Rethinking Democracy Freedom And Social Co Operation In Politics Economy And Society:

Rethinking Democracy: Freedom and Social Co-operation in Politics, Economy, and Society Carol C. Gould, 1990 Carol Gould reconsiders the theory of democracy in respect to politics economics and social life Rethinking Democracy Carol C. Gould, 1988 **Resolving Public Conflict** E. Franklin Dukes, 1996 Drawing on conflict resolution experience and recent democratic theory Dukes traces the philosophical roots and development of the public conflict resolution field He examines in detail how it has worked in practice in the US and other western democracies **Social and Political Philosophy** James P. Sterba, 2002-11-01 Social and Political Philosophy introduces some of the most important topics in contemporary political philosophy and questions whether these can be accommodated within the framework of liberal theory It consists of specially written essays by prominent figures in social and political philosophy Each essay carefully considers both the theoretical and practical problems of a major topic Traditional perspectives are balanced with new challenges Topics include Moral Methodology Libertarianism Socialism Lesbian and Gay Perspectives Feminism Racial and Multicultural Perspectives Rationality Welfare Liberalism Environmentalism Virtue Ethics and Community Just War Theory and Pacifism Civil Disobedience **Soul, Self, and Society** Edward L. Rubin, 2015-02-17 Morality is not declining in the modern world Instead a new morality is replacing the previous one Centered on individual self fulfillment and linked to administrative government it permits things the old morality forbid like sex for pleasure but forbids things the old morality allowed like intolerance and equality of opportunity **The Ethics of Cyberspace** Cees J Hamelink, 2000 In this book Cees J Hamelink proposes an answer to how should democratic societies organize cyberspace that puts human rights rather than profit at the top of the agenda He argues that conventional ethical approaches are all seriously flawed There is a growing volume of moral rules netiquettes and codes of conduct but they are of little help in solving the moral dilemmas raised by the new technologies In this book the author analyzes the inadequacies of current global governance policies and structures that underpin them and argues for standards which put justice human security and freedom first **Phenomenology and the Political** S. West Gurley, Geoff Pfeifer, 2016-10-12 This timely volume brings together a diverse group of expert authors in order to investigate the question of phenomenology's relation to the political These authors take up a variety of themes and movements in contemporary political philosophy Some of them put phenomenology in dialogue with feminism or philosophies of race others with Marxism and psychoanalysis while others look at phenomenology's historical relation to politics The book shows the ways in which phenomenology is either itself a form of political philosophy or a useful method for thinking the political It also explores the ways in which phenomenology falls short in the realm of the political Ultimately this collection serves as a starting point for a groundbreaking dialogue in the field about the nature of the relationship between phenomenology and the political It is a must read for anyone who is interested in phenomenology or contemporary social and political philosophy *Geography and Ethics* James D. Proctor, David M. Smith, 2002-09-11 This book represents a landmark exploration of the

common terrain of geography and ethics Drawing together specially commissioned contributions from distinguished geographers across the UK North America and Australasia the place of geography in ethics and of ethics in geography is examined through wide ranging thematic chapters Geography and Ethics is divided into four sections for discussion and exploration of ideas Ethics and Space Ethics and Place Ethics and Nature and Ethics and knowledge all of which point to the rich interplay between geography and moral philosophy or ethics **Palgrave Advances in Peacebuilding** O.

Richmond,2010-01-20 The quality of the peace arrived at via liberal peacebuilding approaches has been poor The related statebuilding praxis has generally been unable to respond to its critics What is at stake is a recognition of peacebuilding s everyday political social economic and cultural dynamics This indicates the emergence of a post liberal form of peace

On Civic Friendship Sibyl A. Schwarzenbach, 2009-11-12 Women have performed the vast majority of often unpaid friendship labor for centuries Embodying the freedom equality and ideals of the Constitution civic friendship emerges as a necessary condition for genuine justice Through a critical examination of social and political relationships from ancient times to today Sibyl Schwarzenbach develops a truly innovative feminist theory of the democratic state Beginning with an analysis of Aristotle's notion of political friendship Schwarzenbach brings the philosopher's insights to bear on the social and political requirements of the modern state She elaborates a conception of civic friendship that with its ethical reproductive praxis functions differently from male centered notions of fraternity and with its female participants remains fundamentally separate from generalized male inflected claims of Marxist solidarity Schwarzenbach also distinguishes civic friendship from feminist calls for public care arguing that friendship unlike care not only is reciprocal but also seeks to establish and maintain equality Schwarzenbach concludes with various public institutions economic legal and social that can promote civic friendship without sacrificing crucial liberties In fact women's entrance into the public sphere en masse makes such ideals realistic within a competitive individualistic society

Civilizing the Economy Marvin T. Brown, 2010-04-01 When a handful of people thrive while whole industries implode and millions suffer it is clear that something is wrong with our economy The wealth of the few is disconnected from the misery of the many In Civilizing the Economy Marvin Brown traces the origin of this economics of dissociation to early capitalism showing how this is illustrated in Adam Smith's denial of the central role of slavery in wealth creation In place of the Smithian economics of property Brown proposes that we turn to the original meaning of economics as household management He presents a new framework for the global economy that reframes its purpose as the making of provisions instead of the accumulation of property This bold new vision establishes the civic sphere as the platform for organizing an inclusive economy and as a way to move toward a more just and sustainable world

Education and Democratic Participation Stewart Ranson, 2017-08-03 Education and Democratic Participation is an important and timely contribution to the emerging debate surrounding the value of educating citizens and communities in order to empower them to participate in democratic change Responding to the effects of neo liberal ideology on comprehensive education and public services this book examines the purposes and conditions for reimagining an educated democracy Arguing that social divisions and cultural misrecognition have intensified to the point of crisis Ranson explains that a just society must create opportunities for diverse cohesive and tolerant neighbourhoods to flourish In order to achieve this education will need to reimagine learners as prospective citizens and as cooperative makers of the democratic communities in which they live and work Showing that participation in public forums councils and associations can provide a real means of enabling members of different communities to learn how to respect and value one another this book provides

persuasive arguments that a broader pedagogy of democracy is needed to confront the common dilemmas facing society This work is aimed at researchers academics and postgraduates particularly those lecturing and studying in the areas of education the social sciences and politics It will also appeal to professional and practitioner communities in school and college teaching as well as in local authorities and related public services The Praxis of Diversity Christoph Lütge, Christiane Lütge, Markus Faltermeier, 2019-10-15 This edited collection brings together experts from various disciplines to engage critically with diversity theory diversity politics and their practical application Accordingly the volume provides a provocative discursive space where the key theoretical as well as practical problems of diversity in business institutions and culture can speak to each other and can be assessed The aim is to bridge the gap between two relatively distinct discourses the discourse on practical applications of diversity concepts and the discourse on theoretical approaches to diversity This selection of articles delivers the first step towards achieving this goal Approaching diversity from a business perspective the chapters discuss its ramifications on democratic institutions and theory as well as point to its relevance in didactic and educational settings *Why Human Rights Still Matter in Contemporary Global Affairs* Mahmood Monshipouri, 2020-04-29 This book elucidates why human rights still matter in contemporary global affairs and what can lead to better protection of international human rights in a post liberal order It blends theoretical empirical and normative perspectives while providing much needed analysis in light of the perils of populism authoritarianism and toxic nationalism as well as highlighting the hopes with which people around the world view human rights in the new millennium Systematically combining theoretical perspectives from across the disciplines with numerous case studies it demonstrates not only the complexities of the domestic conditions involved but also the ways in which human dignity can be preserved and promoted during periods of rapid change and uncertainty Finally the book addresses the question of how to protect human rights in such a world in which the active promotion of democratic values and enforcement of human rights may not be necessarily aligned with evolving economic and geopolitical interests of many great and diverse powers on the global scene As such it is a timely intervention for human rights as a concept as it has been attacked and eroded by the instability in our world today This book will be of key interest to scholars and students of human rights in politics law philosophy sociology and history and to humanitarian bodies practitioners and policy makers Reclaiming the System Lisa Herzog, 2018-10-24 The world of wage labour seems to have become a soulless machine an engine of social and environmental destruction Employees seem to be nothing but cogs in this system but is this true Located at the intersection of political theory moral philosophy and business ethics this book questions the picture of the world of work as a system Hierarchical organizations both in the public and in the private sphere have specific features of their own This does not mean however that they cannot leave room for moral responsibility and maybe even human flourishing Drawing on detailed empirical case studies Lisa Herzog analyses the nature of organizations from a normative perspective their rule bound character the ways in which they deal with divided

knowledge and organizational cultures and their relation to morality The volume examines how individual agency and organizational structures would have to mesh to avoid common moral pitfalls and develops the notion of transformational agency which refers to a critical creative way of engaging with one's organizational role while remaining committed to basic moral norms The volume goes on to explore the political and institutional changes that would be required to re-embed organizations into a just society Whether we submit to the system or try to reclaim it Herzog argues is a question of eminent political importance in our globalized world Economy-Environment-Development-Knowledge Ken Cole, 2002-01-04 As we approach the end of the second millennium we find ourselves in times of radical social change Orthodox explanations of the economy the environment and the development process are unable to provide coherent policies for such issues as employment creation environmental degradation and social progress Economy Environment Development Knowledge provides alternative perspectives on these fundamental aspects of human existence Economists environmentalists and development theorists have so far been unable to agree on the most successful prescriptions to address problems To understand contrast and compare alternative understandings of economic environmental and development issues we need to be aware why theorists conceptualise the process of social experience so differently Part 1 of Economy Environment Development Knowledge addresses the subjective preference cost of production and abstract labour theories of values in economics Part 2 explains egocentrism ecocentrism and socioecocentrism as competing theoretical perspectives in environmental theory Part 3 highlights modernisation theory structuralist theory and class struggle as ways to account for the process of development and Part 4 examines the generation of knowledge through positivism paradigms and praxis legitimating competing perspectives in economics environmentalist and development The book concludes by considering why different people find alternative explanations more or less plausible By addressing the disagreements between theorists Economy Environment Development Knowledge provides a unique basis to contrast and compare the plethora of theories of and policies for economic prosperity environmental sustainability and social progress
