**Turnaround Challenge** Michael Blowfield, Leo Johnson, 2013-09-13 Do we have the rights to optimism Can capitalism deliver a next great wave of growth The future wrote William Gibson is already here It just isn't evenly distributed yet Lucid and polemical Turnaround Challenge is a dig into that future and its meaning for business It dissects the nexus of social economic environmental and governance crises confronting us and a series of colliding megatrends with the potential to reshape opportunities for growth Three cities of the future are emerging The first is Petropolis the alluringly familiar but decreasingly resilient city locked into the century old technologies of fossil fuel driven mass production This is the city of rising inequality credit fuelled consumption offshored jobs climate volatility and unsustainable household and national debt The second city is Cyburbia This is mass production on the steroids

of IT the latest manifestation of science fictions city without pain but one inhabited by voice activated popcorn dispensers of athletics shoes with in built Twitter feeds of sensor packed and censoring glass towers that risk reducing their citizens to digital factors of production in the supply chain of big data The third is the Distributed City where technology is deployed with the intent to connect us not virtually but physically from Nairobi s network of innovation spaces to Hamburg s Participatory Budgeting experiments from Barcelona s network for micro manufacturing to Austin s distributed smart grid These are the cities of society s future and they have very different implications for business success and our ability to navigate the social economic and environmental megatrends that confront us Blowfield and Johnson present the DNA of the winners of the future high growth and disruptive businesses emerging from the bottom up and with the capacity to tackle society s biggest challenges head on

Radical Change in Everyday Life Thomas Druyen, 2019-03-28 This volume deals with a key concept concerning the future change It is omnipresent and yet is

often only perceived in retrospect The book's editor and founder of Psychological Future Management argues that we are currently experiencing the beginning of the most radical and profound change in human history This is the right moment to analyze people's ability to change more precisely In this first representative study Germany was chosen as an example The results serve as a basis for further psychological sociological and prospective considerations The Germans obviously have great resilience and problem solving competence At the same time however they are one sidedly fixated on maintaining the economic status quo and fear negative changes in the future Their social milieus are permeated by contradictions The wealthy in particular are tied to security concerns and are therefore unwilling to experiment and take risks two qualities without which a future in times of exponential change can hardly be managed What could other countries and societies learn from these descriptions of the current state of one of the world's leading countries The entire subject revolves around this question The psychological effects of digitization and artificial intelligence also play a role as they put our neuronal and emotional habits under enormous pressure How can we improve our future competence and learn to adapt new knowledge more quickly and continuously Against this background the phenomenon of change will be examined and discussed from various national and international perspectives
