Distortions to Agricultural Incentives in Europe's Transition Economies Kym Anderson,Johan Swinnen,2008-06-05 The vast majority of the world s poorest households depend on farming for their livelihood During the 1960s and 1970s most developing countries imposed pro urban and anti agricultural policies while many high income countries restricted agricultural imports and subsidized their farmers Both sets of policies inhibited economic growth and poverty alleviation in

developing countries Although progress has been made over the past two decades to reduce those policy biases many trade and welfare reducing price distortions remain between agriculture and other sectors as well as within the agricultural sector of both rich and poor countries Comprehensive empirical studies of the disarray in world agricultural markets first appeared approximately 20 years ago Since then the OECD has provided estimates each year of market distortions in high income countries but there has been no comparable estimates for the world s developing countries This volume is the first in a series other volumes cover Africa Asia and Latin America that not only fill that void for recent years but extend the estimates in a consistent and comparable way back in time and provide analytical narratives for scores of countries that shed light on the evolving nature and extent of policy interventions over the past half century Distortions to Agricultural Incentives in Europe s Transition Economies provides an overview of the evolution of distortions to agricultural incentives caused by price and trade policies in the economies of Eastern Europe and Central Asia that are transitioning away from central planning The book includes country and subregional studies of the ten transition economies of Central and Eastern Europe that joined the European Union in 2004 or 2007 of seven other large member countries of the Commonwealth of Independent States and of Turkey Together these countries comprise over 90 percent of the Europe and Central Asia region s population and GDP Sectoral trade and exchange rate policies in the region have changed greatly since the dissolution of the Soviet Union in 1991 but price distortions remain The new empirical indicators in these country studies provide a strong evidence based foundation for evaluating policy options in the years ahead

Food Security in the Russian Federation David J. Sedik, Serge? Sotnikov, Doris Wiesmann, Food and Agriculture Organization of the United Nations, 2003-01-01 The Russian Federation experienced a fall in GDP per capita of nearly 50 per cent during the 1990s and following the sudden fall in value of the rouble in 1998 international concerns grew over to the rising level of food insecurity and poverty in the country This report has been produced as part of a FAO technical assistance project and examines the state of food security in the Russian Federation and the prospects for addressing these challenges in the future Issues discussed include the changes in agricultural production during the 1990s the main indicators of food availability and access to food by the population public nutrition and diet and the outlook for improvements in the future

How Reform Worked in China Yingyi Qian, 2017-11-24 A noted Chinese economist examines the mechanisms behind China s economic reforms arguing that universal principles and specific implementations are equally important As China has transformed itself from a centrally planned economy to a market economy economists have tried to understand and interpret the success of Chinese reform As the Chinese economist Yingyi Qian explains there are two schools of thought on Chinese reform the School of Universal Principles which ascribes China s successful reform to the workings of the free market and the School of Chinese Characteristics which holds that China s reform is successful precisely because it did not follow the economics of the market but instead relied on the government In this book Qian offers a third perspective taking certain elements from each school of thought but emphasizing not why

reform worked but how it did Economics is a science but economic reform is applied science and engineering To a practitioner it is more useful to find a feasible reform path than the theoretically best way The key to understanding how reform has worked in China Qian argues is to consider the way reform designs respond to initial historical conditions and contemporary constraints Qian examines the role of transitional institutions not best practice institutions but incentive compatible institutions in Chinese reform the dual track approach to market liberalization the ownership of firms viewed both theoretically and empirically government decentralization offering and testing hypotheses about its link to local economic development and the specific historical conditions of China s regional based central planning **Rural**
