The Russian Way of War Lester W. Grau, Charles K. Bartles, 2018 Force Structure Tactics and Modernization of the Russian Ground Forces The mighty Soviet Army is no more The feckless Russian Army that stumbled into Chechnya is no more Today's Russian Army is modern better manned better equipped and designed for maneuver combat under nuclear threatened conditions This is your source for the tactics equipment force structure and theoretical underpinnings of a major Eurasian power Here's what the experts are saying A superb baseline study for understanding how and why the modern Russian Army functions as it does Essential for specialist and generalist alike Colonel Ret David M Glantz foremost Western author on the Soviet Union in World War II and Editor of The Journal of Slavic Military Studies Congratulations to Les Grau and Chuck Bartles on filling a gap which has yawned steadily wider since the end of the USSR Their book addresses evolving Russian views on war including the blurring of its nature and levels and the consequent Russian approaches to the Ground Forces force structuring manning equipping and tactics Confidence is conferred on the validity of their arguments and conclusions by copious footnoting mostly from an

impressive array of primary sources. It is this firm grounding in Russian military writings coupled with the authors' understanding of war and the Russian way of thinking about it that imparts such an authoritative tone to this impressive work. Charles Dick, former Director of the Combat Studies Research Centre, Senior Fellow at the Defence Academy of the United Kingdom, author of the 1991 British Army Field Manual Volume 2, A Treatise on Soviet Operational Art, and author of *From Victory to Stalemate: The Western Front Summer 1944* and *From Defeat to Victory: The Eastern Front Summer 1944*. Dr Lester Grau's and Chuck Bartles' professional research on the Russian Armed Forces is widely read throughout the world and especially in Russia. Russia's Armed Forces have changed much since the large-scale reforms of 2008 which brought the Russian Army to the level of the world's other leading armies. The speed of reform combined with limited information about their core mechanisms represented a difficult challenge to the authors. They have done a great job and created a book which could be called an encyclopedia of the modern armed forces of Russia. They used their wisdom and talents to explore vital elements of the Russian military machine: the system of recruitment and training, structure of units of different levels, methods and tactics in defense and offense, and even such little-known fields as the Arctic forces and the latest Russian combat robotics. Dr Vadim Kozyulin, Professor of Military Science and Project Director, Project on Asian Security, Emerging Technologies and Global Security, Project PIR, Center Moscow. Probably the best book on the Russian Armed Forces published in North America during the past ten years. A must-read for all analysts and professionals following Russian affairs. A reliable account of the strong and weak aspects of the Russian Army. Provides the first look on what the Russian Ministry of Defense learned from best Western practices and then applied them on Russian soil. Ruslan Pukhov, Director of the Moscow-based Centre for the Analysis of Strategies and Technologies (CAST) and member of the Public Council of the Russian Federation Ministry of Defense. Author of *Brothers Armed: Military Aspects of the Crisis in Ukraine*. Russia's New Army and The Tanks of August. *Philosophical and Cultural Interpretations of Russian Modernisation* Katja Lehtisaari, Arto Mustajoki, 2016-09-13. In this book, the expert international contributors attempt to answer questions such as: How far is it possible to attribute change in contemporary Russia as due to cultural factors? How does the process of change in cultural institutions reflect the general development of Russia? Are there certain philosophical ideas that explain the Russian interpretation of a modern state? This edited volume elaborates on processes of Russian modernisation regarding a wide range of factors including the use of modern technology, elements of civil society, a reliable legal system, high levels of education, equality among citizens, freedom of speech, religion, and trade. The main focus is on the Putin era, but historical backgrounds are also discussed, adding context. The chapters cover a wide spectrum of research fields from philosophy and political ideas to gender issues, language, the education system, and the position of music as a constituent of modern identity. Throughout the book, the chapters are written so as to introduce experts from other fields to new perspectives on Russian modernisation and de-modernisation processes. It will be of great interest to postgraduates and scholars in Philosophy, Politics, IR, Music, and Cultural Studies, and of course
