Rwanda And Genocide In The 20th Century:

Rwanda and Genocide in the Twentieth Century Alain Destexhe, 1995-10 In this slim passionately argued volume first published to great acclaim in France and considerably updated during the translation process a deeply involved witness of the massacres takes an unflinching look at recent events in Rwanda and what they can tell us about the nature of genocide Drawing on his experiences in the killing fields Destexhe illustrates how genocide is trivialized by superficial contemporary definitions and by modern media and its compulsion to describe any mass killing as genocide Genocide Destexhe argues is the most evil of all crimes as it is directed at the very heart of what it is to be human Reviewing the three most destructive genocidal campaigns of the twentieth century the Turkish mass murder of Armenians the Nazi Holocaust and the Rwandan cataclysm the book discusses such central issues as culpability and collective responsibility the limits of humanitarian intervention and the complexities of punishing genocidal agents after the fact **Who Must Die in Rwanda's Genocide?**

Kyrsten Sinema, 2015-09-11 This book provides a juridical sociopolitical history of the evolution of the 1994 Rwandan genocide Over one million citizens were massacred in less than 100 days via a highly organized efficiently executed genocide throughout the tiny country of Rwanda While genocide is not a unique phenomenon in modern times a genocide like Rwanda's is unique Unlike most genocides wherein a government plans and executes mass murder of a targeted portion of its population asking merely that the majority population look the other way or at most provide no harbor to the targeted population ex Germany the Rwandan government relied heavily on the civilian population to not only politically support but actively engage in the acts of genocide committed over the 100 days throughout the spring of 1994 This book seeks to understand why and how the Rwandan genocide occurred It analyzes the colonial roots of modern Rwandan government and the development of the political state of exception created in Rwanda that ultimately allowed the sovereign to dehumanize the minority Tutsi population and execute the most efficient genocide in modern history **Cultural Sociology of the**

Middle East, Asia, and Africa Andrea L. Stanton, 2012 In our age of globalization and multiculturalism it has never been more important to understand and appreciate all cultures across the world The four volumes take a step forward in this endeavour by presenting concise information on those regions least well known to students across Europe the Middle East Asia and Africa The volumes convey what daily life is like for people in these selected regions Entries will aid readers in understanding the importance of cultural sociology to appreciate the effects of cultural forces around the world and to learn the history of countries and cultures within these important regions Key Features Topics are explored within historical context in three broad historical periods prehistory to 1250 1250 to 1920 and 1920 to the present One volume each is devoted to the regions of the Middle East and Africa and then one volume to East and Southeast Asia and a final volume to West Central and South Asia The volumes include extensive use of photographs and maps to explain cultural and geographic content Each volume has its own volume editor with expertise in that particular region Key Themes Arts Culture and Science

Rudolph Jr., 2015-12-07 An indispensable reference that will help students understand the major ethnic conflicts that dominate the headlines and shape the modern world Since World War II significant conflicts have most often taken the form of acts of violence between ethnic or national communities inside individual states This two volume work uses case studies to explore some four dozen of those conflicts making it an ideal first stop reference for students and others who wish to quickly gain an understanding of ethnic struggles Content from the first edition is updated and new entries on recent conflicts have been added The set s geographical range which encompasses nearly every continent is matched by the diversity of the conflicts explored These include internal conflicts such as those experienced by African Americans in the United States and Muslims in France as well as separatist movements of groups like the Chechens in Russia and Bosnians in Yugoslavia Headline making conflicts for example those in Mali and Syria are covered as well The book is organized alphabetically by country and region Each essay begins with a timeline and then explores the historical background evolution efforts to manage and significance of the conflict Suggestions for follow up research and appendices of relevant primary source materials are also included *Research Handbook on Post-Conflict State Building* Paul R. Williams, Milena Sterio, 2020-08-28 As a conflict ends and the parties begin working towards a durable peace practitioners and peacebuilders are faced with the thrilling possibilities and challenges of building new or reformed political security judicial social and economic structures This Handbook analyzes these elements of post conflict state building through the lens of international law which provides a framework through which the authors contextualize and examine the many facets of state building in relation to the legal norms processes and procedures that guide such efforts across the globe The volume aims to provide not only an introduction to and explanation of prominent topics in state building but also a perceptive analysis that augments ongoing conversations among researchers lawyers and advocates engaged in the field *The Ethics of Anthropology* Pat Caplan, 2004-03-01 Since the inception of their discipline anthropologists have studied virtually every conceivable aspect of other peoples morality religion social control sin virtue evil duty purity and pollution But what of the

examination of anthropology itself and of its agendas epistemes theories and praxes In 1991 Raymond Firth spoke of social anthropology as an essentially moral discipline Is such a view outmoded in a postmodern era Do anthropological ethics have to be re thought each generation as the conditions of the discipline change and as choices collide with moral alternatives The Ethics of Anthropology looks at some of these crucial issues as they reflect on researcher relations privacy authority secrecy and ownership of knowledge The book combines theoretical papers and case studies from eminent scholars including Lisette Josephides Steven Nugent Marilyn Silverman Andrew Spiegel and Veronica Strang Showing how the topic of ethics goes to the heart of anthropology it raises the controversial question of why and for whom the anthropological discipline functions

Global Governance, Human Rights and International Law Errol P. Mendes,2014-02-05 This book offers a stimulating introduction to the links between areas of global governance human rights global economy and international law By drawing on a range of diverse subject areas Errol P Mendes argues that the foundations of global governance human rights and international law are undermined by a conflict or tragic flaw where insistence on absolute conceptions of state sovereignty are pitted against universally accepted principles of justice and human rights resulting in destructive self interest for both the state and the global community The book explores how human rights and international law are applied in some of the critical institutions of global governance and in the operations of the global private sector and how States institutions and global civil society struggle to fight this tragic flaw The book is brought up to date by considering developments in the role of the IMF the World Bank bilateral investment treaties the likely failure of the Doha round of WTO negotiations the legacy of the 2008 financial crisis and the role of the International Criminal Court and the evolving Responsibility to Protect doctrine in international peace and security crises in the Middle East Central and West Africa among other regions of the world With its intensely interdisciplinary approach this book motivates new thinking in the realm of global governance and

international law and promotes the development of new strategies for negotiating between conflicting leadership and organisational values within global institutions The book will be of great interest and use to students and researchers of public international law international relations and political science business and human rights global governance and international trade and economic law **The Oxford Handbook of Intergroup Conflict** Linda Tropp, 2012-07-26 With insightful chapters from key social psychologists and peace scholars this handbook offers an integrative and extensive overview of critical questions issues processes and strategies relevant to understanding and addressing intergroup conflict

Genocide and International Justice Rebecca Joyce Frey, 2009 Presents a guide to the issues of genocide and international justice including global and primary sources important documents research tools organizations and notable persons **Remembering Genocides in Central Africa** Rene Lemarchand, 2021-01-04 Scene of one of the biggest genocides of the last century Rwanda has become a household word yet bitter disagreements persist as to its causes and consequences Through a blend of personal memories and historical analysis and informed by a lifelong experience of research in Central Africa the author challenges conventional wisdom and suggests a new perspective for making sense of the appalling brutality that has accompanied the region's post independence trajectories All four states adjacent to Rwanda are inhabited by Hutu and Tutsi and thus contained in germ the potential for ethnic conflict but only in Burundi did this potential reach genocidal proportions when in 1972 in response to a local insurrection at least 200 000 Hutu civilians were killed by a predominantly Tutsi army By widening his analytic lens the author shows the critical importance of the Burundi bloodshed to an understanding of the roots of the Rwanda genocide and in later years the significance of the mass murder of Hutu civilians by Kagame's Tutsi army not just in Rwanda but in the Congo The regional dimension of ethnic conflict traceable to Belgian engineered Hutu revolution in Rwanda in 1959 three years before its independence is the principal missing piece in the genocidal puzzle of the Great Lakes region of central Africa But this is by no means the only one Reassembling the missing pieces within and outside Rwanda is not the least of the merits of this highly readable reassessment of a widely misunderstood human tragedy *Social Scientists in the Civic Space* Arundhati Virmani, Jean Boutier, Manohar Kumar, 2024-11-18 The book explores the stakes for the social sciences around four central problems the challenges of context modes of intervention involvement and the ethical dilemmas for the scholar in a democratic space The first challenges of the context examines the variety of situations confronted by scholars since the beginning of the 20th century These include their interventions in key judicial affairs the impact of technological developments like the introduction of big data or even the positionality of the scholar Second the book investigates the modalities according to which social scientists may intervene in the civic space in particular as specialists as experts or in the media A third problem brings together some cases illustrative of researchers involvement in critical issues such as food policies major social reforms or gender related questions Finally the book concludes with a reflection on the modes of exercising critique or dissent in

democratic societies and on the ethical dimensions of involvement in the civic space A searing examination of the role of social scientists as they are called upon to address the multiple critical issues faced by contemporary societies from pandemics to climatic change sustainable development migration ethnicity or the place of religion This volume will be of great interest not just to scholars students and researchers of the social sciences but to the general reader as a concerned citizen

Reproducing, Rethinking, Resisting National Narratives Ignacio Brescó de Luna,Floor van Alphen,2022-01-01 In his now classic *Voices of Collective Remembering* James V Wertsch 2002 examines the extent to which certain narrative themes are embedded in the way the collective past is understood and national communities are imagined In this work Wertsch coined the term schematic narrative templates to refer to basic plots such as the triumph over alien forces or quest for freedom that are recurrently used setting a national theme for the past present and future Whereas specific narratives are about particular events dates settings and actors schematic narrative templates refer to more abstract structures grounded in the same basic plot from which multiple specific accounts of the past can be generated As dominant and naturalised narrative structures schematic narrative templates are typically used without being noticed and are thus extremely conservative impervious to evidence and resistant to change The concept of schematic narrative templates is much needed today especially considering the rise of nationalism and extreme right populism political movements that tend to tap into national narratives naturalised and accepted by large swathes of society The present volume comprises empirical and theoretical contributions to the concept of schematic narrative templates by scholars of different disciplines Historiography Psychology Education and Political Science and from the vantage point of different cultural and social practices of remembering viz school history teaching political discourses rituals museums the use of images maps etc in different countries The volume s main goal is to provide a transdisciplinary debate around the concept of schematic narrative templates focusing on how narratives change as well as perpetuate at times when nationalist discourses seem to be on the rise This book will be relevant to anyone interested in history history teaching nationalism collective memory and the wider social debate on how to critically reflect on the past
