Restructuring Administrative Policy In Public Schooling Canadian And International Case Studies:

Restructuring Administrative Policy in Public Schooling R. J. S. Macpherson, Yvonne Marjorie Martin, 1993-01-01

Political Philosophy, Educational Administration and Educative Leadership Reynold Macpherson, 2013-10-01 In this book Reynold Macpherson initiates a politically critical theory of educative leadership as a fresh line of inquiry in the practice research and theory of educational administration and educational leadership Divided into four parts the book introduces the sub discipline of political philosophy to the field of educational administration management and leadership It does this by clarifying the knowledge domain of each and identifying how four political ideologies specifically pragmatism communitarianism communicative rationalism and egalitarian liberalism have primarily informed and surreptitiously provided contestable justifications for power in the development of practice research and theory in the field of study The book goes on to offer three case studies illustrating how political philosophy can be used to interpret how people become leaders and administrators of educational institutions and systems Additional case studies then demonstrate how crises in governance in educational institutions and systems can be analyzed and improvements made using the tools of political philosophy The final part uses the sub discipline to critique the author's decades of research into educative leadership and concludes the book by both establishing the relativity of politically critical critique and the ideology it favours neo pragmatism Political Philosophy Educational Administration and Educative Leadership will provide practitioners researchers and theorists in educational administration management and leadership with a deeper appreciation of power by formally introducing them to the assumptions limits and tools of political philosophy Educational Reform Jordan T. Ville, 2001 This book brings together the literature in a field which may define the 21st century Can economic and technological progress continue with educational systems which seem to answer to no one but themselves and which output graduates who can barely read and write and who have only the faintest clue how to use a map This bibliography provides access via Title Author and Subject Indexes Contents Educational Accountability Educational Change Educational Equalisation Educational Leadership Educational Planning Educational Indicators *APAIS 1992: Australian public affairs information service*, *Canadian Books in Print*, 1999 *BCLA Reporter* British Columbia Library Association, 1994 Canadian Books in Print 2002 Marian Butler, 2002-02 Restructuring Welfare Governance Tanja Klenk, Emmanuele Pavolini, 2015-10-30 This volume brings together cutting edge scholarship on an under researched and topical issue Quasi marketization and managerialization of welfare organizations are found to constitute common reform trends in many European countries and across social policy domains following similar timings albeit with different intensities The analysis carried out at the meso and micro levels reveals that ex post control by states has been strengthened managers are becoming relevant or even central actors while professionals in public welfare institutions are seeing their role and autonomy challenged Ana M Guill n University of Oviedo Spain In the contemporary welfare state public management has become a profession of its own At the

same time professionals in public welfare bureaucracies have incorporated market considerations and managerial objectives in their daily work This current evolution of welfare governance path dependent as it is has been documented thoroughly in this book both in depth and from a comparative perspective It makes the book a must read for all who are interested in the welfare state and care about its future Peter Hupe Erasmus University Rotterdam the Netherlands This edited collection on welfare governance across Europe will prove itself invaluable for research and teaching purposes It usefully brings together the whole range of social sciences in a series of well organized evidenced and argued chapters The book is organized into two parts the first focusing on the impact of marketization and managerialization across Europe and across sectors within the welfare state while the second half focuses on the professions and the emerging human resource management issues Both are crucial aspects of the new governance and together deliver a coherent and comprehensive set of papers addressing a highly pertinent set of questions for policymakers analysts and managers for the next decade and will become recommended reading for the students the welfare state social and health policy as well as public sector management and administration Mike Dent Staffordshire University UK Quasi markets and managerial steering techniques have spread in the provision of welfare state services and are now a salient feature This innovative book explores the introduction and impact of marketization and managerialism in social policy by adopting a dual perspective one on regulation and governance the other on human resources covering five fields of social service delivery Welfare governance for example welfare mix regulation employment conditions and customer involvement has changed significantly in the past decade In particular the new governance models not only clash with traditional ideas of bureaucratic regulation but also with the norms and standards of professional service delivery The fact that the labor force in welfare organizations is made up of professionals implies that the introduction of new modes of welfare governance often results in organizational conflicts The editors and contributors collectively assesses these processes not only by comparing different policy fields and countries but also by taking a close look inside organizations examining the coping strategies of professionals and how they adapt to new models of governing welfare organizations An ideal compliment to undergraduate and postgraduate study Restructuring Welfare Governance is essential reading for scholars in the fields of social policy public administration and comparative welfare state analysis Contributors K Baadsgaard V Burau F A Ceravolo B Jantz H J rgensen T Klenk E Kuhlmann R Moscati M Noordegraaf I N rup E Pavolini T Peetz M Rostan U Schimank A Stanchi C Teelken H Theobald M Thunnissen M Turri

Resources in Education, 2001-10 Canadian Books in Print. Author and Title Index, 1975 **Personnel Literature** United States. Office of Personnel Management. Library, United States Civil Service Commission. Library, 1972 Handbook of Research on Educational Leadership for Equity and Diversity Linda C. Tillman, James Joseph Scheurich, 2013-08-21 The rapid growth of diversity within U S schooling and the heightened attention to the lack of equity in student achievement school completion and postsecondary attendance has made equity and diversity two of the principle issues in education educational leadership

and educational leadership research The Handbook of Research on Educational Leadership for Equity and Diversity is the first research based handbook that comprehensively addresses the broad diversity in U S schools by race ethnicity culture language gender disability sexual identity and class The Handbook both highly values the critically important strengths and assets that diversity brings to the United States and its schools yet at the same time candidly critiques the destructive deficit thinking biases and prejudices that undermine school success for many groups of students Well known chapter authors explore diversity and related inequities in schools and the achievement problems these issues present to school leaders Each chapter reviews theoretical and empirical evidence of these inequities and provides research based recommendations for practice and for future research Celebrating the broad diversity in U S schools the Handbook of Research on Educational Leadership for Equity and Diversity critiques the inequities connected to that diversity and provides evidence based practices to promote student success for all children

Administrative Justice and Asylum Appeals Robert Thomas,2011-01-18 FIRST PRIZE WINNER OF THE SLS BIRKS PRIZE FOR OUTSTANDING LEGAL SCHOLARSHIP 2011 How are we to assess and evaluate the quality of the tribunal systems that do the day to day work of adjudicating upon the disputes individuals have with government This book examines how the idea of adjudicative quality works in practice by presenting a detailed case study of the tribunal system responsible for determining appeals lodged by foreign nationals who claim that they will be at risk of persecution or ill treatment on return to their country of origin Over recent years the asylum appeal process has become a major area of judicial decision making and the most frequently restructured tribunal system Asylum adjudication is also one of the most difficult areas of decision making in the modern legal system Integrating empirical research with legal analysis this book provides an in depth study of the development and operation of this tribunal system and of asylum decision making The book examines how this particular appeal process seeks to mediate the tension between the competing values under which it operates There are chapters examining the organisation of the tribunal system its procedures the nature of fact finding in asylum cases and the operation of onward rights of challenge An examination as to how the tensions inherent in the idea of administrative justice are manifested in the context of a tribunal system responsible for making potentially life or death decisions this book fills a

gap in the literature and will be of value to those interested in administrative law and asylum adjudication Local
