Patent and Trademark Office,2002      **Idoru** William Gibson,2003-01-07 The best novel William Gibson has ever written about the world we're entering daily Neuromancer made Gibson famous Idoru cements that fame The Washington Post Book World 21st century Tokyo after the millennial quake Neon rain Light everywhere blowing under any door you might try to close Where the New Buildings the largest in the world erect themselves unaided their slow rippling movements like the contractions of a sea creature Colin Laney is here looking for work He is an intuitive fisher for patterns of information the signature an individual creates simply by going about the business of living But Laney knows how to sift for the dangerous bits Which makes him useful to certain people Chia McKenzie is here on a rescue mission She's fourteen Her idol is the singer Rez of the band Lo Rez When the Seattle chapter of the Lo Rez fan club decided that he might be in trouble in Tokyo they sent Chia to check it out Rei Toei is the idoru the beautiful entirely virtual media star adored by all Japan Rez has declared that he will marry her This is the rumor that has brought Chia to Tokyo True or not the idoru and the powerful interests surrounding her are enough to put all their lives in danger      [Annual Meeting](#) Kōbunshi Gakkai (Japan),1992      [Disordered Attention](#) Claire Bishop,2024-06-11 How technology and the politics of attention changed the way we look at art The ways we encounter contemporary art and performance has changed How are we expected to engage with today's diverse practice Is the old model of close looking still the ideal or has it given way to browsing skimming and sampling Across four provocative and insightful essays art historian and critic Claire Bishop identifies trends in contemporary practice Charting a critical path through the last three decades Bishop pinpoints how spectatorship and visual literacy are evolving under the pressures of digital technology She explores how research-based exhibitions have proliferated turning the artist into an investigator or archivist with mixed results Spatial performance can now involve the artist dancers or even the audience as participants often framed with Instagram in mind The political event is not longer activated without an understanding of the media that will record and distribute it The proliferation of works that use modernist architecture is noticeable but has this become a shorthand for something else Disordered Attention is a vital survey of 21st century art from one of the leading art thinkers of our times      **Capture Japan** Marco Bohr,2022-12-01 Capture Japan investigates the formation of visual tropes and how these have contributed to perceptions of Japan in the global imagination The book proposes that images are not incidental in the formation of such perceptions but central to notions about identity history and memory From a tentative western ally in 1952 to a soft power superpower with a huge global influence in the 21st century the book locates questions about Japan in the global imagination to the country's transforming geopolitical position By adopting an interdisciplinary approach with a multiplicity of perspectives from around the world Capture Japan goes beyond binarisms to uncover how images can also produce

discourses that challenge subvert or even contradict each other The word capture in the title of the book recognises both the deeply problematic role that images have played in relation to colonialism as well as the potential dominance that visual spectacles can wield in a contemporary context Diverse essays from a wide range of perspectives investigate the institutional framework that has allowed certain types of images of Japan to be promoted while others have been suppressed In doing so the book points to a vast network of images that have shaped the perception of Japan both from within and from outside revealing how these images are inextricably linked to wider ideological political cultural or economic agendas   **SPSJ** ...

**Aesthetics in Present Future** Brunella Antomarini,Adam Berg,2013-06-10 Aesthetics in Present Future The Arts and the Technological Horizon is a collection of essays by scholars and a few artists who focus on the issue of how arts either change when conveyed by new media such as the web 3D printers and videos or are simply diffused by them The contributors analyses describe how both virtual production and virtual communication change our attitudes toward what we call the arts The scope of the topics ranges from photography to cinema and painting from theater to avant garde art and Net art and from construction of robots to simulation of brain functions The result is an astonishing range of new possibilities and risks for the arts and new

perspectives regarding our knowledge of the world   **Polymer Preprints, Japan** ,1991    **Global Hong Kong** Cindy Wong,Gary McDonogh,2014-06-03 Global Hong Kong locates Hong Kong in the contemporary globalizing world Hong Kong as the authors argue is an archetypal place sitting at the intersection of East and West It is also a major center for global capital flows and world trade Moreover in recent years the island s global cultural power has become increasingly evident as

Hong Kong popular culture has spread to the West via a booming film industry While looking at issues of postcoloniality transnationalism and economic globalization Wong and McDonogh focus on the new cultures and social formations of contemporary Hong Kong as well as the transformation of the physical city itself They also trace the new interconnections economic demographic social and cultural between Hong Kong and other parts of the worldthat have benn fostered by globalization Books in this series look at how nations and regions across the world are navigating the tumultuous currents of globalization Concise descriptive interdisciplinary and theoretically informed they serve as ideal introductions to the peoples and places of our increasingly globalized world   **Tsunami** Edward Bryant,2014-06-11 It is a comprehensive and well illustrated textbook on all aspects of tsunami I don t think there is any other book on the topic published As one bookseller

said after the Indian Ocean tsunami event I would have just filled my front window with copies and they would have walked out the store This statement was just as relevant after the Japanese tsunami of 2011 and will be as relevant when the next large tsunami event happens sooner rather than later The book can be used by a student or layperson to gain encyclopedic knowledge about tsunami     [Do Metaphors Dream of Literal Sleep?](#) Seo-Young Chu,2011-01-15 In culture and scholarship science fictional worlds are perceived as unrealistic and altogether imaginary Seo Young Chu offers a bold challenge to this perception of the genre arguing instead that science fiction is a form of high intensity realism capable of representing non imaginary objects that elude more traditional realist modes of representation Powered by lyric forces that allow it to transcend the dichotomy between the literal and the figurative science fiction has the capacity to accommodate objects of representation that are themselves neither entirely figurative nor entirely literal in nature Chu explores the globalized world cyberspace war trauma the Korean concept of han and the rights of robots all as referents for which she locates science fictional representations in poems novels music films visual pieces and other works ranging within and without previous demarcations of the science fiction genre In showing the divide between realism and science fiction to be illusory Do Metaphors Dream of Literal Sleep sheds new light on the value of science fiction as an aesthetic and philosophical resource one that matters more and more as our everyday realities grow increasingly resistant to straightforward representation
