Burying Mao Richard Baum, 2018-06-05 For almost two decades after Mao Zedong's death an epic no holds barred contest was waged in China between orthodox Marxists and reformers With Deng Xiaoping's strong support the reformers

ultimately won but they and China paid a heavy price Here Richard Baum provides a lively comprehensive guide to the intricate theater of post Mao Chinese politics He tells the intriguing story of an escalating intergenerational clash of ideas and values between the aging revolutionaries of the Maoist era and their younger more pragmatic successors Baum deftly analyzes the anatomy of the reformers ultimate victory in his brilliant reconstruction of the twists and turns of the reform process

Local Environmental Politics in China Genia Kostka, 2017-07-05 Knowledge and insight in national environmental governance in China is widespread However increasingly it has been acknowledged that the major problems in guiding the Chinese economy and society towards sustainability are to be found at the local level This book illuminates the fast changing dynamics of local environmental politics in China a topic only marginally addressed in the literature In the course of building up an institutional framework for environmental governance over the last decade local actors have generated a variety of policy innovations and experiments In large measure these are creative responses to two main challenges associated with translating national environmental policies into local realities The first such challenge is a policy implementation gap stemming from the absence of the state capacity necessary to the implementation of environmental measures The second challenge refers to the need for local non state actors to engage in environmental management oftentimes such a participation gap contributes to implementation failures In recent years we have seen a multitude of initiatives within China at the provincial level and below designed to bridge both gaps Hence the central aim of this book is to assess these experiments and innovations in local environmental politics This book was originally published as a special issue of the Journal of Environmental Policy and Planning

China and India in the Age of Globalization Shalendra D. Sharma, 2009-07-20 This book explores how the interplay of socio historical political and economic forces has transformed China and India into economic powerhouses

Chinese Politics Peter Gries, Daniel Lynch, Stanley Rosen, 2010-01-28 Written by a team of leading China scholars this text interrogates the dynamics of state power and legitimation in 21st Century China Despite the continuing economic successes and rising international prestige of China there has been increasing social protests over corruption land seizures environmental concerns and homeowner movements Such political contestation

presents an opportunity to explore the changes occurring in China today what are the goals of political contestation how are Chinese Communist Party leaders legitimizing their rule who are the specific actors involved in contesting state legitimacy today and what are the implications of changing state society relations for the future viability of the People's Republic Key subjects covered include the legitimacy of the Communist Party internet censorship ethnic resistance rural and urban contention nationalism youth culture labour relations Chinese Politics is an essential read for all students and scholars of contemporary China as well as those interested in the dynamics of political and social change Unstately Power Lynn T. White, 1998 Inflation and Investment Controls in China Yasheng Huang, 1999-11-13 How has the Chinese central government been able to avoid the crippling hyperinflation that has bedeviled so many developing and centrally planned economies China's unique de facto federalism Huang argues a combination of economic and fiscal decentralization and strong political centralization has spurred economic growth and allowed political institutions to impose restraints on inflation from the top down Focusing on central local relations and the controlling role of political institutions Yasheng Huang explains why local Chinese officials comply even against their own economic interests with the investment reduction and inflation control policies of the central government Drawing upon institutional economics he hypothesizes that the central government's powerful role in appointing and firing bureaucrats at the local level helps to reconcile some of the central local economic policy differences Huang uses systematic data analysis to test this proposition This book also offers detailed descriptions of the roles of local governments in economic and investment management China's Governance Model Hongyi Lai, 2016-06-10 Many studies of government in China either simply describe the political institutions or else focus critically on the weaknesses of the system such as corruption or the absence of Western style democracy Authors of these studies fail to appreciate the surprising ability of China's government to rapidly transform a once impoverished economy and to recover from numerous crises from 1978 to the present This book on the other hand takes a more balanced more positive view This view is based on a study of changes in China's institutions for coping with critical crises in governance since 1978 These changes include better management of leadership succession better crisis management improved social welfare the management of society through treating different social groups differently depending on their potential to rival the Party state and a variety of limited intra party and grassroots democracy This book applies to the Chinese model the term pragmatic authoritarianism It explains changes to and the likely future direction of China's governance model It compares current risks in China's governance with threats that terminated dynasties and the republic in China over the past four thousand years and concludes that the regime can be expected to survive a considerable period despite its existing flaws Few topics in Chinese politics are as significant as the nature state and prospects of the political regime While the topic had been unduly understudied for a long period of time a young generation of scholars has emerged on this subject Among others the book by Hongyi Lai stands out and provides a comprehensive and penetrating analysis on this topic I am confident that his

book will make a significant contribution to the study of Chinese politics and may well define the debate on China's political development governance and model for years to come Yongnian Zheng Director East Asian Institute National University of Singapore **China after Jiang** Gang Lin,Xiaoyuan Liu,Xiaobo Hu,2003 One of the first evaluations of China's leadership transition with Jiang Zemin's 2002 retirement as Communist Party chief this book probes the country's related institutional transitions both those under way and those still needed if China is to remain stable and prosperous in the 21st century

The Politics of Financing Education in China T. Lin,2013-04-23 Tingjin Lin explores the conflict between self interest and the provision of equality of opportunity facing educators in China Provincial leaders prove reluctant to equalize education when doing so means sacrificing their future promotion Explaining Chinese Democratization Shaohua Hu,2000-01-30 Hu seeks to explain China's failure to establish a democratic system He demonstrates both continuity and change in China's democratization process Modern China regards power and wealth as primary goals and treats a strong state as a major means to these ends Such a preference puts democracy on a back burner Employing a theoretical framework which consists of five factors historical legacies local forces the world system socialist values and economic development Hu shows that while all of these factors were at work in all eras each assumes a special significance in a particular period Traditional China before the 1911 Revolution attempted to adjust itself to a new Western dominated world In the Republican era the control of local forces topped the political agenda Nationalist China sought to survive and develop in the world system while Maoist China set for itself the task of building a socialist state And of course economic development has been the priority of the Deng era As Hu shows these five factors have had determining impacts on the long struggle for democracy in China

Andeweg,Robert Elgie,Ludger Helms,Juliet Kaarbo,Ferdinand Müller-Rommel,2020-07-30 Political executives have been at the centre of public and scholarly attention long before the inception of modern political science In the contemporary world political executives have come to dominate the political stage in many democratic and autocratic regimes The Oxford Handbook of Political Executives marks the definitive reference work in this field Edited and written by a team of world class scholars it combines substantive stocktaking with setting new agendas for the next generation of political executive research *Elite Dualism and Leadership Selection in China* Xiaowei Zang,2004-03-01 Who are the top political leaders in China What are the major

criteria in elite recruitment How is job promotion in high politics determined By studying over one and a half thousand top political Chinese leaders this book seeks to answer these questions and as a result defines how Chinese leadership is stratified Unlike existing research on Chinese leaders *Elite Dualism and Leadership Selection in China* draws on extensive statistical information and data analysis It evidences how political development in the reform era has led to the division of labour between the Chinese Communist Party CCP and the government in governance leading to two distinctive career paths in the two political systems respectively Key issues examined include the different criteria the CCP and the government demand the requirements for promotion the effect of university education on the rate of mobility the different affiliations of the two groups the role of cooptation in leadership selection Many of the elites discussed are still leading figures in China making this book the most up to date and extensive biographical data set in elite studies This allows for a meaningful analysis of elite behaviour in China for the first time in Chinese Studies This book will be useful to both students of Chinese studies and comparative politics and will also interest researchers political commentators statesmen and China watchers

State, Market, and Bureau-contracting in Reform China Yuen Yuen Ang, 2009 Why and how has China succeeded as a developmental state despite a seemingly rents ridden bureaucracy Following conventional wisdom Weberian bureaucracies are an institutional precondition for development especially in interventionist states like China However my research finds that China's fast growing economy has not been governed by a purely salaried civil service Instead Chinese bureaucracies still remain partially prebendal at every level of government each office systematically appropriates authority to generate income for itself My study unravels the paradox of developmentalism without Weberianness by illuminating China's unique path of bureaucratic adaptation in the reform era labeled as bureau contracting where contracting takes place within the state bureaucracy In a bureau contracting structure the state at each level contracts the tasks of governance to its own bureaucracies assigning them revenue making privileges and property rights over income earned in exchange for services rendered Contrasting previous emphases on the prevalence of illicit corruption in China my study shows how and why bureaucracies in this context are actually authorized by the state to profit from public office Specifically I identify two factors that constrain arbitrary and excessively predatory behavior among Chinese bureaucracies first mechanisms of rents management and second the mediation of narrow departmental interests by local developmental incentives In short I argue that it is the combination of an incentive compatible fiscal design and increasingly sophisticated instruments of oversight that have sustained an otherwise unorthodox structure of governance in China In a phrase bureau contracting presents a high powered but opportunistic alternative to the Weberian ideal type The Chinese experience suggests that market compatible bureaucratic institutions need not necessarily conform to and may even diverge significantly from standard Western models at least at early stages of development My research draws on interviews with 165 cadres across different regions and governmental sectors as well as statistical analysis of previously unavailable budget data

Coalitions of the Weak Victor C.
