International Law, Sustainable Development and Water Management Antoinette Hildering, 2004 Publisher Description

Natural Resource Degradation and Human-Nature Wellbeing Rashed Al Mahmud Titumir, Tanjila Afrin, Mohammad Saeed Islam, 2023-03-09

The book addresses the gaps in the body of knowledge from two grounds Firstly it adds value through explaining the dynamics of natural resource governance by focusing on the particular arenas of biodiversity resources water resources and climate change in developing country context Secondly it critically scrutinizes the market centric perspectives on one hand and combines political economy questions that are generally overlooked in discussions of current resource governance framework on the other It develops a new framework to examine the reasons behind the degradations of natural resources to offer sustainable solutions to the problems It shows that the natural resources have been exploited beyond sustainable limits due to the structural rigidities embedded in and reproduced by fragile institutions and unequal power sharing arrangements under the market centric economic system The book formulates a new understanding of sustainability in case of usage and management of natural resources by incorporating the idea of human sociality It highlights the importance of the well being of nature and human beings must go side by side one without the other is not a sustainable option The book contains key learnings for scholars and researchers working in the field of development studies who wish to gain a deeper understanding on the sustainable natural resource governance specifically in the contexts of developing countries For policymakers and policy advocates the book serves as the groundwork on policies regarding biodiversity resources water resources and climate change specific to the context of developing countries providing more relevant contents in terms of laying out justification for policy objectives

Water Unesco, World Water Assessment Programme (United Nations), 2006 This illustrated report sets out a global review of the state of the world's freshwater resources based on the collective work of 24 United Nations agencies following on from the conclusions of the first UN World Water Development Report Water for People Water for Life published in 2003 ISBN 9231038818 This second edition discusses progress towards the water related targets of the UN Millennium Development Goals and examines a range of key issues including population growth and increasing urbanisation changing ecosystems food production health industry and energy as well as risk management valuing and paying for water and increasing knowledge and capacity It contains 16 case studies which consider key challenges in water resource management and makes a number of recommendations to guide future action and encourage sustainable use productivity and management of our increasingly scarce freshwater resources

[Handbook on Water Security](#) Claudia Pahl-Wostl, Anik Bhaduri, Joyeeta Gupta, 2016-01-29 Water security has received increasing attention in the scientific and public policy communities in recent years The Handbook on Water Security is a much needed resource that helps the reader navigate between the differing interpretations of water security It explains the various dimensions of the topic by approaching it both

conceptually and thematically as well as in relation to experiences in different regions of the world. The international contributors explore the various perspectives on water security to show that it has multiple meanings that cannot easily be reconciled. Topics discussed include challenges from human security to consumerism, how trade policies can help to achieve water security in a transboundary setting, the potential of risk based governance arrangements and the ecology of water security. Scholars and postgraduate students in the social sciences working on water related issues will find this book to be of substantial interest. It will strongly appeal to policymakers and practitioners looking at the strengths and limitations of water security.

Re-thinking Water and Food Security Luis Martinez-Cortina, Alberto Garrido, Elena Lopez-Gunn, 2010-09-30. This book provides an overview by leading world experts on key issues in global water and food security. The book is divided in a series of overarching themes and sections. The first part of the book provides an overview of water and food security. The second and third sections look at global trade and virtual water trade and provide some

Water and Post-Conflict Peacebuilding Erika Weinthal, Jessica J. Troell, Mikiyasu Nakayama, 2014-02-24. Water is a basic human need and despite predictions of water wars, shared waters have proven to be the natural resource with the greatest potential for interstate cooperation and local confidence building. Indeed, water management plays a singularly important role in rebuilding trust after conflict and in preventing a return to conflict. Featuring nineteen case studies and analyses of experiences from twenty eight countries and territories in Africa, Asia, Europe, the Americas and the Middle East and drawing on the experiences of thirty five researchers and practitioners from around the world, this book creates a framework for understanding how decisions governing water resources in post conflict settings can facilitate or undermine peacebuilding. The lessons will be of value to practitioners in international development and humanitarian initiatives, policy makers, students and others interested in post conflict peacebuilding and the nexus between water management and conflict.

Water and Post Conflict Peacebuilding is part of a global initiative to identify and analyze lessons in post conflict peacebuilding and natural resource management. The project has generated six edited books of case studies and analyses with contributions from practitioners, policy makers and researchers. Other books in this series address high value resources, land, livelihoods, assessing and restoring natural resources and governance.

Recarbonizing global soils - A technical manual of recommended management practices Food and Agriculture Organization of the United Nations, Intergovernmental Technical Panel on Soils, 2021-09-08. During the last decades, soil organic carbon (SOC) attracted the attention of a much wider array of specialists beyond agriculture and soil science as it was proven to be one of the most crucial components of the earth's climate system which has a great potential to be managed by humans. Soils as a carbon pool are one of the key factors in several Sustainable Development Goals, in particular Goal 15: Protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification and halt and reverse land degradation and halt biodiversity loss, with the SOC stock being explicitly cited in Indicator 15.3.1. This technical manual is the first attempt to gather in a standardized format the existing data on the impacts

of the main soil management practices on SOC content in a wide array of environments including the advantages drawbacks and constraints This manual presents different sustainable soil management SSM practices at different scales and in different contexts supported by case studies that have been shown with quantitative data to have a positive effect on SOC stocks and successful experiences of SOC sequestration in practical field applications Volume 4 includes 51 case studies dealing with cropland grassland integrated systems and farming approaches

Natural Resource Conflicts M. Troy Burnett, 2016-09-19 Natural resource and environmental conflicts have long been issues confronting human societies This case based examination of a wide range of natural resource disputes exposes readers to many contemporary examples that offer reasons for both hope and concern The Rwandan genocide the Sudanese civil war and perpetual instability in the Middle East and Africa each of these crises have arguably been instigated and maintained by natural resource disputes China has undertaken a Herculean task to plant hundreds of millions of trees along its margins in an effort to save Beijing from crippling dust storms and halt the expansion of the Gobi desert Will it work and is it worth it These and many other cases of conflict stemming from natural resource or environmental concerns are explained and debated in this up to date examination of contemporary and ongoing topics The book examines conflicts over precious resources and minerals such as diamonds oil water and fisheries as well as the pursuit of lesser known minerals like Coltan and other rare earth elements important resources in our technological age in remote locations such as Greenland and the Congo Each topic contains an overview and two position essays from different authors thereby providing the reader with highly informative and balanced perspectives Reference entries accompany each topic as well helping students to better understand each issue As the world hurtles into the 21st century these natural resource issues are becoming increasingly important with all global citizens having a significant stake in how these conflicts arise and play out

Water Governance, Policy and Knowledge Transfer Cheryl De Boer, Joanne Vinke-de Kruijf, Gül Özerol, Hans Th. A. Bressers, 2013-05-29 In an increasingly global community of researchers and practitioners new technologies and communication means have made the transfer of policies from one country or region to another progressively more prevalent There has been a lot of attention in the field of public administration paid to policy transfer and institutional transplantation This book aims to create a better understanding of such transfers in the water management sector These include the adoption of modern water management concepts such as integrated water resources management and forms of water governance which are strongly promoted and sometimes also imposed by various international organizations Transfers also occur within the scope of development aid or for the purpose of creating business opportunities In addition many research organisations consultancies and governmental agencies are involved in cross border work The purpose of this book is therefore to present practical examples of the transfer of modern water management from one locality to another and to critically discuss the transferability of policy and governance concepts by analysing the contextual needs and factors Case studies are included from North America Europe the Middle East and Asia It is argued

that in many cases context matters in water management and that there is no panacea or universal concept that can be applied to all countries or regions with different political economic cultural and technological contexts Yet it is also shown that some countries are facing pressing and similar water management issues that cut across national borders and hence the transfer of knowledge may be beneficial **Green Technologies: Concepts, Methodologies, Tools and Applications**

water in West Asia and North Africa ,2006 This study of the potential to use saline water for irrigation in Egypt Jordan Syria and Tunisia concludes that it is technically feasible but its economic viability remains to be established Expert opinion suggests that saline irrigated agriculture is most likely to succeed in the West Asia North Africa region as a complement to small scale mixed livestock and cropping farming systems Precise quantification of the available saline water resources is not possible because of the lack of hard data As a result precise quantification of the likely impact of introducing saline irrigated agriculture on poverty alleviation and food security is also impossible although anecdotal evidence suggests that this would be positive The report argues that the environmental effects of saline irrigated agriculture both positive and negative need to be integrated into policies and decisions on the use of saline water Uses other than agricultural for example amenity uses industrial landscaping carbon sequestration or biomass production for energy also need to be considered and may be more socially and economically beneficial The United Nations World Water Development Report Cosgrove, Catherine E.,Cosgrove, William J.,UNESCO World Water Assessment Programme,2012-12-31 Sustainable Development: National Aspirations, Local Implementation Alan Terry,2016-04-01 Using case studies from Africa South America Asia and the Caribbean this book examines the progress made in uniting national aspirations of sustainable development strategies with their local implementation Comparing the situation on the ground with formal national environmental action plans the book compares progress or the lack of progress between different sectors cultures regions and resources throughout the developing world It examines whether local knowledge and actions are undermining national aspirations or whether they are being ignored at the national level with detrimental consequences to sustainable development The measurement of sustainable development the role of formal and informal education in sustainable development and the significance of diverse voices in the practice of sustainable development are considered The book draws lessons from those cases which appear to be experiencing positive moves towards sustainability and examines whether common frameworks exist which suggest that good practice may be transferable from one milieu to another Climate Change, Justice and Sustainability Ottmar Edenhofer,Johannes Wallacher,Hermann Lotze-Campen,Michael Reder,Brigitte Knopf,Johannes Müller,2012-06-25 Analysing and synthesising vast data sets from a multitude of disciplines including climate science economics hydrology and

agricultural research this volume seeks new methods of combining climate change mitigation adaptation development and poverty reduction in ways that are effective efficient and equitable A guiding principle of the project is that new alliances of state and non state sector partners are urgently required to establish cooperative responses to the threats posed by climate change This volume offers a vital policy framework for linking our response to this change with progressive principles of global justice and sustainable development Sustainable Cities Mélanie Robertson,2012 4 Healthy sustainable and culturally appropriate living and working environments Domestic pig production in Malika Senegal⁵ Housing for the urban poor through informal providers Dhaka Bangladesh 6 Socio spatial tensions and interactions An ethnography of the condominium housing of Addis Ababa Ethiopia 7 Partnership modalities for the management of drinking water in poor urban neighbourhoods The example of Kinshasa Democratic Republic of Congo 8 Rethink reuse Improving collective action capacity regarding solid waste management and income generation in Koh Kred Thailand *Tank Irrigation of Dry Zones in India* Sebak Kumar Jana,2014-01-01 Irrigation plays a vital role in improving the yield or productivity in the agricultural sector and the impact of irrigation on reducing poverty is striking Among the irrigation sources tank irrigation is considered important in the dry zones as it can play a very critical role in the sustainable irrigation development in these areas Tank irrigation has various advantages viz tanks can have a wider geological distribution than large scale projects tank investments tend to be less capital intensive tanks have fewer negative environmental impacts and tanks can provide a variety of livelihood options to the rural people Tank irrigation is getting importance currently in the context of climate change and declining ground water table In spite of these advantages tank irrigation has declined in almost all states in India over the years Causes of a decline in tank irrigation include weakening community co operation and budget constraints There is an urgent need of policy focus for the development of tank irrigation The present book highlights the problems and prospects of tank irrigation in the zones in West Bengal The study is based on the primary survey carried out on 181 tanks in the three districts of West Bengal The book is an outcome of a research project sponsored by ICSSR New Delhi
