The Women's Liberation Movement and the Politics of Class in Britain George Stevenson, 2019-02-21 This is the first study of the British Women's Liberation Movement's relationship with class politics It explores the meaning of class to women's liberationists identities and activism both nationally and regionally using a previously neglected feminist cluster in North East England as a case study Stevenson demonstrates that British feminism was shaped fundamentally by its relationship to synthesis with and rejection of class politics Through these processes feminists recognised how post war changes in the economy and gender roles were reshaping class and the Women's Liberation Movement attempted to remake class politics in response However socio economic and cultural class differences between the women involved linked to occupation education and background remained intractable obstacles causing

tensions within groups fragmentations into specific class based groups and the ultimate failure of the movement to coalesce into a coherent coalition with labour politics despite great levels of solidarity around particular struggles Examining regional feminism against the national backdrop The Women s Liberation Movement and the Politics of Class in Britain provides an engaging exploration of the fruitful but challenging relationship between British feminism and class politics in a capitalist society

Working-Class Community in the Age of Affluence Stefan Ramsden,2017-02-24 It has appeared to many commentators that the most fundamental change in what it is meant to be working class in twentieth century Britain came not as a result of war or of want but of prosperity Social investigators documented how the relative affluence of the 1950s and 1960s improved the material conditions of life for working class Britons whilst eroding their commitment to the shared life of traditional communities Utilising an oral history case study of sociability and identity in the Yorkshire town of Beverley between the end of the Second World War and the election of Margaret Thatcher s government Working Class Community in the Age of Affluence challenges this influential narrative An introductory essay outlines how sociologists and historians understood the complex social cultural and economic changes of the post war decades through the prism of affluence and traces how these changes came to be seen as deleterious to the traditional working class community The book then proceeds thematically exploring change across areas of social life including family neighbourhood workplace and associational life This book represents the first sustained historical analysis of change and continuity in working class community living during the age of affluence It suggests not only that older social practices persisted but also that new patterns of sociability could strengthen as much as undermine community Ultimately Working Class Community in the Age of Affluence asks us to rethink assumptions about the decline of local solidarities in this pivotal period and to recognise community as a key feature of working class life across the twentieth century

Advances in Critical Discourse Studies John Richardson,Michal Krzyzanowski,David Machin,Ruth Wodak,2016-03-16 Advances in Critical Discourse Studies collects ground breaking scholarship and cutting edge research which reflects significant shifts in Critical Discourse Studies exploring the field from theoretical analytic and methodological perspectives Innovative chapters analyse a diverse range of discourses including journalism mass media political communication policy documents interviews photographic archive and official bodies The chapters in Part I explore Critical Discourse Studies from the point of view of history memory identity politics and discourse analysing salient examples of how memory and recollection of the past shapes understandings and narratives of the present and visions of future societies Part II explores problem oriented analysis in Critical Discourse Studies and examines the roles that discourse plays in the formation perpetuation and transformation of class relations Finally Part III explores a methodological issue by looking at the benefits of reinforcing fieldwork and ethnographic analysis in Critical Discourse Studies The case studies throughout the book demonstrate that analytic research contributes significantly to the in depth and in situ research of a variety of increasingly complex social historical political and economic contexts This book was originally

published as three special issues of the journal *Critical Discourse Studies* *The Politics of Belonging* Nira Yuval-Davis, 2011-11-04 This is an in depth examination of a slippery and contradictory subject Knowledge alone is not enough for this type of project It takes breaking out of narrow conceptual cages and unsettling what we think of as stable meanings The author brings all of this to life in often unforgettable ways Saskia Sassen Professor Columbia University National identities were once taken largely for granted in social science Now they are part of an even more complex politics of belonging that challenges both public affairs and the categories of social science Nira Yuval Davis offers a nuanced account that will be important for scholars and all those concerned with contemporary politics Craig Calhoun Director LSE This is a cutting edge investigation of the challenging debates around belonging and the politics of belonging Alongside the hegemonic forms of citizenship and nationalism which have tended to dominate our recent political and social history Nira Yuval Davis examines alternative contemporary political projects of belonging constructed around the notions of religion cosmopolitanism and the feminist ethics of care The book also explores the effects of globalization mass migration the rise of both fundamentalist and human rights movements on such politics of belonging as well as some of its racialized and gendered dimensions A special space is given to the various feminist political movements that have been engaged as part of or in resistance to the political projects of belonging Yuval Davis deconstructs notions of national and ethnic and interrogates the effects that different political projects of belonging have on members of these collectivities who are differentially located socially economically and politically *Culture, the Arts, and Inequality* Ian Peddie, 2025-03-25 Examining how writers and musicians respond to attempts to define and categorize inequality in moral terms *Culture the Arts and Inequality* American Artists and Social Justice analyzes the writers and artists who challenge the moral categories through which inequality has been maintained and mobilized Beginning with the work of Langston Hughes whose fears for the African American community echo fifty years later in Stevie Wonder s urban chronicles and including key American voices such as Nelson Algren Thomas McGrath Ann Petry and Gwendolyn Brooks as well as Godfather of Rap Gil Scott Heron this book tackles the mechanisms that compelled writers and musicians to reassert the worth and value of those they wrote about opposing the fixing in place of moral classifications applied to cultures and people deemed of little worth Without adequate analysis of those classifications and particularly the role of moral attribution in identifying and categorizing those deemed unworthy we struggle to understand inequality s impact on society and individuals leading to a partial conceptualization of how it is understood and experienced Recognizing that new ways of thinking about class dominated by moral questions but with real material effects and its impact on writers musicians and society are at stake this interdisciplinary project redefines discourses on inequality in the United States today Whiteness and Class in Education John Preston, 2007-08-08 Like many of my friends I didn t really realise that I was working class until I went to university Suddenly what I thought as normal became subtly and not so subtly differentiated as I came into close contact with the middle classes I had not known a time

though when I hadn't been white but I didn't really realise that I was white until I read David Roediger's 1991 book *The Wages of Whiteness*. Through reading this work and others on the topic of whiteness the sense of my own whiteness became palpable to me. Namely that what I naively thought to be a timeless property of my skin was a social construction that had acquired so much symbolic weight over time that it had become seemingly real a racial formation and project. This was with consequences in that a good part of my actual and psychological labour market and other employment benefits were not part of a meritocratic system but due to the oppression of people of colour. This might be part of a system that I at the time associated only with the far right a system of white supremacy. Fundamentally my skin was property and the gains that I had made through it were at the expense of others. I was a so called white Ignatiev and Garvey 1996 who everyday made a political decision to not commit treason to whiteness. *Sociology, Gender and Educational Aspirations* Carol Fuller, 2011-07-07 Annotation

Stakeholders in the Law School Fiona Cownie, 2010-01-28 This collection brings together a distinguished group of researchers to examine the power relations which are played out in university law schools as a result of the different pressures exerted upon them by a range of different stakeholders. From students to governments from lawyers to universities a host of institutions and actors believe that law schools should take account of a vast number of often conflicting considerations when teaching their students designing curricula carrying out research and so on. How do law schools deal with these pressures? What should their response be to the stakeholders who urge them to follow agendas emanating from outside the law school itself? To what extent should some of these agendas play a greater role in the thinking of law schools. *Routledge International Handbook of the Sociology of Art and Culture* Laurie Hanquinet, Mike Savage, 2015-09-16 The Routledge Handbook of the Sociology of Arts and Culture offers a comprehensive overview of sociology of art and culture focusing especially though not exclusively on the visual arts literature music and digital culture. Extending and critiquing Bourdieu's influential analysis of cultural capital the distinguished international contributors explore the extent to which cultural omnivorousness has eclipsed highbrow culture the role of age gender and class on cultural practices the character of aesthetic preferences the contemporary significance of screen culture and the restructuring of popular culture. The Handbook critiques modes of sociological determinism in which cultural engagement is seen as the simple product of the educated middle classes. The contributions explore the critique of Eurocentrism and the global and cosmopolitan dimensions of cultural life. The book focuses particularly on bringing cutting edge relational research methodologies both qualitative and quantitative to bear on these debates. This handbook not only describes the field but also proposes an agenda for its development which will command major international interest. **Risk, Power, and Inequality in the 21st Century** D. Curran, 2016-06-13 *Risk Power and Inequality in the 21st Century* provides a groundbreaking new analysis of the increasingly important relationship between risk and widening inequalities. The massive and often unequal impacts of contemporary risks are recognized widely in popular discussions be it the fall out from the 2008 financial crisis or

Hurricane Katrina yet there is a distinct neglect in social science of the overall systemic impacts of these risks for increasing inequalities This book moves beyond this lacuna to identify novel intersections of risk and inequalities It shows how key processes associated with risk society the social production and distribution of risks as side effects are intensifying inequalities in fundamental ways In articulating how risk is intensifying both the social sources of suffering of the least advantaged and the power of the most advantaged this book realizes a significant rethinking of risk power and inequalities in contemporary society

Cultural Change and Ordinary Life Brian Longhurst, 2007-09-16 How important are the media How is culture changing How is ordinary life being transformed How do we belong This ground breaking book offers a new approach to the understanding of everyday life the media and cultural change It explores the social pattern of ordinary life in the context of recent theories and accounts of social and cultural change Brian Longhurst argues that our social and cultural lives are becoming increasingly audienced and performed and that activities in everyday life are changing due to the ever growing importance and salience of the media These changes involve people forging new ways of belonging where among other things they seek to distinguish themselves from others In Cultural Change and Ordinary Life Longhurst evaluates changes in the media and ordinary life in the context of large scale cultural change especially with respect to globalization and hybridisation fragmentation spectacle and performance and enthusing or fan like activities He makes the case that analysis of the media has to be brought into a more thorough dialogue with other forms of research that have looked at social processes Cultural Change and Ordinary Life is key reading for students and researchers of sociology media studies cultural studies and mass communication
