of steel works food processing organizations and small and medium sized businesses are provided **Poland's New Capitalism**

Jane Hardy, 2009-07-20 This book explores the way that neoliberal policies have formed the basis of political transformation in Poland championed by both post communist and post Solidarity governments Poland was central to the historic changes that took place across Eastern Europe at the end of the Cold War It is the largest economy in the region and was at the forefront of opposition to communism Since then neoliberal policies have controlled the country This book assesses the impact of these policies the role of capital in the form of transnational corporations and foreign direct investment The revival of trade unions and growth of new social movements are also explored as they challenge Poland's new capitalism *Fallen heroes in global capitalism* V. Trappman, Vera Trappmann, 2013-05-07

Through the prism of Nowa Huta a landmark of socialist industrialization Trappmann challenges the one sided account of Poland as a successful transition case and reveals the ambivalent role of the European Union in economic restructuring An exemplary suggestive case of multi level analysis research **Communism, Capitalism and the Mass Media** Colin Sparks, Anna Reading, 1997-12-08 Colin Sparks provides a challenging reassessment of the impact of the collapse of communism on the media systems of Eastern Europe He analyzes both the changes themselves and their implications for the ways in which we think about the mass media while also demonstrating that most of the orthodox accounts of the end of communism are seriously flawed There are much greater continuities between the old system and the new than are captured by the theories that argue that there has been a radical and fundamental change Instead of marking the end of critical inquiry or the end of history as some have suggested Sparks argues that the collapse of the communist systems demonstrates how very limited and frequently incorrect the main ways of discussing the mass media are He concludes with a provocative discussion of the ways in which we need to modify our thinking in the light of these developments **The International Political Economy of Transition** Stuart

Shields, 2014-10-03 Shortlisted for the 2013 BISA IPEG Book Prize this book explores how Eastern Europe's post communist transition can only be understood as part of a broader interrogation of neoliberal hegemony in the global political economy and provides a detailed historical account of the emergence of neoliberalism in Eastern Central Europe Adopting an innovative Gramscian approach to post communist transition this book charts the rise to hegemony of neoliberal social forces Using transition in Poland as a starting point the author traces how particular social forces most intimately associated with

transnational capital successful in the struggle over competing reform strategies Transition is broken down into three stages the first wave illustrates how the rise of particular social forces shaped by global change gave rise to a neoliberal strategy of capitalism from the 1970s It goes on to show how the political economy of Europeanization associated with EU enlargement instilled a second wave of neoliberalisation Finally exploring recent populist and left wing alternatives in the context of the current financial crisis the book outlines how counter hegemonic struggle might oppose a third wave neoliberalisation The International Political Economy of Transition will be of interest to students and scholars of international political economy post communist studies and European politics

Democratic and Capitalist Transitions in Eastern Europe M.

Dobry,2012-12-06 here ofexchange and borrowing in debates between these disciplines all the more so as we shall see a little further on as the analysis of the Central and East European transformations has also contributed to introduce into political science and sociology theoretical systematizations first formulated in economics In addition to this opening up to the objects and theories of economics the pseudo dilemma ofsimultaneity produced by a kind of feedback another series of effects on transitology and the related research domains Contrary to most expectations and predictions in the wake ofthe 1989 upheavals affirmations that the dilemmas problems or challenges of the transitions in Central and Eastern Europe ought to have been dealt with and resolved one after the other in sequence in the manner of the more or less idealized trajectories of Great Britain or Spain trajectories significantly enough promoted far beyond the circles of scholars as a model of transition andabove all contrary to the assumption that superposing a radical economic transformation upon a transition to democracy would make the whole edifice thoroughly unworkable unstable or dangerous it must be stated clearly out that the two processes in their simultaneity are not necessarily incompatible This is one of the main findings stressed upon in several chapters of this book

The State and 'Globalization' Martin Upchurch,2019-01-22

This collection of country studies explores changing relationships between the state employers and labour in an increasingly internationalized world economy It covers ten countries and examines the tensions and contradictions caused by neo liberal market agendas The authors express concern at the potentially ravaging effects of market deregulation on organized labour and present a critical account of state efforts to emulate desired models of national economic development While the central core of the book concerns itself with changing labour relations this is placed within the wider context of state and employer strategy and covers issues such as labour market segmentation welfare and taxation regimes and varying approaches to corporatism

Material Culture and Kinship in Poland Siobhan Magee, 2020-05-27 In this ethnography of Krakowian society Siobhan Magee explores essential questions on the relationship between fur and culture in Poland How can wearing a fur coat indicate someone's political views in Krakow beyond their opinion on animal rights What kinds of associations are given to someone wearing a fur coat in Poland And what impact does generational difference have on the fur wearing traditions of modern day Krakowians Magee looks further into detailed analyses of conversations held relating to fur including why fur is an apt inheritance for a grandmother to pass on to her granddaughter what it was like trading fur on black markets during socialism and why some anti fur activists link fur to patriarchal power and the Roman Catholic Church In so doing it becomes clear how fur is an evocative textile with an uncommonly rich symbolic and historical significance Magee's research uncovers the symbolic and historic significance that fur evokes in relation to culture in Poland In her investigations her ethnography becomes a means for understanding generational difference in Poland Written with reference to extensive fieldwork Magee goes on to show how the classification of generation can be a much more accessible indicator and measure of difference than other categories including sexuality class and faith Thus generation and inheritance are shown to be uniquely powerful idioms with which to discuss power and social change in Poland A new contribution to material culture and the sensory turn this will be of interest to scholars of anthropology ethnography eastern Europe and material culture and textiles The Routledge Handbook of Critical European Studies Didier Bigo, Thomas Diez, Evangelos Fanoulis, Ben Rosamond, Yannis A. Would Trotsky Wear a Bluetooth? Paul R. Josephson, 2010-02-01 After visiting Russia in 1921 the journalist Lincoln Steffens famously declared I have seen the future and it works Steffens referred to the social experiment of technological utopianism he found in the Soviet Union where subway cars and farm tractors would carry the worker and peasant figuratively and literally into the twentieth century Believing that socialism and technology together created a brave new world Boleslaw Bierut of Poland and Kim Il Sung of North Korea and other leaders joined Russia's Vladimir Lenin and Leon Trotsky in embracing big technology with a verve and conviction that rivaled the western world's Paul R Josephson here explores these utopian visions of technology and their unanticipated human and environmental costs He examines the role of technology in communist plans and policies and the interplay between ideology and technological development He shows that while technology was a symbol of regime legitimacy and an engine of progress the changes it spurred were not unequivocally positive Instead of achieving a worker's paradise socialist technologies exposed the proletariat to dangerous machinery and deadly pollution rather than freeing women from exploitation in family and labor they paradoxically created for them the dual and exhausting burdens of mother and worker The future did not work The fall of the Soviet Union in 1991 marked the end of communism's self proclaimed glorious quest to reach and surpass the West Josephson's intriguing study of how technology both helped and hindered this effort asks new and important questions about the crucial issues inextricably linked with the development and diffusion of technology in any sociopolitical system

East Central Europe and the former Soviet Union Michael Bradshaw, Alison Stenning, 2016-04-15 A comprehensive introduction to the important economic social and political processes and development issues in this increasingly popular area of study Employing a groundbreaking thematic approach the book centres its discussion on the interrelation between contemporary development theories and continuing transition issues in this huge and complex region

Why Doesn't Microfinance Work? Milford Bateman, 2010-06-10 Since its emergence in the

1970s microfinance has risen to become one of the most high profile policies to address poverty in developing and transition countries. It is beloved of rock stars, movie stars, royalty, high profile politicians and troubleshooting economists. In this provocative and controversial analysis, Milford Bateman reveals that microfinance doesn't actually work. In fact, the case for it has been largely built on hype, on egregious half truths and latterly on the Wall Street style greed of those promoting and working in microfinance. Using a multitude of case studies from India to Cambodia, Bolivia to Uganda, Serbia to Mexico, Bateman demonstrates that microfinance actually constitutes a major barrier to sustainable economic and social development and thus also to sustainable poverty reduction. As developing and transition countries attempt to repair the devastation wrought by the global financial crisis, *Why Doesn't Microfinance Work* argues forcefully that the role of microfinance in development policy urgently needs to be reconsidered.

Interlocking Dimensions of European Integration
H. Wallace, 2001-07-04
European integration can no longer be understood as a west European experiment mainly focused on functional and economic policy cooperation. The issues addressed include security and defence as well as core concerns of European society. This volume explores three interlocking dimensions of integration: functional, territorial and affiliational. Each dimension influences how countries across the continent engage with European integration. This first volume in the *One Europe or Several* series identifies the agenda of a research programme funded by the British Economic and Social Research Council.

Transformation at Work
Anna Pollert, 2000-01-13
The book is well written and clearly structured, bringing together much dispersed material. The most interesting part of the book is the case study of the Czech engineering firm CKD. The case study gives an insight into the continuing processes of transition: transition is a process rather than a jump from Socialism to capitalism. The author provides solid evidence on the ways in which adjusting to the market has proved painful and in the end unsuccessful for CKD, which has been merged with another firm. Overall, *Transformation at Work* provides a valuable insight into the realities of the transition process at the enterprise level.

Employee Relations
In this book, Anna Pollert questions the values hidden in the burgeoning literature on transformation and addresses the main concerns arising from these. In exploring the key issues of post communist transformation, the author discusses important theoretical issues about the nature of change and continuity, such as historical socio-economic and political effects of transformation, the broad problems of how workers and their organizations respond to change from command to capitalist economies, and case studies of how managers, workers and trade unionists experience these changes within their organizations. *Transformation at Work* explores the key issues of post communist transformation in Eastern Europe. The author discusses important aspects of the nature of change and continuity, including historical socio-economic and political effects, how workers and their organizations respond to change from command to capitalist economies, and how managers, workers and trade unionists experience change within their organizations.
