Industrial Relations in China Bill Taylor, Kai Chang, Qi Li, 2003-01-01 This enlightening book provides the first systematic introduction to and exploration of the emerging system of industrial relations in China and draws on the authors extensive research and direct involvement in the developments taking place The authors argue that there are both unifying and fragmenting elements to the ongoing development of industrial relations but overall it is one in which the state continues to maintain a major and direct influence Divisions between workers and managers may be escalating with increased open conflicts but this book reveals that the picture is far more complex and contradictory than to assume that the solution is convergence with western style industrial relations systems They conclude that industrial relations institutions and processes still act within a political context and with the guiding hand of the Chinese Communist party

Consent and Control in the Authoritarian Workplace Martin Krzywdzinski, 2018-02-13 Today a large proportion of the world s states are under authoritarian governments These countries limit participation rights both in the political sphere and in the workplace At the same time they have to generate consent in the workplace in order to ensure social stability and prevent the escalation of conflicts But how do companies generate consent given that employee voice and interest

representation may be limited or entirely absent Based on a review of research literature from sociology organizational psychology and behavioural economics this book develops a theory of consent generation and distinguishes three groups of consent producing mechanisms socialization incentive mechanisms and participation and interest representation It presents an empirical analysis of how these mechanisms work in Russian and Chinese automotive factories and shows how socio cultural factors and labour regulation explain the differences between both countries regarding consent and control in the workplace The book contributes to two research debates First it examines the generation of consent in the workplace a core topic of the sociology of work and organization Its particular focus is on consent generation in authoritarian societies Secondly the book contributes to the debate about the reasons for the completely different trajectories of post communist Russia and China The book provides an empirical analysis that explains the different work behaviours of employees in both countries and links the micro level of the workplace and the macro level of institutions and organizational cultures
