Russian Aircraft Since 1940

John Erickson

Russian Aircraft Since 1940:

Russian Aircraft Since 1940 Jean Alexander, 1975 *Russian Aviation and Air Power in the Twentieth Century* John Greenwood, Von Hardesty, Robin Higham, 2014-06-11 In the light of new archival material the editors take a fresh look at Russian aviation in the twentieth century Presenting a comprehensive view of Russian aviation from its genesis in the late czarist period to the present era the approach is essentially chronological with a major emphasis on the evolution of military aviation The contributions are diverse with appropriate attention to civilian and institutional themes

Soviet Air Power Kenneth Whiting, 2020-01-29 This comprehensive examination of Soviet air power analyzes the three branches of the USSR Military Air Forces Frontal Aviation Long Range Aviation and Military Air Transport and Naval Aviation and the National Air Defense emphasizing World War II and postwar developments

Early Jet Fighters, 1944-1954 Leo Marriott, 2020-03-30 A clearly written profusely illustrated and well organized volume on Soviet and European jet fighter design Air Power History In his previous book on early jet fighters Leo Marriott traced the history of the revolutionary aircraft produced by the British and Americans immediately after the Second World War Now in this companion volume he describes jet fighter development on the continent of Europe and in the Soviet Union during the same remarkable period Using over 200 archive photographs he covers the pioneering German designs then the range of experimental and operational fighters constructed by the Soviets the French and the Swedes The sheer variety of the designs that manufacturers came up with during this short intense period of innovation make for fascinating reading Several of the most famous jet fighters feature prominently in the rare photographs and are analyzed in the expert text including the Messerschmitt Me 262 the Heinkel He 162 the MiGs 15 17 and 19 the Dassault Ouragan and the Saab J29 But perhaps the most rewarding aspect of the book is its record of experimental projects testing new concepts that rapidly became established elements of jet aircraft design The photographs of these largely forgotten aircraft give us an insight into the extraordinary technical challenges and the ambition and inventiveness of the designers and manufacturers who overcame them

Early Jet Bombers, 1944-1954 Leo Marriott, 2020-01-19 The author of *Early Jet Fighters 1944-1954* turns his attention to jet bombers in another stunning pictorial history Don't miss out on this one IPMS USA Using over 200 archive photographs Leo Marriott gives us a powerful portrait of the first decade in the development of the jet bomber This was a time of intense technical innovation that transformed the design and capabilities of the bomber and gave birth to a range of classic military aircraft in the USA Great Britain France and the Soviet Union The photographs take the story from the earliest jet bombers constructed in Germany toward the end of the Second World War to the successful designs both sides depended on through the first phase of the Cold War The pace of development was rapid and remarkable from initial prototypes built in Germany the Arado 234 and the Junkers Ju 287 to the fleets of advanced jet bombers like the British Canberra and V bombers the American B 47 and B 52 and the Soviet Il 28 Beagle and Tu 16 Badger The images of the prototypes give a fascinating insight into the extraordinary technical challenges and the ambition and

inventiveness of the designers and manufacturers who overcame them Excellent coverage of a lesser known aspect of airpower development the wealth of photos makes it enjoyable and interesting Air Power History [The Road To Berlin](#) John Erickson,2019-07-11 This book traces Russian campaigns from the counterattack at Stalingrad to the fall of Berlin and the capture of Prague It explores in detail Stalin s wartime relations with Roosevelt and Churchill and examines the evolution of his policies toward Poland and the Balkans [World War II in Europe](#) David T. Zabecki,2015-05-01 World War II defined the 20th century and shaped many events from the decolonization of Africa to the rise and fall of the Berlin Wall This encyclopedia offers a focused overview of this complex and volatile era the circumstances that led up to war the underlying causes its unfolding and consequences Organized for quick and precise access More than 1300 entries by 150 experts are arranged in six sections for easy reference and consultation All the key ideas events actions weapons individuals and organizations that played vital roles in the war are covered from the Axis Pact to the Arab League from the OSS to the Africa Korps from the Chetniks to the Jedburghs from the battle of Kursk to Operation Mincemeat from Bill Donovan to Otto Skorzeny from Gestapo to SMERSH from Georgi Zhukov to Jean Leclerc from the 88 gun to the Norden Bombsight Covers important neglected subjects The Encyclopedia puts special emphasis on the often neglected operations in Eastern Europe and Russia A key section inspects and rates all the major weapons with handy tables for easy comparison And in recognition of the first large scale participation of women in the war the volume thoroughly documents their individual and unit contributions to the Allied effort Finally the encyclopedia discusses battlefield realities that explain for example why the airborne drops at Normandy succeeded and the ones at Arnheim failed A bibliography glossary maps photographs and weapons and data tables enhance the coverage Also includes 16 maps [Stalin's War with Germany: The road to Berlin](#) John Erickson,1999-01-01 Completing the most comprehensive and authoritative study ever written of the Soviet German war Erickson presents the vivid and compelling story of the Red Army s epic struggle to drive the Germans from Russian soil [Air Power in the Nuclear Age, 1945-82](#) M.J. Armitage,R. A. Mason,1983-06-18 [Reader's Guide to Military History](#) Charles Messenger,2013-10-31 This book contains some 600 entries on a range of topics from ancient Chinese warfare to late 20th century intervention operations Designed for a wide variety of users it encompasses general reviews of aspects of military organization and science as well as specific wars and conflicts The book examines naval and air warfare as well as significant individuals including commanders theorists and war leaders Each entry includes a listing of additional publications on the topic accompanied by an article discussing these publications with reference to their particular emphases strengths and limitations **Air Power in the Nuclear Age, 1945-84** M.J. Armitage,R. A. Mason,1985-09-20 **Flying Magazine** ,1955-11 [Proceedings of the United States Naval Institute](#) United States Naval Institute,1976 **The History of Air Intercept Radar & the British Nightfighter 1935-1959** Ian White,2007-05-30 This detailed history of Air Intercept radar traces the development of this vital military technology with the Royal Air Force during WWII In the years after World

War I the United Kingdom was desperate to develop some form of protection from an enemy air strike As early as 1923 the British Army had devised sound mirrors that could detect aircraft up to twelve miles away This technical history traces the development of military radar technology from this early experimental phase to the creation of the first air to air radar systems and their uses in battle Historian Ian White sets this fascinating narrative within the larger political military economic and technological context of the era Through World War II Air Intercept radar was a vital asset in protecting RAF bomber forces as well as the country itself But developing the technology required the tireless work of physicists and engineers in the Air Ministry Research Establishment particularly members of the Establishment s Airborne Group working under Dr Edward Bowen Their Airborne Interception radars such as the AI Mk IV were used in Blenheim night fighters during the winter Blitz and by Mosquito during the Baedeker Raids This in depth history covers the introduction of centimetric technology at the Telecommunications Research Establishment the creation of centimetric AI and their installation in the Beaufighter and later marks of the Mosquito It describes the creation of the Radiation Laboratory at MIT and concludes with a section on further developments during the Cold War

WORLD WAR TWO SEA WAR Donald A. Bertke, Gordon Smith, Don Kindell, 2011-03-01 Dag til dag begivenheder prim rt til s s august 1939 til om med marts 1940 opf rt i tabelform for forskellige farvandsafsnit Indeholder ogs opsummeringer
