Rethinking Aids The Tragic Cost Of Premature Consensus:

Contagion and the State in Europe, 1830-1930 Peter Baldwin, 1999-08-19 This book is a groundbreaking study of the historical reasons for the divergence in public health policies adopted in Britain France Germany and Sweden and the spectrum of responses to the threat of contagious diseases such as cholera smallpox and syphilis In particular the book examines the link between politics and prevention Did the varying political regimes influence the styles of precaution adopted Or was it as Peter Baldwin argues a matter of more basic differences between nations above all their geographic placement in the epidemiological trajectory of contagion that helped shape their responses and their basic assumptions about the respective claims of the sick and of society and fundamental political decisions for and against different styles of statutory intervention Thus the book seeks to use medical history to illuminate broader questions of the development of statutory intervention and the comparative and divergent evolution of the modern state in Europe

Debating Psychic Experience Stanley Krippner, Harris L. Friedman, 2010-09-02 This book presents a provocative debate between parapsychological advocates who claim that Western science's worldview is incomplete and counteradvocates who insist that parapsychological data is either spurious or can be explained by standard scientific principles Despite ongoing and repeated attempts to prove or disprove the existence of parapsychological events there are still no conclusive findings and certainly no consensus across the worldwide community of scholars scientists and proponents of psychic phenomena Still there is no shortage of information about this fascinating topic to allow everyone to draw their own conclusions This book has been expressly written to make each chapter and topic accessible to a general audience despite containing a vast amount of theoretical material The book is organized into two parts in the first section proponents of the validity of parapsychological data and critics who reject that validity state their respective positions In the second part each group responds to each others statements in the form of a debate Other experts from the United States as well as from Australia and Great Britain provide overviews and conclusions

The Dynamics of Persuasion Richard M. Perloff, 2010-05-26 The Dynamics of Persuasion provides a comprehensive and up to date introduction to persuasive communication and attitude change Offering a thorough discussion of classic and contemporary theories of persuasion this text explores the structure and functions of attitudes consistency between attitude and behavior and issues in attitude measurement

Indigenous Theories of Contagious Disease Edward C. Green, 2000-01-01 Far from being the province of magic witchcraft and sorcery indigenous understanding of contagious disease in Africa and elsewhere in the developing world very often parallels western concepts of germ theory according to the author Labeling this indigenous contagion theory ICT Green synthesizes the voluminous ethnographic work on tropical diseases and remedies_ as well as 20 years of his own studies and interventions on sexually transmitted diseases AIDS and traditional healers in southern Africa_ to demonstrate how indigenous peoples generally conceive of contagious diseases as having naturalistic causes His groundbreaking work suggests how western medical

practitioners can incorporate ICT to better help native peoples control contagious diseases *Cyborg Babies* Robbie Davis-Floyd, Joseph Dumit, 2013-08-21 First Published in 1998 Routledge is an imprint of Taylor Francis an informa company

Education John Somers, 1996 **Cancer and the Search for Selective Biochemical Inhibitors** E.J. Hoffman, 2007-06-25

The world of medicine has become splintered into two factions that of orthodoxy and its counterpart alternative or complementary medicine A problem with alternative medicine is of course that of anecdote and hearsay The solution the disclosure in an unassailable fashion of the underlying biochemical principles for alternative cancer therap Colossal Control Failures Jack P. Gibbs, 2015-11-17 This fascinating book analyzes 13 control failures in human history from Robespierre s promotion of the French Revolution to Hoover s efforts to stop the Great Depression to the intelligence failures of 9 11 Assessing the causes of 10 additional historical cases the author s comparative analysis shows how each leadership failure was caused by an expansion of the range of control attempts their scope and or their diversity A leader s or other actor s attempts to broaden the range of control targets have been most important in causing great human failures The analysis is timely during an era when war global warming and other vexing problems plague our society **Higher**

Superstition Paul R. Gross, Norman Levitt, 1997-12-03 The widely acclaimed response to the postmodernists attacks on science with a new afterword With the emergence of cultural studies and the blurring of once clear academic boundaries scholars are turning to subjects far outside their traditional disciplines and areas of expertise In Higher Superstition scientists Paul Gross and Norman Levitt raise serious questions about the growing criticism of science by humanists and social scientists on the academic left This edition of Higher Superstition includes a new afterword by the authors

Flexible Bodies Emily Martin, 1995-10-30 Emily Martin traces Americans changing ideas about health and immunity since the 1940s She explores the implications of our emphasis on flexibility in contexts from medicine to the corporate world warning that we may be approaching a new form of social Darwinism **Sparks of Genius** Robert Scott

Root-Bernstein, Michèle Root-Bernstein, 2001 In this bold book Robert and Michele Root Bernstein vividly describe how geniuses from Albert Einstein and Richard Feynman to e e cummings and Isabel Allende use a common toolbox of mental skills to create new ideas and expressions in every area of the arts and sciences Illustrations photos **Political Physics**

John Protevi, 2001-08-01 Political Physics analyses the work of two of the most influential thinkers of our time Jacques

Derrida and Gilles Deleuze The book takes the reader on a transversal journey crossing the boundaries of philosophy and science Political Physics explores the limits and strengths of Derridean and Deleuzian philosophical approaches Focussing on their differing approaches to the question of the body politic in all its registers from the physical chemical body to the economic the social and the political body the book reveals a profound difference in ontological commitment The book argues that the straightforward materialism of Deleuzian philosophy can operate across the range of analysis whereas Derridean deconstruction effectively operates at the level of reason consciousness and culture Cross cutting a Derridean analysis of the history of philosophy with a Deleuzian approach to creative dialogue and complexity theory Political Physics illuminates the value of both approaches to the analysis of contemporary culture politics and science and to the rereading of the history of ideas

The Virtues of Ignorance Bill Vitek,Wes Jackson,2008-05-01 Human dependence on technology has increased exponentially over the past several centuries and so too has the notion that we can fix environmental problems with scientific applications The Virtues of Ignorance Complexity Sustainability and the Limits of Knowledge proposes an alternative to this hubristic shortsighted and dangerous worldview The contributors argue that uncritical faith in scientific knowledge has created many of the problems now threatening the planet and that our wholesale reliance on scientific progress is both untenable and myopic Bill Vitek Wes Jackson and a diverse group of thinkers including Wendell Berry Anna Peterson and Robert Root Bernstein offer profound arguments for the advantages of an ignorance based worldview Their essays explore this philosophy from numerous perspectives including its origins its essence and how its implementation can preserve vital natural resources for posterity All conclude that we must simply accept the proposition that our ignorance far exceeds our knowledge and always will Rejecting the belief that science and technology are benignly at the service of society the authors argue that recognizing ignorance might be the only path to reliable knowledge They also uncover an interesting paradox knowledge and insight accumulate fastest in the minds of those who hold an ignorance based worldview for by examining the alternatives to a technology based culture they expand their imaginations Demonstrating that knowledge based worldviews are more dangerous than useful The Virtues of Ignorance looks closely at the relationship between the land and the future generations who will depend on it The authors argue that we can never improve upon nature but that we can by putting this new perspective to work in our professional and personal lives live sustainably on Earth

The Great Maya Droughts Richardson B. Gill,2001-04-01 This innovative study argues that the collapse of Classic Maya civilization was driven by catastrophic drought Between A D 800 and 1000 unrelenting drought killed millions of Maya people

with famine and thirst and initiated a cascade of internal collapses that destroyed their civilization Linking global regional and local climate change the author explores how atmospheric processes volcanism ocean currents and other natural forces combined to create the dry climate that pried apart the highly complex civilization in the tropical Maya Lowlands in the ninth and tenth centuries Drawing on knowledge of other prehistoric and historic droughts The Great Maya Droughts is a useful study of the relationship of humans to their natural and physical environment The author tries to understand why the Classic Maya failed to adjust their behavior and culture to the climatic conditions and why civilizations in general sometimes collapse in the face of radical environmental change

Sustainable Communities, Sustainable Development Paul James, Yaso Nadarajah, Karen Haive, Victoria C. Stead, 2012-07-31 Papua New Guinea is going through a crisis A concentration on conventional approaches to development including an unsustainable reliance on mining forestry and foreign aid has contributed to the country's slow decline since independence in 1975 Sustainable Communities Sustainable Development attempts to address problems and gaps in the literature on development and develop a new qualitative conception of community sustainability informed by substantial and innovative research in Papua New Guinea In this context sustainability is conceived in terms that include not just practices tied to economic development It also informs questions of wellbeing and social integration community building social support and infrastructure renewal In short the concern with sustainability here entails undertaking an analysis of how communities are sustained through time how they cohere and change rather than being constrained within discourses and models of development From another angle this project presents an account of community sustainability detached from instrumental concerns with economic development Contributors address questions such as What are the stories and histories through which people respond to their nation's development What is the everyday social environment of groups living in highly diverse areas migrant settlements urban villages remote communities They seek to contribute to a creative and dynamic grass roots response to the demands of everyday life and local global pressures While the overdeveloped world faces an intersecting crisis created by global climate change and financial instability Papua New Guinea with all its difficulties still has the basis for responding to this manifold predicament Its secret lies in what has been seen as its weakness underdeveloped economies and communities where people still maintain sustainable relations to each other and the natural world

Drug Policy and Human Nature W.K. Bickel, R.J. DeGrandpre, 2013-11-11 The formation of drug policy is a complex phenomena influenced by a multitude of sources Among others these influences include historical factors contemporary public opinion regarding the nature and magnitude of drug use and abuse the portrayal of illicit drugs and drug use in the media and lobbying efforts by special interest groups e.g. The Drug Policy Foundation including government agencies e.g. the Justice Department and law enforcement An additional source of influence are the activities of specialists directly engaged in studying drug use and treating drug dependence This includes individuals involved in drug treatment anthropological and cultural studies policy analyses basic psychological and pharmacological research research

on the epidemiology of drug use and dependence and research on prevention This influence by specialists might be usefully distinguished from those influences first mentioned for two reasons First studies of drug use and dependence attempt to uncover empirical generalizations about drugs and second because these findings are empirical there is a hope that they guide at least to some extent the actions of other forces that more directly determine drug policy Psychology as an empirical discipline has long been interested in the use of psychoactive drugs At the level of basic science in psychopharmacology a most important contribution has been the demonstration that drugs of abuse function as reinforcers and thus enter into the same psychological processes as do other appetitive stimuli
