Doka, 2014-05-01 Historically AIDS is just one of a series of dreaded diseases that have aroused both great fear and irrational actions The previous diseases including bubonic plague syphilis tuberculosis leprosy and cancer have evoked such a sense of dread that rational moves to halt the disease have become compromised This text examines the deep sense of fear that AIDS evokes stigmatizing those who suffer from the disease as well as their families and caregivers Until AIDS can be seen for what it actually is a life threatening disease policies providing for humane treatment will not evolve The book also emphasizes that diseases are more than biological phenomena or individual catastrophes they are profoundly social events The ways in which diseases are spread and treated are strongly influenced by larger sociological considerations and they may have the capacity to change social institutions or society itself Rooting Aids In The History Of Diseases The First Part Of The book reviews the nature history and responses of earlier dreaded diseases The next section examines AIDS itself proposed as the archetypal dreaded disease Already creating a sense of panic AIDS is also shown to be a social disease likely to have significant effects on the social order Thus only by containing the epidemic of fear and controlling the resulting irrationality can the AIDS epidemic be halted *Counting Our Losses* Darcy L. Harris, 2011-01-19 This text is a valuable resource for clinicians who work with clients dealing with non death nonfinite and ambiguous losses in their lives It explores adjustment to change transition and loss from the perspective of the latest thinking in bereavement theory and research The specific and unique aspects of different types of loss are discussed such as infertility aging chronic illnesses and degenerative conditions divorce and separation immigration adoption loss of beliefs and loss of employment Harris and the contributing authors consider these from an experiential perspective rather than a developmental one in order to focus on the key elements of each loss as it may be experienced at any point in the lifespan Concepts related to adaptation and coping with loss such as resilience hardiness meaning making and the assumptive world transcendence and post traumatic growth are considered as part of the integration of loss into everyday life experience **Dealing with Dying, Death, and Grief during Adolescence** David E. Balk, 2014-02-18 For some life s introduction to death and grief comes early and when it does it can take many forms Not only does *Dealing with Dying Death and Grief during Adolescence* tackle them all it does so with David Balk s remarkable sensitivity to and deep knowledge of the pressures and opportunities adolescents face in their transition from childhood to adulthood In seamless jargon free language Balk brings readers up to date with what we know about adolescent development because over time such changes form the backstory we need to comprehend the impact of death and bereavement in an

adolescent's life The book's later chapters break down the recent findings in the study of life threatening illness and bereavement during adolescence And crucially these chapters also examine interventions that assist adolescents coping with these difficulties Clinicians will come away from this book with both a grounded understanding of adolescent development and the adolescent experience of death and they'll also gain specific tools for helping adolescents cope with death and grief on their own terms For any clinician committed to supporting adolescents facing some of life's most difficult experiences this integrated up to date and deeply insightful text is simply the book to have David E Balk is professor in the department of health and nutrition sciences at Brooklyn College CUNY where he directs the graduate program in thanatology He is the author of Adolescent Development Early Through Late Adolescence Helping the Bereaved College Student and several other books on death and bereavement He is also co editor of the 2nd edition of the Handbook of Thanatology Routledge 2013
