**Narratives of Nothing in 20th-Century Literature** Meghan Vicks, 2017-04-20 The concept of nothing was an enduring concern of the 20th century As Martin Heidegger and Jean Paul Sartre each positioned nothing as inseparable from the human condition and essential to the creation or operation of human existence as Jacques Derrida demonstrated how all structures are built upon a nothing within the structure and as mathematicians argued that zero the number that is also not a number allows for the creation of our modern mathematical system Narratives of Nothing in 20th Century Literature suggests that nothing itself enables the act of narration Focusing on the literary works of Vladimir Nabokov Samuel Beckett and Victor Pelevin Meghan Vicks traces how and why these writers give narrative form to nothing demonstrating that nothing is essential to the creation of narrative that is how our perceptions are conditioned how we make meaning or madness out of the stuff of our existence how we craft our knowable selves and how we exist in language

**Russia's Carnival** Christoph Neidhart, 2003 This colorfully drawn and acutely observed book explores Russia by engaging all our senses Today's Russia smells different from the Soviet Union The country looks and sounds different its touch is different and its food tastes different Thus Christoph Neidhart argues Russia is truly a changed country from the Soviet Union it was little more than a decade ago Russian society is rapidly urbanizing and modernizing as can be perceived by all senses including the awareness of space and the conception of time After almost a century space can be privately owned and freely traded time too has become commodified New role models and new ways to express social status are emerging Russia has become a monetized economy as the old Soviet practice of provision by networking has grown obsolete Russia thus readies itself gradually to grow into a Western style middle class society with a free market and democratic polity The author assesses these rapid changes using the evocative metaphor of the carnival to understand the chaotic inversion of the Communist structure of society He explores the transition's traps and shortcomings such as the privatization of politics and the looting of the state's assets and compares this process to the modernization Western society underwent a century earlier

**Feminists Contest Politics and Philosophy** Lisa Nicole Gurley, Claudia Leeb, Anna Aloisia Moser, 2005 The color of the book's cover alludes to the time and context in which this important volume originated the 3rd Interdisciplinary Conference Celebrating International Women's Day at the New School for Social Research in New York City At that time orange alerts were issued by the United States to create a climate of fear and thereby stifle any critical debate of its foreign and domestic policy The feminist thinkers presented in this volume are alert that such a critique is needed They draw on the various languages of their fields to address wide ranging topics and key questions in feminist politics theory and philosophy They all confront the state of urgency concerning the role of women in all classes of society in all fields of research and the academy This unique collection ranges across disciplines as such the four major topics aesthetics and female representation love and psychoanalysis care and ethics the different understandings of

**A Museum Studies Approach to Heritage** Sheila Watson,Amy Jane Barnes,Katy Bunning,2018-10-08 Heritage s revival as a respected academic subject has in part resulted from an increased awareness and understanding of indigenous rights and non Western philosophies and practices and a growing respect for the intangible Heritage has thus far focused on management tourism and the traditionally heritage minded disciplines such as archaeology geography and social and cultural theory Widening the scope of international heritage studies A Museum Studies Approach to Heritage explores heritage through new areas of knowledge including emotion and affect the politics of dissent migration and intercultural and participatory dimensions of heritage Drawing on a range of disciplines and the best from established sources the book includes writing not typically recognised as

**Identities, Nations and Politics after Communism** Roger E. Kanet, 2013-10-18 This book focuses on questions of identity that have confronted the countries of Central and Eastern Europe after the collapse of the communist system that had previously provided them with an identity This development both facilitated and necessitated a reassessment of the now independent nations history orientation symbols and identity In some cases new states were created without a clear national identity while in others the nation was regaining statehood but not always within borders that had an historical association with the nation concerned The multiethnic character of the space of the former Soviet Union and its erstwhile satellites and the long historical legacy of complex relations boundary changes population migration and economic and social changes presented different challenges to the various nations and states concerned The essays in this volume attempt to elucidate and understand the issues of ethnic and national identity and their relationship to the emerging statehood in various regions of the post communist world This study makes clear that some nation states were far better prepared to handle these issues than others and that the longer term impact of the communist experience has varied This book was previously published as a special issue of Nationalities Papers

**Multiple Moralities and Religions in Post-Soviet Russia** Jarrett Zigon, 2011-09-01 In the post Soviet period morality became a debatable concept open to a multitude of expressions and performances From Russian Orthodoxy to Islam from shamanism to Protestantism religions of various kinds provided some of the first possible alternative moral discourses and practices after the end of the Soviet system This influence remains strong today Within the Russian context religion and morality intersect in such social domains as the relief of social suffering the interpretation of history the construction and reconstruction of traditions individual and social health and business practices The influence of religion is also apparent in the way in which the Russian Orthodox Church increasingly acts as the moral voice of the government The wide ranging topics in this ethnographically based volume show the broad religious influence on both discursive and everyday moralities The contributors reveal that although religion is a significant aspect of the various assemblages of morality much like in other parts of the world religion in postsocialist Russia cannot be separated from the political or economic or transnational institutional aspects of morality

Stalin as Warlord Alfred J. Rieber, 2022-01-01 An authoritative account of Stalin as a

wartime leader showing how his paradoxical policies of mass mobilization and repression affected all aspects of Soviet society A superb new history Rieber analyses with clarity the impact of the war Wendy Slater Times Literary Supplement The Second World War was the defining moment in the history of the Soviet Union With Stalin at the helm it emerged victorious at a huge economic and human cost But even before the fighting had ended Stalin began to turn against the architects of success In this original and comprehensive study Alfred J Rieber examines Stalin as a wartime leader arguing that his policies were profoundly paradoxical In preparation for the war Stalin mobilized the whole of Soviet society in pursuit of his military goals and intensified the centralization of his power Yet at the same time his use of terror weakened the forces vital to the defense of the country In his efforts to rebuild the country after the devastating losses and destruction he suppressed groups that had contributed immeasurably to victory His steady ruthless leadership cultivated a legacy that was to burden the Soviet Union and Russia to the present day

Television Beyond and Across the Iron Curtain Kirsten Bönker, Sven Grampp, Julia Obertreis, 2016-09-23 From the mid 1950s onwards the rise of television as a mass medium took place in many East and West European countries As the most influential mass medium of the Cold War television triggered new practices of consumption and media production and of communication and exchange on both sides of the Iron Curtain This volume leans on the long neglected fact that even during the Cold War era television could easily become a cross border matter As such it brings together transnational perspectives on convergence zones observations collaborations circulations and interdependencies between Eastern and Western television In particular the authors provide empirical ground to include socialist television within a European and global media history Historians and media cultural and literary scholars take interdisciplinary perspectives to focus on structures actors flow contents or the reception of cross border television Their contributions cover Albania the CSSR the GDR Russia and the Soviet Union Serbia Slovenia and Yugoslavia thus complementing Western dominated perspectives on Cold War mass media with a specific focus on the spaces and actors of East European communication Last but not least the volume takes a long term perspective crossing the fall of the Iron Curtain as many trends of the post socialist period are linked to or pick up socialist traditions

**Gender and Immigration** Gregory A. Kelson, Debra L. DeLaet, 1999-03 Women and men migrate across international boundaries at roughly the same rate Yet most scholarship assumes that international migration results primarily from the labor migration of male workers When international female migration is acknowledged the focus is almost exclusively on women in the low wage labor sector of the global economy Gender and Immigration challenges this outlook by examining the diverse and complex ways in which women in a variety of occupational and social categories experience international relocation Written by experts and policymakers in the field the timely essays collected here explore whether international migration provides women with opportunities for liberation from the subordinate gender roles of their countries of origin Or do migrant women face both traditional and new forms of subordination and discrimination in their host societies Exploring the experiences of a broad

range of women from unskilled workers on the U S Mexican border and Filipino mail order brides to Indian American motel owners Asian businesswomen and Russian immigrants to Israel Gender and Immigration offers a much needed corrective to the long standing invisibility of women in international migration research      Globalisation, Nation-Building and History Education Joseph Zajda, John Whitehouse, 2024-03-19 This book uses historiography and discourse analysis to provide a new insight into understanding the nexus between ideologies the state and nation building as depicted in history school textbooks It focuses on the interpretation of social and political change significant events and examining possible new biases and omissions in school textbooks The Europeanization of history textbooks in the EU is an example of western dominated Grand Narrative of pluralist democracy multiculturalism and human rights according to the canon of a particularly European dimension Various public debates in the USA China the Russian Federation RF Japan and elsewhere dealing with understandings of a nation building national identity and history education point out to parallels between the political significance of school history and the history education debates globally The book demonstrates that the issue of national identity and balanced representations of the past continue to dominate the debate surrounding the goals dominant ideologies and content of history textbooks and historical narratives It concludes that competing discourses and ideologies will continue to define and shape the nature and significance of historical knowledge ideologies and the direction of values education in history textbooks This book provides an easily accessible practical yet scholarly insights into local and global trends in the field of history education and should be required reading for a broad spectrum of users including policy makers academics graduate students education policy researchers administrators and practitioners
