Russian Revolution Problems In Civilization:

The Russian Revolution and Civil War 1917-1921 Jonathan Smele, 2006-04-15 The Russian Revolution and Civil War in the years 1917 to 1921 is one of the most widely studied periods in history It is also somewhat inevitably one that has generated a huge flow of literature in the decades that have passed since the events themselves However until now historians of the revolution have had no dedicated bibliography of the period and little claim to bibliographical control over the literature The Russian Revolution and Civil War 1917 1921 offers for the first time a comprehensive bibliographical guide to this crucial and fascinating period of history The Bibliography focuses on the key years of 1917 to 1921 starting with the February Revolution of 1917 and concluding with the 10th Party Congress of March 1921 and covers all the key events of the intervening years As such it identifies these crucial years as something more than simply the creation of a communist state Europe, 1890-1945 Stephen J. Lee, 2020-03-27 Europe 1890 1945 is a new approach to teaching and learning early twentieth century European history at A level It meets the needs of teachers and students studying for today's revised AS and A2 exams In a unique style Europe 1890 1945 focuses on the key topics within the period Each topic is then comprehensively explored to provide background information essay writing advice and examples source work and historical skills exercises From 1890 to 1945 the key topics featured include the origins and impact of the First World War the Russian Revolution and the rise of Stalin the Weimar Republic and the rise of Hitler Mussolini and Fascist Italy Stalin and the Soviet Union 1928 41 A History of Civilizations Fernand Braudel, 1995-04-01 Written from a consciously anti ethnocentric approach this fascinating work is a survey of the civilizations of the modern world in terms of the broad sweep and continuities of history rather than the event based technique of most other texts **The Russian Revolution of 1917 - Memory and Legacy** Carol S. Leonard, Daniel Orlovsky, Jurej Petrov, 2024-07-30 The way in which the Russian Revolution of October 1917 is regarded and commemorated has changed considerably over time and is a contentious subject well demonstrated by the absence of any official commemoration in Russia in 2017 a huge contrast to the very large celebrations which took place in Soviet times This book which brings together a range of leading historians of the Russian Revolution from both Russia and the West and both younger and older historians explores the changes in the way in which the October 1917 Revolution is commemorated and also examines fundamental questions about what the Russian Revolution indeed what any revolution was anyway Among the issues covered are how Soviet and Western historians diverged in their early assessments of what the Revolution achieved how the period studied by historians has recently extended both much earlier before 1917 and much later afterwards and how views of the Revolution within the Soviet Union changed over time from acceptance of the official Communist Party interpretation to more independent viewpoints Overall the book provides a major reassessment of one of the twentieth century's most important events *The Revolt Against Civilization* Lothrop Stoddard, 1922 Written by racist theorist Lothrop Stoddard this book advocates eugenics as a response to Communism Catalog of Copyright Entries. Rethinking the Russian Revolution as Historical Divide Matthias Neumann,Andy Willimott,2017-11-22 The Russian Revolution of 1917 has often been presented as a complete break with the past with everything which had gone before swept away and all aspects of politics economy and society reformed and made new Recently however historians have increasingly come to question this view discovering that Tsarist Russia was much more entangled in the processes of modernisation and that the new regime contained much more continuity than has previously been acknowledged This book presents new research findings on a range of different aspects of Russian society both showing how there was much change before 1917 and much continuity afterwards and also going beyond this to show that the new Soviet regime established in the 1920s with its vision of the New Soviet Person was in fact based on a complicated mixture of new Soviet thinking and ideas developed before 1917 by a variety of non Bolshevik movements

From Empire to Eurasia Sergey Glebov,2017-05-15 The Eurasianist movement was launched in the 1920s by a group of young Russian migr s who had recently emerged from years of fighting and destruction Drawing on the cultural fermentation of Russian modernism in the arts and literature as well as in politics and scholarship the movement sought to reimagine the former imperial space in the wake of Europe s Great War The Eurasianists argued that as an heir to the nomadic empires of the steppes Russia should follow a non European path of development In the context of rising Nazi and Soviet powers the Eurasianists rejected liberal democracy and sought alternatives to Communism and capitalism Deeply connected to the Russian cultural and scholarly milieus Eurasianism played a role in the articulation of the structuralist paradigm in interwar Europe However the movement was not as homogenous as its name may suggest Its founders disagreed on a range of issues and argued bitterly about what weight should be accorded to one or another idea in their

overall conception of Eurasia In this first English language history of the Eurasianist movement based on extensive archival research Sergey Glebov offers a historically grounded critique of the concept of Eurasia by interrogating the context in which it was first used to describe the former Russian Empire This definitive study will appeal to students and scholars of Russian and European history and culture
