Rethinking Chinas Provinces:

Rethinking China's Provinces John Fitzgerald, 2003-09-02 This is the third volume in a series examining the political importance of China's provinces under reform. The present book provides a survey of provinces as echelons of the Peoples Republic of China. It seeks to locate the province as an administrative level in the Chinese state through an examination of history, economic, social, and political developments of these units. By situating the province history, this volume identifies new developments in the territorial administration of the Peoples Republic over the reform era. It also charts the consequent emergence of the city as an intermediate unit situated between the province and the country and providing challenges to the hierarchy of the bureaucratic state. This book includes detailed analyses of Chongqing, Henan, Guangdong, Anhui, Yunnan, and Heilongjiang. It contains extensively researched empirical data collected from these provinces and user-friendly maps of these regions.

China's Provinces and Populations Eric Croddy, 2022-11-23 This manual provides an overview of China's administrative geography, history, and populations of all 31 provinces as well as Hong Kong, Macao, and Taiwan. It focuses primarily on how the provinces came to be, how they were named, as well as their people and populations throughout history. In addition to extensive use of bilingual names (Chinese/English) for specificity, this resource is unique in the datasets contained therein: 1. Up-to-date residential populations of mainland China using the latest decennial 2020 census, and 2. Political-administrative registered household hukou data based on official numbers provided by the Peoples Republic of China (PRC) Ministry of Public Security, showing trends from 2012-2020. Each internally consistent but differing in their methodologies, whereby the Census decennial data provide a snapshot of how many people live in a given location, and the permanent hukou registered household data track each individual based on their hometown, household, urban/rural status, and nationality. This book addresses this chasm, which, among other issues, points to the phenomenon of China's floating populations, where millions of Chinese spend much, if not all, of their time living, working, and studying outside their home provinces. By showing how the Chinese have been populated and their organization throughout history, this manual is the go-to place for professionals, practitioners, and academics working and interested in China's provinces and populations.

China's Regions in an Era of Globalization Tim Summers, 2018-06-19 The rise of China has been shaped and driven by its engagement with the global economy during a period of intensified globalization, yet China is a continent-sized economy and society with substantial diversity across its different regions. This means that its engagement with the global economy cannot just be understood at the national level but requires analysis of the differences in participation in the global economy across China's regions. This book responds to this challenge by looking at the development of China's regions in this era of globalization. It traces the evolution of regional policy in China and its implications in a global context. Detailed chapters examine the global trajectory of what is now becoming known as the Greater Bay Area in southern China, the globalization of the inland mega-city of Chongqing, and the role of China's regions in the globally focused Belt and Road.

the Chinese state Sixth how to decipher the territorial development in the Pearl River Delta the world's factory under the auspices of the state The collection of essays in this volume contributes to the theoretical understanding of urban China The chapters in this book were originally published in the Eurasian Geography and Economics Small Works John A. Donaldson, 2011-08-15 How can policymakers effectively reduce poverty Most mainstream economists advocate promoting economic growth on the grounds that it generally reduces poverty while bringing other economic benefits However this dominant hypothesis offers few alternatives for economies that are unable to grow or in places where economic growth fails to reduce or actually exacerbates poverty In Small Works John A Donaldson draws on his extensive fieldwork in two Chinese provinces Yunnan and Guizhou that are exceptions to the purported relationship between economic growth and poverty reduction In Yunnan an outward oriented developmental state one that focuses on large scale urban development has largely failed to reduce poverty even though it succeeded in stimulating economic growth Provincial policy shaped roads tourism and mining in ways that often precluded participation by poor people By contrast Guizhou is a micro oriented state one that promotes small scale low skill economic opportunities and so reduces poverty despite slow economic growth It is no coincidence that this Guizhou approach parallels the ideas encapsulated in the scientific development view of China's current president Hu Jintao After all Hu when Guizhou's leader helped establish the micro oriented state in the province Donaldson's conclusions have implications for our understanding of development and poverty reduction economic change in China and the thinking behind China's policy decisions

Hainan - State, Society, and Business in a Chinese Province Kjeld Erik Brødsgaard, 2008-08-27 This book examines the complex relationship between the state society and business in China focusing on the experience of the island province of Hainan This island for many years a provincial backwater was given provincial rank in 1988 and became the testing ground for experiments of an economic political and social nature that have received great attention from Beijing in particular the small government big society project This book provides a full account of this transition showing how Hainan casts important light on a number of highly topical issues in contemporary China studies central local relations institutional reform state society relations and economic development strategies It provides detailed evidence of how relations between party cadres state bureaucrats businesses foreign investors and civil society play out in practice in China today It argues that despite the liberalization of recent years especially in the economic sphere the party state remains the most powerful actor in Chinese society and that path breaking reform experiments such as in Hainan remain highly vulnerable due to the central government's hesitation to commit the resources and unequivocal political support needed for the experiments to be successfully realized
