## **Rethinking Poverty Comparative Perspectives From Below:**

**Rethinking Poverty** Wil G. Pansters, 2000      **Poverty and Social Deprivation in the Mediterranean** Maria Petmesidou, Christos Papatheodorou, 2013-07-04 In the growth of regional identities worldwide the Mediterranean Basin is emerging as an entity in its own right This book a unique collaboration among social scientists around the entire Mediterranean littoral covers Southern Europe Turkey the Balkans North Africa and the Near East Leading economists sociologists and social policy experts document with new and up to date empirical material the changing profiles of poverty and social deprivation The result is a thought provoking comparison of the extent severity and structural causes of poverty and social inequality and the huge diversity of public responses to the challenges they pose      *Killing the Snake of Poverty. Local perceptions of poverty and wellbeing and peoples capabilities to improve their lives in the Southern Andes of Peru* Azusa Miyashita, 2009      Understanding Poverty and Well-Being David Hulme, John Teye, 2013-10-18 Written by a multi disciplinary team of contributors this collection explores the different dimensions of well being poverty and inequality A person s sense of well being is compounded of many elements including economic political and social psychology Poverty and inequality are aspects of a lack of well being in multiple dimensions and this text argues development should be considered a process that overcomes these multiple deficiencies This book examines the advantages of analysing poverty and development by multi discipline research Economists political sociologists and anthropologists put forward an idea of well being from their own perspective using their own research material while the editors argue in their introduction that bringing to bear of many disciplines can enrich the research output of all      **Promoting Innovation, Productivity and Industrial Growth and Reducing Poverty** Maureen Mackintosh, Joanna Chataway, Marc Wuyts, 2021-04-26 Development and the ending of mass poverty require a massive increase in productive capabilities and production in developing countries Some countries notably in Asia are achieving this Yet pro poor aid policies especially for the least developed countries operate largely without reference to policy thinking on the promotion of innovation for productivity growth Conversely policy makers and researchers on innovation and industrial policies tend to know little about the potential for social protection to support innovation and productivity improvement This book aims to focus attention on this gulf between research on innovation and on poverty reduction and to identify some of its policy consequences to set out some ways in which this gulf can be bridged analytically and empirically and to contribute to the creation of an agenda for further research and an understanding of the urgency of the implied rethinking The first two chapters provide sustained arguments for embedding social policy thinking in much more productivist frameworks of thought that focus on raising productivity and employment and for identifying growth theories that can incorporate satisfactory understandings of innovation and employment upgrading A set of chapters then tackle these broad themes in the context of health addressing the interlinked issues of innovation health inequity and associated impoverishment The final set of chapters examines the challenge of creating

industrial policies that generate both innovation and employment using and going beyond concepts of systems of innovation

**Single Motherhood and Poverty** Annelou Ypeij, Johanna Louisa Ypeij, 2009 In the Netherlands single mothers run a high risk of becoming poor even though the country has a well developed welfare system This study brings together many partial life histories of single mothers of different cultural backgrounds and origins and shows that poverty is not solely material deprivation Through its in depth account of the ways single mothers construct their everyday lives this book sheds light on the many social cultural and structural dimensions of poverty *Exploitation and Overexploitation in Societies Past and Present* Brigitta Benzinger, Bernd Herrmann, 2003 Human impact on landscape can be conceptualised in terms of socially governed ecological systems In the past the adaptive capacity of human cultural systems has been emphasised Nowadays a shift can be recognised towards modified views Resources are discussed as prerequisites for establishing complex human societies This includes also a more biologically minded view from the standpoint of the humanities In such a view human societal complexes can be understood as systems that manage energy and matters The concept of social metabolic regimes has developed in such a context Cultures as seen within this paradigm are not understood merely as autopoietic symbolic entities but as results of an interaction of material prerequisites and emerging social structures One might dismiss this as an epistemological shift part of the play of science with itself But it remains unsolved so far in terms of evolutionary theory if the ultimate goal of evolution is reproductive success or access

**Redefining Human Rights in the Struggle for Peace and Development** Terrence E. Paupp,2014-01-20

Examines the history of the struggle to advance human rights and provides a global framework of constitutional protections to implement these rights Violence against Women under International Human Rights Law Alice Edwards, 2010-12-23

Since the mid 1990s increasing international attention has been paid to the issue of violence against women. However, there is still no explicit international human rights treaty prohibition on violence against women and the issue remains poorly defined and understood under international human rights law. Drawing on feminist theories of international law and human rights, this critical examination of the United Nations legal approaches to violence against women analyses the merits of strategies which incorporate women's concerns of violence within existing human rights norms such as equality norms, the right to life and the prohibition against torture. Although feminist strategies of inclusion have been necessary as well as symbolically powerful for women, the book argues that they also carry their own problems and limitations, prevent a more radical transformation of the human rights system and ultimately reinforce the unequal position of women under international law.

**How Nations Escape Poverty** Rainer Zitelmann, 2024-03-26 A rigorous defense of free markets and open enterprise in the tradition of Adam Smith. During the 20th century, Vietnam and Poland were both victims not only of devastating wars but also of socialist planned economies that destroyed whatever war hadn't already. In 1990, Vietnam was still one of the poorest countries in the world, while Poland was one of the poorest in Europe. But in the three decades since, then both countries have drastically improved their citizens' standards of living and escaped the vicious cycle of national poverty. In this book, Rainer Zitelmann identifies the reasons behind the sensational growth of both nations' economies, drawing out the lessons that other countries can learn from these two success stories. To explain the source of their success, he returns to Adam Smith's 1776 treatise *The Wealth of Nations*: the only way to overcome poverty is through economic growth. Smith wrote, and economic freedom is the crucial prerequisite for such growth. Developments over the past 250 years have proved Smith right: The market economy has led to a global decline in poverty unparalleled in human history. Compare this to the fifty years of development aid in Africa that have only entrenched the status quo, and it is clear which approach yields superior results. Despite these strides, almost ten percent of the world's population still lives in extreme poverty. So, what measures actually help to alleviate poverty today? Through a wealth of data and stories from the everyday lives of Polish and Vietnamese people who experienced reforms, Zitelmann demonstrates the persistent relevance of Smith's ideas to economic flourishing in the 21st century.
