Oxford Handbook of Transformations of the State Stephan Leibfried, Evelyne Huber, Matthew Lange, Jonah D. Levy, Frank Nullmeier, John D. Stephens, 2015 This Handbook offers a comprehensive treatment of transformations of the state from its origins in different parts of the world and different time periods to its transformations since World War II in the advanced industrial countries the post Communist world and the Global South Leading experts in their fields from Europe and North America discuss conceptualizations and theories of the state and the transformations of the state in its engagement with a changing international environment as well as with changing domestic economic social and political challenges The Handbook covers different types of states in the Global South from failed to predatory rentier and developmental in different kinds of advanced industrial political economies corporatist statist liberal import substitution industrialization and in various post Communist countries Russia China successor states to the USSR and Eastern Europe It also addresses crucial challenges in different areas of state intervention from security to financial regulation migration welfare states democratization and quality of democracy ethno nationalism and human development The volume makes a compelling case that far from losing its relevance in the face of globalization the state remains a key actor in all areas of social and economic life changing its areas of intervention its modes of operation and its structures in adaption to new international and domestic challenges

The Communist Youth League and the Transformation of the Soviet Union, 1917-1932 Matthias Neumann, 2012-05-23 The study of Soviet youth has long lagged behind the comprehensive research conducted on Western European youth culture In an era that saw the emergence of youth movements of all sorts across Europe the Soviet Komsomol was the first state sponsored youth organization in the first communist country Born out of an autonomous youth movement that emerged in 1917 the Komsomol eventually became the last link in a chain of Soviet socializing agencies which organized the young Based on extensive archival research and building upon recent research on Soviet youth this book broadens our understanding of the social and political dimension of Komsomol membership during the momentous period 1917 1932 It sheds light on the complicated interchange between ideology policy and reality in the league s evolution highlighting the important role ordinary members played The transformation of the country shaped Komsomol members and their league s social identity institutional structure and social psychology and vice versa the organization itself became a crucial force in the dramatic changes of that time The book investigates the complex dialogue between the Communist Youth League and the regime unravelling the intricate process that transformed the Komsomol into a mere institution for political socialization serving the regime s quest for social engineering and control

The Hypergeometric Approach to Integral Transforms and Convolutions S.B. Yakubovich, Yury Luchko, 2012-12-06 The aim of this book is to develop a new approach which we called the hyper geometric one to the theory of various integral transforms convolutions and their applications to solutions of integro differential equations operational calculus and evaluation of integrals We hope that this simple approach which will be explained below allows students post graduates in mathematics physicists and

technicians and serious mathematicians and researchers to find in this book new interesting results in the theory of integral transforms special functions and convolutions The idea of this approach can be found in various papers of many authors but systematic discussion and development is realized in this book for the first time Let us explain briefly the basic points of this approach As it is known in the theory of special functions and its applications the hypergeometric functions play the main role Besides known elementary functions this class includes the Gauss s Bessel s Kummer s functions et c In general case the hypergeometric functions are defined as a linear combinations of the Mellin Barnes integrals These ques tions are extensively discussed in Chapter 1 Moreover the Mellin Barnes type integrals can be understood as an inversion Mellin transform from the quotient of products of Euler s gamma functions Thus we are led to the general construc tions like the Meijer s G function and the Fox s H function

The Kernel Function and Conformal Mapping Stefan Bergman,1950-03 The Kernel Function and Conformal Mapping by Stefan Bergman is a revised edition of The Kernel Function The author has made extensive changes in the original volume The present book will be of interest not only to mathematicians but also to engineers physicists and computer scientists The applications of orthogonal functions in solving boundary value problems and conformal mappings onto canonical domains are discussed and publications are indicated where programs for carrying out numerical work using high speed computers can be found The unification of methods in the theory of functions of one and several complex variables is one of the purposes of introducing the kernel function and the domains with a distinguished boundary This approach has been extensively developed during the last two decades This second edition of Professor Bergman s book reviews this branch of the theory including recent developments not dealt with in the first edition The presentation of the topics is simple and presupposes only knowledge of an elementary course in the theory of analytic functions of one variable

The Capitalist Transformation of State Socialism David Lane,2013-11-20 David Lane outlines succinctly yet comprehensively the development and transformation of state socialism While focussing on Russia and the countries of Eastern Europe he also engages in a discussion of the Chinese path In response to the changing social structure and external demands he outlines different scenarios of reform He contends that European state socialism did not collapse but was consciously dismantled He brings out the West s decisive support of the reform process and Gorbachev s significant role in tipping the balance of political forces in favour of an emergent ascendant class In the post socialist period he details developments in the economy and politics He distinguishes different political and economic trajectories of countries of the former USSR the New Member States of the European Union and China and he notes the attempts to promote further change through coloured revolutions The book provides a detailed account not only of the unequal impact of transformation on social inequality which has given rise to a privileged business and political class but also how far the changes have fulfilled the promise of democracy promotion wealth creation and human development Finally in the context of globalisation the author considers possible future political and economic developments for Russia and China Throughout the

author a leading expert in the field brings to bear his deep knowledge of socialist countries draws on his research on the former Soviet Union and visits to nearly all the former state socialist countries including China

The Earth as Transformed by Human Action B. L. Turner, William C. Clark, Robert W. Kates, John F. Richards, Jessica T. Mathews, William B. Meyer, 1993-01-29 The Earth as Transformed by Human Action is the culmination of a mammoth undertaking involving the examination of the toll our continual strides forward technical and social take on our world The purpose of such a study is to document the changes in the biosphere that have taken place over the last 300 years to contrast global patterns of change to those appearing on a regional level and to explain the major human forces that have driven these changes The first section deals strictly with the major human forces of the past 300 years and the second is a detailed account of the transformations of the global environment wrought by human action The final section examines a range of perspectives and theories that purport to explain human actions with regard to the biosphere

Transforms Semen B. Yakubovich, 1996 This book deals with the theory and some applications of integral transforms that involve integration with respect to an index or parameter of a special function of hypergeometric type as the kernel index transforms The basic index transforms are considered such as the Kontorovich Lebedev transform the Mehler Fock transform the Olevskii Transform and the Lebedev Skalskaya transforms The p theory of index transforms is discussed and new index transforms and convolution constructions are demonstrated For the first time the essentially multidimensional Kontorovich Lebedev transform is announced General index transform formulae are obtained The connection between the multidimensional index kernels and G and H functions of several variables is presented The book is self contained and includes a list of symbols with definitions author and subject indices and an up to date bibliography This work will be of interest to researchers and graduate students in the mathematical and physical sciences whose work involves integral transforms and special functions

The Political Economy of Central Banking in Emerging Economies Mustafa Yağcı, 2020-09-03 Since the start of the Global Financial Crisis in 2008 research on central banking has gained momentum due to unusual levels of central bank activism and unconventional monetary policy measures in many countries While these policies drew significant attention to advanced economy central banks there has been much less academic focus on central banking in emerging economies This book extends the research on the political economy of central banking by focusing on the emerging economies in Asia Africa Latin America and the European periphery Central banks are at the heart of economic policymaking and their decisions have a significant impact on the social and economic well being of citizens Adopting an interdisciplinary political economy perspective the contributions in this book explore the reciprocal relations between politics economics and central banks and how the global and domestic political economy contexts influence central bank practices The chapters employ diverse theoretical perspectives such as institutional and organizational theory developmental state resource dependency and gender studies drawing on disciplines ranging from politics international relations public policy

Dynkin,1963-12-31 Agricultural Transformation, Food and Environment Henry Buller,Keith Hoggart,2017-10-19 This title was first published in 2001 An interdisciplinary team of leading European scholars bring together case studies from Western and Eastern Europe to illustrate and critically analyze the shifting relationships of agricultural environmental and food policy in Europe In the most comprehensive book of its kind it examines the critical changes both in agricultural environmental and food politics and the way these domains have been investigated by European social scientists The book evaluates specific changes focussing in particular on agricultural restructuring in the face of globalization Europeanization and the collapse of the Soviet model of agricultural organization agriculture environmental relations and consumer preferences Beginning by examining the degree to which Europe offers a unique and identifiable rural experience the book includes a critical re examination of the process of agricultural transformation In the light of contemporary events and the over seductive and essentially mythical notion of post productivism **Reexamining Economic and Political Reforms in Russia,**

1985-2000 Vladimir Gel'man,Dmitry Travin,Otar Marganiya,2014-06-25 Reexamining Economic and Political Reforms in Russia 1985 2000 Generations Ideas and Changes analyzes the impact of generational changes and ideational changes on major political and economic reforms conducted in Russia during the late twentieth century This book examines how the policy agenda was shaped by the ideas of the generations representatives for the sixtiers and seventiers Representatives of the generation of sixtiers conducted reforms from 1985 to 1991 and invested major efforts in political liberalization but did not pay enough attention to economic reforms On the other hand the reformers from the generation of seventiers who were in charge of policy making from 1991 to 1998 were genuinely oriented toward market building but rather insensitive to the democratization of the political regime This book explores how these differences in ideational agendas produced inconsistent and controversial outcomes from both stages of reforms
