Beyond Empiricism Paul Smeyers, Marc Depaepe, 2003 Creating Insecurity Anthony D. Lott, 2019-10-01 In this absorbing book Anthony Lott develops a national security analysis that can be used to critique the policies of states His approach combines realist thought common to traditional security studies and a version of political constructivism common to critical security studies While the focus on human security remains integral the 9 11 attacks on New York demonstrate the importance of national security traditionally defined This book recognizes the importance of both components of security in a broader security dialogue After building a theoretical understanding of security the work examines four disparate security issues that currently engage policy makers in the United States the current discourse concerning ballistic missile defense the war on drugs in Colombia democratic challenges to economic globalization and the state response and the US led war to oust Saddam Hussein from power in Iraq The book is designed for upper division international relations courses in national security studies international politics and theory

Undocumented Storytellers Sarah C. Bishop, 2019 Undocumented Storytellers offers a critical exploration of the ways undocumented immigrant activists harness the power of storytelling to mitigate the fear and uncertainty of life without legal status and to advocate for immigration reform Sarah C Bishop chronicles the ways young people uncover their lack of legal status experientially through interactions with parents in attempts to pursue rites of passage reserved for citizens and as audiences of political and popular media She provides both theoretical and pragmatic contextualization as activist narrators recount the experiences that influenced their decisions to cultivate public voices Bishop draws from a mixed methodology of in depth interviews with undocumented immigrants from eighteen unique nations of origin critical rhetorical ethnographies of immigrant rights events and protests and narrative analysis of immigrant produced digital media to interrogate the power and limitations of narrative activism Autobiographical immigrant storytelling refutes mainstream discourse on immigration and reveals the determination of individuals who elsewhere have been vilified by stereotype and presupposition Offering an unparalleled view into the ways immigrants stories appear online Bishop illuminates digital narrative strategies by detailing how undocumented storytellers reframe their

messages when stories have unintended consequences The resulting work provides broad insights into the role of strategic framing and autobiographical story sharing in advocacy and social movements

Kral, 2012-02-01 Demonstrating how psychologists use theory philosophy and history to illuminate the subjects they study this book explores both the obstacles and benefits of integrating these perspectives into contemporary Western psychology It offers a timely survey of current ideas at the crossroads of these disciplines and represents new ideas about how psychology can respond to changes on what it means to be human and on how to further this knowledge The convergence of history theory and philosophy is examined from three perspectives the reconsideration of the importance of context in psychology the argument that psychology is embedded in morality values and politics and the consideration of the practice of such convergence looking at how history theory and philosophy function in psychology This book presents contemporary thinking by noted scholars who have made significant contributions to a re visioning of psychology *Making Peace In and With the World* Heon Kim, John Raines, 2011-12-08 Making Peace In and With the World The G len Movement and Eco Justice is a representative study and working analysis of contemporary Islamic thought on eco justice It cuts through problems facing humanity today ranging from inequality and violence in the smaller globalized world to the end death of nature as signaled by various environmental and ecological crises Addressing these problems this volume sheds light on two dimensions of peace in the earth community making peace between differing human communities and making peace between humanity and nature The phrase Eco Justice in this volume signifies this dual reality thereby offering a unique and insightful view that justice in the world must go hand in hand with ecological justice if peace is to be made With its dual foci of peace this volume contributes to multi disciplinary academic areas It adds to a burgeoning field of religious ecology by exploring the dynamics at play in the interaction between religion human communities and nature and by providing natural scientific works with considerable theoretical philosophical and ethical implications This volume also corresponds to studies in the interdisciplinary field of war and peace Since it deals centrally with the question of religion and eco justice this volume challenges assumptions of exclusivist religion religion oriented violence and the religion based Clash of Civilizations The contributors of this volume from diverse academic backgrounds take G len and the G len movement as the case study Muhammed Fethullah G len is one of the most significant Islamic theologians in the contemporary world and his inspired G len movement is the fastest growing Islamic civic movement worldwide This volume provides a key reference to studies in G len and his movement for new discussions and criticisms And by taking this figure and his movement as a case it reveals a new dimension of peace among differing human communities and between humanity and nature **Beyond the Rope** Karlos K. Hill, 2016-07-11 Beyond the Rope is an interdisciplinary study that draws on narrative theory and cultural studies methodologies to trace African Americans changing attitudes and relationships to lynching over the twentieth century Whereas African Americans are typically framed as victims of white lynch mob violence in both scholarly and public

discourses Karlos K Hill reveals that in the late nineteenth and early twentieth centuries African Americans lynched other African Americans in response to alleged criminality and that twentieth century black writers envisaged African American lynch victims as exemplars of heroic manhood By illuminating the submerged histories of black vigilantism and consolidating narratives of lynching in African American literature that framed black victims of white lynch mob violence as heroic Hill argues that rather than being static and one dimensional African American attitudes towards lynching and the lynched black evolved in response to changing social and political contexts *A Philosophical Anthropology of the Cross* Brian

Gregor,2013-03-18 What does the cross both as a historical event and a symbol of religious discourse tell us about human beings In this provocative book Brian Gregor draws together a hermeneutics of the self through Heidegger Gadamer Ricoeur and Taylor and a theology of the cross through Luther Kierkegaard Bonhoeffer and J ngel to envision a phenomenology of the cruciform self The result is a bold and original view of what philosophical anthropology could look like if it took the scandal of the cross seriously instead of reducing it into general philosophical concepts *Transdisciplinarity for Transformation*

Harrold, 2006-10-01 The story of secularization and religious disestablishment in American higher education is told from the standpoint of a lively community of professors students and administrators at the University of Michigan in the late nineteenth century This campus culture one of the most closely watched of its day sheds new light on the personal and cultural meanings of these momentous changes in American intellectual and public life Here we see how religion was not so much displaced or marginalized in the heyday of university reform as translated into new arenas of public service and scholarly pursuit The main characters in this story professors Calvin Thomas and Henry Carter Adams underwent profound religious crises of faith accompanied by major adjustments in their interpersonal relationships Together with students and administrators their lives constituted a communal biography of religious deconversion A close examination of these private and public worlds provides a more complete understanding of the dynamics behind new academic policies and intellectual innovations in a leading public university The non cognitive intersubjective gendered quasi religious shadings of academic modernism and early pragmatist philosophy in particular come to light in vivid ways As John Dewey later observed Michigan became an experimental laboratory for new meanings to unfold new acts to propose *Shaping Concepts of Technology* Marc J de Vries, Arley Tamir, 2012-12-06 As our modern society is so obviously influenced by technology there is a growing awareness of its importance for education The interest for including technology as a part of general education curricula is increasing In many countries technology is an element in the curriculum either as a topic a project part of a Science Technology Society STS programme part of science education or as a separate subject In order to clarify what technology is there is a need for international discussions in which philosophers engineers scientists and educationalists are involved One of the few conferences with such a broad representation was the second Jerusalem International Science and Technology Education Conference JISTEC that was held in Jerusalem January 8 11 1996 a conference that can truly be seen as a milestone in the international history of technology education More than 1 000 technology educators from more than 80 countries of the world and ministers of education from 28 countries came together to discuss current issues in technology education during JISTEC To cite from Dr Michael Dyrenfurth's personal overview of the conference in the Journal of Industrial Teacher Education vol 33 no 2 Winter 1996 pp 83 85 Simply put this conference represented the most stellar international collection of technology education advocates the world has ever seen in one place Or in the words of Dr

Habermas and Pragmatism Mitchell Aboulafia, Myra Bookman, and Cathy Kemp, 2012-12-06 There are few living thinkers who have enjoyed the eminence and renown of Jürgen Habermas His work has been highly influential not only in philosophy but also in the fields of politics sociology and law This is the first collection dedicated to exploring the connections

between his body of work and America's most significant philosophical movement, pragmatism. Habermas and Pragmatism considers the influence of pragmatism on Habermas's thought and the tensions between Habermasian social theory and pragmatism. Essays by distinguished pragmatists, legal and critical theorists, and Habermas cover a range of subjects including the philosophy of language, the nature of rationality, democracy, objectivity, transcendentalism, aesthetics, and law. The collection also addresses the relationship to Habermas of Kant, Peirce, Mead, Dewey, Piaget, Apel, Brandom, and Rorty.
