Rethinking Civilizational Analysis:

Rethinking Civilizational Analysis Said Amir Arjomand, Edward A Tiryakian, 2004-06-09 At last a volume on civilization that truly reflects the complexity of multiple civilizations The wealth of contributions Arjomand and Tiryakian have assembled demonstrates the value of an old concept for understanding the awful dilemmas confronting human kind in the global age Its thoroughgoing renewal here establishes this book as the essential benchmark for future scholars of civilization Martin Albrow Founding Editor of International Sociology and author of The Global Age winner of the European Amalfi Prize 1997 In our tension filled world many are heralding and others fearing a clash of civilizations The contributors to this volume provides a healthy and persuasive argument about why this clash need not and certainly should not take place They do so moreover not by rejecting the concept of civilization but by developing a less primordial homogenous and essentialist concept of it An important collection that provides illumination in this sometimes frighteningly dark time Jeffrey Alexander Professor and Chair of Sociology at Yale University The concept of civilization may well replace the notions of globalization and identity as the core component in the vocabulary of 21st century sociology The authors contribute a great deal to the clarification of fashionable controversies around the clash of civilizations and multiculturalism They go a long way toward purging the concept of civilization of its ideological overtones and they succeed admirably in turning it into powerful analytic tool of an emerging field of macrosociology known already as civilizational analysis Piotr Sztompka President International Sociological Association Although the concept of civilization has deep roots in the social sciences there is an urgent need to re think it for contemporary times This book points to an exhaustion in using the nation state and world system as the basic macro units of social analysis because they do not get to grips with the soft power variable of cultural factors involved in global aspects of development Also globalization requires us to reconsider the link between civilization and a fixed or given territory This book focuses upon the dynamic aspect of civilizations Among the topics covered are Civilizational analysis and social theory Global civilization and local cultures Civilizational forms Rationalization and Civilization Civilizations as zones of prestige Historical and comparative dimensions of civilization The clash of civilizations

Anthropology and Civilizational Analysis Johann P. Arnason, Chris Hann, 2018-05-01 Brings social and cultural anthropologists into dialogue with historical sociology and illustrates the continued potential of the concept of civilization for all participants The concept of civilization has a long but checkered history in anthropology and anthropological materials have been of great importance for the development of civilizational analysis in historical sociology Anthropology and Civilizational Analysis brings these diverse fields together and explores a wide range of topics pertaining to civilization from classical theories to contemporary rhetorical discourses including detailed case studies of concrete practices documented through archival and ethnographic research While many scholars and the wider public still think of civilization in simplistic terms viewing it in terms of Enlightenment notions of progress and evolution to higher stages others have pluralized the term only to create essentialized units which are only

tenuously linked to historical processes In this book contributors use dynamic approaches including those rooted in the seminal writings of mile Durkheim and Marcel Mauss opening up the dimension of civilization as an important complement to other key terms such as society and culture in social science and historical analysis Rethinking Civilization Majid Tehranian,2007 This new volume offers an alternative view of human civilization in a globalizing age exploring the uneven pace of development of human societies particularly in the last two centuries and arguing that this is leading to a global civil war *Debating civilisations* Jeremy C. A. Smith,2017-06-24 This electronic version has been made available under a Creative Commons BY NC open access license Debating civilisations offers an up to date evaluation of the re emerging field of civilisational analysis tracing its main currents and comparing it to rival paradigms such as Marxism globalisation theory and postcolonial sociology The book suggests that civilisational analysis offers an alternative approach to understanding globalisation one that focuses on the dense engagement of societies cultures empires and civilisations in human history Building on Castoriadis s theory of social imaginaries it argues that civilisations are best understood as the products of routine contacts and connections carried out by anonymous actors over the course of long periods of time It illustrates this argument through case studies of modern Japan the Pacific and post Conquest Latin America including the revival of indigenous civilisations exploring discourses of civilisation outside the West within the context of growing Western imperial power **The Social Pathologies of Contemporary Civilization** Kieran Keohane,2016-03-03 The Social Pathologies of Contemporary Civilization explores the nature of contemporary malaises diseases illnesses and psychosomatic syndromes examining the manner in which they are related to cultural pathologies of the social body Multi disciplinary in approach the book is concerned with questions of how these conditions are not only manifest at the level of individual patients bodies but also how the social bodies politic are related to the hegemony of reductive biomedical and individual psychologistic perspectives Rejecting a reductive biomedical and individualistic diagnosis of contemporary problems of health and well being The Social Pathologies of Contemporary Civilization contends that many such problems are to be understood in the light of radical changes in social structures and institutions extending to deep crises in our civilization as a whole Rather than considering such conditions in isolation both from one another and from broader contexts this book argues that health and well being are not just located at the level of the individual body the integral human person or even collective social bodies rather they encompass the health of humanity as a whole and our relationship with Nature A ground breaking analysis of social malaise and the health of civilization this book will be of interest to scholars of sociology social theory social psychology philosophy and anthropology **Social Theory and Regional Studies in the Global Age** Saïd Amir Arjomand,2014-05-19 In this pioneering volume leading international scholars argue for the development of a new approach to social theory that draws on regional studies for the conduct of comparative analysis in the global age Social Theory and Regional Studies in the Global Age moves beyond facile generalizations based on the historical experience of modernization

in the West by highlighting differences rather than similarities and contrasts rather than commonalities and by examining civilizational processes and culturally specific developmental patterns distinctive of different world regions Essays combine comparative and historical sociology with civilizational analysis and the study of multiple and alternative modernities Different patterns of modernization are compared within the framework of global local compressed communication and interaction that results from globalization The introductory chapter puts the present effort in the context of the seminal work of three generations of comparative sociologists and what follows is a penetrating analysis of modernization and globality opening the way for rectifying the erasure of the historical experience of a very sizeable portion of humankind from the foundation of social theory

Europe and the Americas Jeremy Smith,2006-08-01 This volume takes up current debates in comparative and historical sociology that deal with multiple modernities and civilizations It does so through an examination of patterns of state formation civilization and the development of capitalism in the interaction of European and American worlds over three centuries The early part of the argument explores cutting edge theoretical debates around the nature of early modern formations

The Art and Science of Sociology Roland Robertson,John Simpson,2016-07-06 The book consists of a volume of essays in honor of the outstanding sociologist Edward A Tiryakian whose work has spanned a considerable number of countries regions and topics He has been highly influential particularly in American and French sociology

The European Heritage Gerard Delanty,2017-07-06 This book offers a critical interpretation of the European heritage for the present day It shows that a transnational perspective on memory and European historical formation draws attention to processes of entanglement and that a focus on such forms of entanglement might be a basis for critical and comparative research on heritage The book poses the question is it possible for European societies and Europe more generally to create a transnational form of heritage that reflects transnational and entangled memories and identities

Pathways to Contemporary Islam Mohamed Nawab Mohamed Osman,2025-10-01 Pathways to Contemporary Islam New Trends in Critical Engagement highlights that the current tensions in Islam and the Muslim world are the result of historical dynamics as opposed to an alleged incompatibility between religious tradition and modernity The emphasis on pathways indicates that critical engagement and contestation have always been intrinsic to the history of Islam The aim of the book is to elaborate the contemporary pathways and analyse the trends that contest the Islamic intellectual tradition the relationship between religion and politics and the individual and collective practice of

religion The collection of essays analyses the current efforts of critical re engagement with the Islamic intellectual tradition and underlines the historical diversity of Islamic orthodoxies that led to the establishment of various pathways in the practice and role of religion in Muslim societies

The Silk Road Tim Winter,2022 From the Great Game to the present an international cultural and political biography of one of our most evocative compelling and poorly understood narratives of history The Silk Road is rapidly becoming one of the key geocultural and geostrategic concepts of the twenty first century Yet for much of the twentieth century the Silk Road received little attention overshadowed by nationalism and its invented pasts and a world dominated by conflict and Cold War standoffs In *The Silk Road* Tim Winter reveals the different paths this history of connected cultures took towards global fame a century after the first evidence of contact between China and Europe was unearthed He also reveals how this remarkably

popular depiction of the past took hold as a platform for geopolitical ambition a celebration of peace and cosmopolitan harmony and created dreams of exploration and grand adventure Winter further explores themes that reappear today as China seeks to revive the Silk Roads for the twenty first century Known across the globe the Silk Road is a concept fit for the modern world and yet its significance and origins remain poorly understood and are the subject of much confusion Pathbreaking in its analysis this book presents an entirely new reading of this increasingly important concept one that is likely to remain at the center of world affairs for decades to come The Axial Age and Its Consequences Robert N.

Bellah,Hans Joas,2012-10-31 This book makes the bold claim that intellectual sophistication was born worldwide during the middle centuries of the first millennium bce From Axial Age thinkers we inherited a sense of the world as a place not just to experience but to investigate envision and alter A variety of utopian visions emerged and led to both reform and repression

Towards the Dignity of Difference? Mojtaba Mahdavi,2016-02-24 The rise of popular social movements throughout the Middle East North Africa Europe and North America in 2011 challenged two hegemonic discourses of the post Cold War era Francis Fukuyama s *The End of History* and Samuel Huntington s *The Clash of Civilizations* The quest for genuine democracy and social justice and the backlash against the neoliberal order is a common theme in the global mass protests in the West and the East This is no less than a discursive paradigm shift a new beginning to the history a move towards new alternatives to the status quo This book is about difference and dialogue it embraces *The Dignity of Difference* and promotes dialogue However it also demonstrates the limits of dialogue as a useful and universal approach for resolving conflicts particularly in cases involving asymmetric and unequal power relations The distinguished group of authors suggests in this volume that there is a third way of addressing global tensions one that rejects the extremes of both universalism and particularism This third way is a radical call for an epistemic shift in our understanding of us other and good evil a radical approach toward accommodating difference as well as embracing the plural concept of the good The authors strengthen their alternative approach with a practical policy guide by challenging existing policies that either exclude or assimilate other cultures that wage the constructed global war on terror and that impose a western neo liberal discourse on non western societies This important book will be essential reading for all those studying civilizations globalization foreign policy peace and security studies multiculturalism and ethnicity regionalism global governance and international political economy

Sociologists in a Global Age Mathieu Deflem,2016-04-01 Sixteen leading international sociologists are brought together in this volume to share their experiences of becoming practitioners in the field Selected for their comparative and transnational interests and experiences the contributors include Martin Albrow Karin Knorr Cetina Diane E Davis Pierpaolo Donati Leon Grunberg Horst J Helle Eiko Ikegami Tiankui Jing Hyun Chin Lim Ewa Morawska Richard M nch Saskia Sassen Joachim J Savelsberg Piotr Sztompka Edward A Tiryakian and Ruut Veenhoven Each contributor provides an auto biographical review of their journey into the discipline with special attention paid to the intellectual and social political contexts in which their work matured

Each chapter concludes with a commentary on the anticipated future direction of that particular sociological area. These original and reflective contributions provide fascinating and rare insights into the careers of sociologists living in a global age.

From World Religions to Axial Civilizations and Beyond Saïd Amir Arjomand, Stephen Kalberg, 2021-03-01. The post World War II idea of the Axial Age by Karl Jaspers and as elaborated into the sociology of axial civilizations by S. N. Eisenstadt in the later twentieth and early twenty-first centuries continues to be the subject of intense scholarly debate. Examples of this can be found in recent works of Hans Joas and Jürgen Habermas. In *From World Religions to Axial Civilizations and Beyond* an internationally distinguished group of scholars discuss, advance, and criticize the Jaspers-Eisenstadt thesis and go beyond it by bringing in the critical influence of Max Weber's sociology of world religions and by exploring intercivilizational encounters in key world regions. The essays within this volume are of unusual interest for their original analysis of relatively neglected civilizational zones, especially Islam and the Islamicate civilization and the Byzantine civilization and its continuation in Orthodox Russia.

The Oxford Handbook of Religious Diversity Chad V. Meister, 2011. This substantial volume of thirty-three original chapters covers the full range of issues in religious diversity. An indispensable guide for scholars and students, its essays make novel contributions and are crafted by recognized experts who represent a wide variety of religious and philosophical perspectives and backgrounds.
