Issues in E U and U S Foreign Policy edited by M nevver Cebeci aims at analyzing the perceptions interests and policies of the EU and the US on various international issues It portrays their convergences and divergences and reflects on their interplay The book has a geographical focus rather than a thematic one however some themes such as weapons of mass destruction dual use technology transfer energy security and democratization are unavoidable within their respective geographical contexts For example the authors inquire into the case of Iran with a special focus on nuclear proliferation they investigate Russia with a significant emphasis on energy security Iraq is examined with a discussion on the withdrawal of occupation troops and finally the authors address the case of China with a debate on dual use technology transfer

NATO Nevertheless the book aims to go beyond the parochial debates of burden sharing or division of labor in transatlantic relations It focuses on and actually proposes a broader framework of cooperation and coordination for the EU and the US
