**Russia's Role in World Politics** Elias Götz, Neil MacFarlane, 2022-12-09 This book explores Russia's role in world politics In recent years Moscow has played an increasingly active and assertive role in geopolitics Examples include Russia's takeover of Crimea and meddling in eastern Ukraine Russia's military intervention in Syria and support for the Assad government the Kremlin's alleged interference in the 2016 US presidential race the pursuit of closer economic and diplomatic ties with China and Russia's ambitious military reforms and nuclear brinkmanship Not surprisingly Russia's role in world politics has become the object of a spirited debate among Western policymakers think tank analysts and academics Much of this debate focuses on one central question What are the main drivers or causes of Moscow's recent assertiveness The contributions gathered here address this question by focusing on the interplay of power ideas and domestic influences Previously published in *International Politics* Volume 56 issue 6 December 2019

**No Shortcuts** Max Smeets, 2022-08-01 Over the past decade numerous states have declared cyberspace as a new domain of warfare sought to develop a military cyber strategy and establish a cyber command These developments have led to much policy talk and concern about the future of warfare as well as the digital vulnerability of society *No Shortcuts* provides a level headed view of where we are in the militarization of cyberspace In this book Max Smeets bridges the divide between technology and policy to assess the necessary building blocks for states to develop a military cyber capacity Smeets argues that for many states the barriers to entry into conflict in cyberspace are currently too high Accompanied by a wide range of empirical examples Smeets shows why governments' abilities to develop military cyber capabilities might change over time and explains the limits of capability transfer by states and private actors

**No Shortcuts to the Top** Ed Viesturs, David Roberts, 2007-11-27 NATIONAL BESTSELLER This gripping and triumphant memoir from the author of *The Mountain* follows a living legend of extreme mountaineering as he makes his assault on history one 8 000 meter summit at a time From the drama of the peaks to the struggle of making a living as a professional climber to the basic how tos of life at 26 000 feet *No Shortcuts to the Top* is fascinating reading Aron Ralston author of *Between a Rock and a Hard Place* and subject of the film *127 Hours* For eighteen years Ed Viesturs pursued climbing's holy grail to stand atop the world's fourteen 8 000 meter peaks without the aid of bottled oxygen But *No Shortcuts to the Top* is as much about the man who would become the first American to achieve that goal as it is about his stunning quest As Viesturs recounts the stories of his most harrowing climbs he reveals a man torn between the flat safe world he and his loved ones share and the majestic and deadly places where only he can go A preternaturally cautious climber who once turned back 300 feet from the top of Everest but who would not shrink from a peak Annapurna known to claim the life of one climber for every two who reached its summit Viesturs lives by an unyielding motto Reaching the summit is optional Getting down is mandatory It is with this philosophy that he vividly describes fatal

errors in judgment made by his fellow climbers as well as a few of his own close calls and gallant rescues And for the first time he details his own pivotal and heroic role in the 1996 Everest disaster made famous in Jon Krakauer's *Into Thin Air* In addition to the raw excitement of Viesturs's odyssey *No Shortcuts to the Top* is leavened with many funny moments revealing the camaraderie between climbers It is more than the first full account of one of the staggering accomplishments of our time it is a portrait of a brave and devoted family man and his beliefs that shaped this most perilous and magnificent pursuit

**Arctic Fever** Anastasia Likhacheva, 2022-08-22 This book explores the Arctic as a rapidly evolving phenomenon in international affairs of a rising number of stakeholders For decades Arctic studies used

to be an affair of a relatively narrow group of experts from northern countries This time is over due to a new Chinese Arctic policy as well as growing regional interests from South Korea Singapore India and Japan Contributors reflect on new roles for the Arctic region both as a playground for the old school nation state competition and even confrontation and a new source for international cooperation in energy logistics and natural sciences Climate change political tensions and economic competition make Arctic a hotter venue of international relations This new Arctic fever studied through a comparative analysis of different regional agendas especially with a focus on the US China Russia triangle represents the main subject of our book which will be of interest to scholars of geopolitics of climate change and of 21st century energy economics

*Russia and Ukraine* Maria Popova, Oxana Shevel, 2023-11-08 In February 2022 Russian missiles rained on Ukrainian cities and tanks rolled towards Kyiv to end Ukrainian independent statehood President Zelensky declined a Western evacuation offer and Ukrainians rallied to defend their country What are the roots of this war which has upended the international legal order and brought back the spectre of nuclear escalation How did these supposedly brotherly peoples become each other's worst nightmare In *Russia and Ukraine Entangled Histories Diverging States* Maria Popova and Oxana Shevel explain how since 1991 Russia and Ukraine diverged politically ending up on a collision course Russia slid back into authoritarianism and imperialism while Ukraine consolidated a competitive political system and pro European identity As Ukraine built a democratic nation state Russia refused to accept it and came to see it as an anti Russia project After political and economic pressure proved ineffective and even counterproductive Putin went to war to force Ukraine back into the fold of the Russian world Ukraine resisted determined to pursue European integration as a sovereign state These irreconcilable goals rather than geopolitical wrangling between Russia and the West over NATO expansion are the authors argue essential to understanding Russia's war on Ukraine

**Russian Foreign Policy toward Missile Defense** Bilyana Lilly, 2014-08-21 This book is devoted to one of the central issues in U S Russian and NATO Russian relations ballistic missile defense Drawing on more than 2 000

primary sources interviews with Russian and NATO officials and a variety of Russian and Western publications this book offers an unparalleled in depth analysis of the reasons behind Russia's policy towards the construction of a U S ballistic missile defense in Europe It provides a critical assessment of the decision making mechanisms that shape Russia's position on ballistic missile defense as well as Russia's strategic relations with the United States and Russia's interaction with European and non European powers Lilly argues that contrary to Moscow's official claims during the Putin era Russian objections to the construction of ballistic missile defense in Europe have not been wholly dictated by security concerns To Russia missile defense is not purely an issue in and of itself but rather a symbol and instrument of broader political considerations At the international level the factors that have shaped Russia's response include Moscow's perception of the overall state of U S Russian relations the Kremlin's capacity to project influence and power abroad and NATO's behavior in the post Soviet space Domestically the issue of missile defense has been a facilitating instrument for strengthening Putin's regime and justifying military modernization Taken together these instrumental considerations and their fluctuating intensity in different periods prompt the Russian leadership to pursue contradictory policy approaches simultaneously On the one hand the Kremlin seeks U S cooperation while on the other hand it threatens retaliation and reinforces Russian offensive capabilities The result is Moscow's incoherence inconsistency and double speak over the issue of missile defense

**Learn to speak and write Russian in 30 days** YouGuide Ltd, [The Industrial Revival in Soviet Russia](#) Abraham Aaron Heller,1922 [Architecture and the Landscape of Modernity in China before 1949](#) Edward Denison,2017-02-17 This book explores China's encounter with architecture and modernity in the tumultuous epoch before Communism an encounter that was mediated not by a singular notion of modernism emanating from the west but that was uniquely multifarious deriving from a variety of sources both from the west and importantly from the east The heterogeneous origins of modernity in China are what make its experience distinctive and its architectural encounters exceptional These experiences are investigated through a re evaluation of established knowledge of the subject within the wider landscape of modern art practices in China The study draws on original archival and photographic material from different artistic genres and architecturally concentrates on China's engagement with the west through the treaty ports and leased territories the emergence of architecture as a profession in China and Japan's omnipresence not least in Manchuria which reached its apogee in the puppet state of Manchukuo The study's geographically temporally and architecturally inclusive approach framed by the concept of multiple modernities questions the application of conventional theories of modernity or post colonialism to the Chinese situation By challenging conventional modernist historiography that has marginalised the experiences of the west's other for much of the last century this book proposes different ways of grappling with and comprehending the distinction and complexity of China's experiences and its encounter with architectural modernity

**Ultra-Modernism** Edward Denison,Guangyu Ren,2016-12-01 The first half of the twentieth century was fraught with global tensions and political

machinations However for all the destruction in that period these geopolitical conditions in Manchuria cultivated an extraordinary variety of architecture and urban planning which has completely escaped international attention until now With over forty carefully chosen images *Ultra Modernism Architecture and Modernity in Manchuria* is the first book in English that illustrates Manchuria's encounter with modernity through its built environment Edward Denison and Guangyu Ren take readers through Russia's early territorial claims Japan's construction of the South Manchuria Railway SMR and the establishment of Manchukuo in 1932 The book examines in detail the creation of modern cities along the SMR and focuses on three of the most important modern urban centres in Manchuria the Russian dominated city of Harbin the port of Dalian and the new capital of Manchukuo Hsinking Changchun Like so much of the world outside the West during the twentieth century Manchuria's encounter with modernity is merely a faint whisper drowned out by the deafening master narrative of Western centric modernism This book attempts to redress an imbalance in the modern history of China by studying the impact of Japan on architecture and planning beyond the depredations of the Sino Japanese War *Ultra Modernism Architecture and Modernity in Manchuria* is a concise fascinating reminder of northeast China's transformation a century ago when it was known as Manchuria Denison and Ren show how Dalian Shenyang Changchun and Harbin went from a sleepy port a decaying imperial seat and small agricultural settlements to sleek manicured metropolises linked by the world's longest railway to Europe This is an excellent addition to both syllabus and bookshelf Michael Meyer author of *In Manchuria A Village Called Wasteland* and *the Transformation of Rural China* and *The Last Days of Old Beijing* *Life in the Vanishing Backstreets of a City Transformed* Manchuria today conjures up images of rusting heavy industry and a hostile environment But beneath the coal dust is a built environment that was once at the cutting edge of what was meant to be modern This creative and comprehensive book takes readers back to a time when the region was an outdoor laboratory for modernity and cosmopolitanism James Carter author of *Creating a Chinese Harbin Nationalism in an International City 1916-1932*
