Health Communication: Theory and Practice Dianne Berry, 2006-10-16 Why is effective communication important in health and what does this involve What issues arise when communicating with particular populations or in difficult circumstances How can the communication skills of health professionals be improved

Effective health communication is now recognised to be a critical aspect of healthcare at both the individual and wider public level Good communication is associated with positive health outcomes whereas poor communication is associated with a number of negative outcomes This book assesses current research and practice in the area and provides some practical guidance for those involved in communicating health information It draws on material from several disciplines including health medicine psychology sociology linguistics pharmacy statistics and business and management The book examines The importance of effective communication in health Basic concepts and processes in communication Communication theories and models Communicating with particular groups and in difficult circumstances Ethical issues Communicating with the wider public and health promotion Communication skills training Health Communication is key reading for students and researchers who need to understand the factors that contribute to effective communication in health as well as for health professionals who need to communicate effectively with patients and others It provides a thorough and up to date evidence based overview of this important topic examining the theoretical and practical aspects of health communication for those whose work involves communication with patients relatives and other carers

Rethinking Health Promotion Theodore Harney MacDonald, 1998 In today's world health means far more than merely the absence of illness In Rethinking Health Promotion Theodore H MacDonald sweeps away the confusion surrounding the function and position of health promotion He argues that far from being a modern innovation health promotion has existed as a distinct and separate enterprise for as long as biomedicine and cautions against health promotion becoming organized merely an offshoot of medical care Drawing on the author's experience as a World Health Organisation consultant the book also tackles the question of whether health promotion has relevance on an international scale or whether it is purely a eurocentric phenomenon Against this background individual chapters explore universal factors such as sexual health diet unemployment alcohol and tobacco use With its critical and historical approach this book breaks new ground in assessing health promotion and will be stimulating reading for the wide variety of students and professionals studying health promotion

Curing our Ills de-Graft Aikins, 2018-09-23 Millions of Ghanaians live with diabetes hypertension stroke cancers and other major chronic diseases Millions more are at risk of getting these conditions Individuals living with chronic conditions experience many disruptions especially at the early stages of diagnosis and adjustment The disruptions are physical medical complications psychological depression material impoverishment social stigma and spiritual struggles with faith and trust These experiences have an impact on family life and resources with primary caregivers bearing similar disruptions to their chronically ill loved ones While chronic conditions cannot be cured many individuals hope for a cure This hope drives healthcare seeking across different sectors of Ghana's vibrant pluralistic health system When hope for a cure meets claims to cure within the herbalist and faith healing sectors especially the outcomes for individuals and their families can be catastrophic The Ghanaian situation is mirrored in many African countries It is estimated that African chronic non communicable disease NCD prevalence morbidity and mortality rates will rise faster than rates in Asia and Latin America over the coming decades The long term and costly nature of NCDs has major implications for individuals communities health systems and governments In this inaugural lecture Professor Ama de Graft Aikins discusses the psychology of chronic disease risk experience and care in Africa She makes a case for why the problem of NCDs needs to be examined through a psychological lens She draws on her independent and collaborative work on diabetes representations and experiences among Ghanaians in Ghana and Europe and the broader African and global health literature to highlight the complex multi level context of chronic disease risk experience and care She presents a synthesis of the evidence through the concepts of physical ills and ideological ills arguing that both are interconnected and as a result must be addressed through interdisciplinary approaches She concludes by offering practical solutions for reducing chronic disease risk and improving the quality of long term experience and care in Ghana using examples from countries that have implemented successful NCD interventions

Research methods in palliative care Julia M Addington-Hall, Eduardo Bruera, Irene J Higginson, Sheila Payne, 2007-06-07 Palliative and end of life care are concerned with the physical social psychological and spiritual care of people with advanced disease It currently has a poorly developed research base but the need to improve this is increasingly recognised One of the reasons for the lack of research and the variable quality of the research that is undertaken is the difficulty of conducting research with very ill and bereaved people Standard and well established research methods may need to be adapted to work in this context This means that existing research methods textbooks may be of limited use to palliative care practitioners seeking to do research for the first time or to more experienced researchers wanting to apply their knowledge in palliative care settings This research methods textbook is the first to be written specifically for palliative care It has been edited by four experienced palliative care academics with acknowledged expertise and international reputations in this field It encompasses methods used in both

clinical and health services research in palliative care with sections on clinical epidemiological survey and qualitative research as well as a section covering skills needed in any research project Each chapter provides readers with an up to date overview of the research method in question an understanding of its applicability to palliative care and of the particular challenges of using it in this setting It is essential reading for all palliative care researchers Handbook of Critical Psychology Ian Parker, 2015-04-17 Choice Recommended Read Critical psychology has developed over time from different standpoints and in different cultural contexts embracing a variety of perspectives This cutting edge and comprehensive handbook values and reflects this diversity of approaches to critical psychology today providing a definitive state of the art account of the field and an opening to the lines of argument that will take it forward in the years to come The individual chapters by leading and emerging scholars plot the development of a critical perspective on different elements of the host discipline of psychology The book begins by systematically addressing each separate specialist area of psychology before going on to consider how aspects of critical psychology transcend the divisions that mark the discipline The final part of the volume explores the variety of cultural and political standpoints that have made critical psychology such a vibrant contested terrain of debate The Handbook of Critical Psychology represents a key resource for researchers and practitioners across all relevant disciplines It will be of particular interest to students and researchers in psychology psychosocial studies sociology social anthropology and cultural studies and to discourse analysts of different traditions including those in critical linguistics and political theory Constructing Pain Robert Kugelman, 2016-11-25 Everyone experiences pain whether it s emotional or physical chronic or acute Pain is part of what it means to be human and so an understanding of how we relate to it as individuals as well as cultures and societies is fundamental to who we are In this important new book the first in Routledge s new Critical Approaches to Health series Robert Kugelman provides an accessible and insightful overview of how the concept of pain has been understood historically psychologically and anthropologically Charting changes in how after the development of modern painkillers pain became a problem that could be solved the book articulates how the possibilities for living with pain have changed over the last two hundred years Incorporating research conducted by the author himself the book provides both a holistic conception of pain and an understanding of what it means to people experiencing it today Including critical reflections in each chapter Constructing Pain offers a comprehensive and enlightening treatment of an important issue to us all and will be fascinating reading for students and researchers within health psychology healthcare and nursing Dead Center Georgia Jones Sorenson, James Macgregor Burns, 1999-11-26 The urgent question of our time is whether we can make change our friend and not our enemy To renew America we must be bold must revitalize our democracy Together with our friends and allies we will work to shape change lest it engulf us With those inaugural words William Jefferson Clinton began his first term as President of the United States Now a Pulitzer Prize winning historian and a former White House aide provide the first penetrating thoughtful evaluation of President Clinton s leadership Before he was

voted into office Bill Clinton told the authors in an interview that he wanted to be a transforming leader a president who would fashion real and lasting change in peoples lives in the tradition of Franklin Delano Roosevelt But how has this president who has sought to lead from the center with his vice president Al Gore and the First Lady Hillary Rodham Clinton measured up against his own stated goals and the aspirations and performances of other presidents since World War II From the health care debacle and the 1994 midterm elections that swept the Republicans to a majority in both houses of Congress to the effect of scandal and impeachment on his ability to govern Dead Center examines the leadership style of Bill Clinton and offers a forceful challenge to the strategy of centrism There is no more respected presidential historian than James MacGregor Burns author of several acclaimed books on leadership and the Pulitzer Prize winning study of Franklin D Roosevelt Georgia J Sorenson adds her own insights as a political scientist and presidential scholar Their combined efforts have resulted in an incisive informative authoritative work and an absorbing read Health Promotion: A Psychosocial Approach Stephens, Christine, 2008-10-01 Health Promotion provides a critical and theoretical basis for practice in social and community approaches to health promotion The Abyss as a Concept for Cultural Theory , 2024-01-08 This edited volume provides a comparative exploration of corresponding concepts of the abyss in various languages and cultures Fourteen chapters investigate ancient cultures such as Hebrew Ancient Greek Sanskrit and Old Norse but also more contemporary American African and Asian languages such as Hawaiian Umbundu Chinese and Khasi as well as European languages such as German Estonian English French Polish and Russian The book combines ethnolinguistics with history of ideas literature folklore religion and translation based on the conviction that language and our linguistic concepts give evidence of and shape our ideas about the world and about ourselves *EBOOK: Thinking Nursing* Tom Mason, Elizabeth Mason-Whitehead, 2003-12-16 Thinking Nursing This major new textbook provides a unique one stop resource that introduces nursing students to the disciplines that underpin nursing practice The broad range of subjects covered includes Sociology Psychology Anthropology Public Health Philosophy Economics Politics and Science Written by nursing lecturers with nursing students in mind this book enables nurses to grasp the principles behind these disciplines and apply the concepts to everyday health care practices Each chapter offers The theoretical background of the major tenets of each discipline A comprehensive discussion of how they relate to practice Cross references to other relevant chapter sections Suggestions for further reading A glossary of key terms Practical advice is also available in a chapter dedicated to methods of research planning and construction of written work Moreover the textbook encourages creative and lateral thinking beyond its use in planning and writing assignments Thinking Nursing is essential reading for nursing students on Common Foundation Programmes both at diploma and degree level and qualified nurses undertaking additional specialist training including masters degrees as well as those involved in planning designing and the implementation of educational courses for nurses *Considering Counter-Narratives* Michael Bamberg, Molly Andrews, 2004-11-30 Counter narratives only make sense

in relation to something else that which they are countering The very name identifies it as a positional category in tension with another category But what is dominant and what is resistant are not of course static questions but rather are forever shifting placements The discussion of counter narratives is ultimately a consideration of multiple layers of positioning The fluidity of these relational categories is what lies at the center of the chapters and commentaries collected in this book The book comprises six target chapters by leading scholars in the field Twenty two commentators discuss these chapters from a number of diverse vantage points followed by responses from the six original authors A final chapter by the editor of the book series concludes the book

When IVF Fails K. Throsby, 2004-08-19 In spite of the fact that almost eighty percent of all IVF cycles are unsuccessful, the dominant representations of the technology are of its success. Based on extensive interviews with women and couples who have undergone IVF unsuccessfully and who have since stopped treatment and taking an overtly feminist approach, the book explores the ways in which IVF failure is experienced and accounted for. The book argues that IVF failure and the end of treatment have to be carefully managed over time in order to construct the self as normal in the profoundly gendered context of reproductive normativity. Treatment failure is identified in the book not only as a central but largely excluded aspect of the experience of IVF but also of a proliferating range of new, more controversial reproductive and genetic technologies. **R.D.**

Laing and the Politics of Truth Theodor Itten, Ron Roberts, 2025-05-29 This diverse collection of essays, conversations, reflections and reviews was first published in celebration of the 50th anniversary of R.D. Laing's masterpiece *The Divided Self*. Under the umbrella of the Politics of Truth, this new edition confirms Laing as an original practitioner in the healing arts and a succinct critical and theoretical voice whose relevance has not diminished. In these pages are writings appraising Laing's life, work, brilliance and frailties as well as his wide and varied influences. Contributions have come from colleagues, friends and clients as well as people who never knew him personally yet deeply appreciate his work. Each is different in tone and character. Each captures something unique about Laing and his work. R.D. Laing (1927-1989) was famous for his empathic perception, sagacious intellect and wisdom of the heart as well as his rebelliousness and falling from grace. In reading this book, you may be challenged to rethink some of your assumptions. We hope that you will find more than a little inspiration.
