Monarchy, the Court, and the Provincial Elite in Early Modern Europe Peter Edwards, 2024-02-26 A team of experts view

the relationship between rulers and their leading subjects across Europe and further afield If God derived authority legitimized a monarch's rule it did not necessarily prevent opposition to perceived arbitrary government as subjects put forward the counter concept of consensual rule The provincial elite might serve the ruler as advisors and officers at court but they also possessed an independent source of power based on their extensive estates While monarchs wanted to perpetuate a system in which they could watch over members of the regional elite at court and keep them busy they sought to make use of them as local and provincial administrators that is as long as they remained loyal a fraught balancing act Contributors include H Ider Carvalhal Peter Edwards Jemma Field Cailean Gallagher Pedro Jos Herades Ruiz Graeme S Millen Vita Mala inskien Tibor Monostori Steve Murdoch David Potter Peter R Roberts Irene Maria Vicente Martin and Matthias Wong

The Social Construction of Corruption in Europe Dirk Tänzler, Konstadinos Maras, 2016-02-24 The volume demonstrates the suitability of the theory of social constructivism in portraying and analyzing the diversity of the phenomenon of corruption The approach of social constructivism taken in this volume is able to reconstruct the construction of corruption both from a societal perspective by assessing it as generally accepted or tolerated behaviour in more or less standardized rule governed social situations and from the perspective of actors who perceive corrupt behaviour as problem solving in everyday life The volume proves the usefulness of a social construction perspective for empirical research It contains case studies of social definitions of corruption in eleven European countries that contribute in different ways to establishing a grounded theory of the phenomenon of corruption

Culture and Liberty in the Age of the American Revolution Michal Jan Rozbicki, 2011-02-01 In his new book Michal Jan Rozbicki undertakes to bridge the gap between the political and the cultural histories of the American Revolution Through a careful examination of liberty as both the ideological axis and the central metaphor of the age he is able to offer a fresh model for interpreting the Revolution By establishing systemic linkages between the histories of the free and the unfree and between the factual and the symbolic this framework points to a fundamental reassessment of the ways we think about the American Founding Rozbicki moves beyond the two dominant interpretations of Revolutionary liberty one assuming the Founders invested it with a modern meaning that has in essence continued to the present day the other highlighting its apparent betrayal by their commitment to inequality Through a consistent focus on the interplay between culture and power Rozbicki demonstrates that liberty existed as an intricate fusion of political practices and symbolic forms His deeply historicized reconstruction of its contemporary meanings makes it clear that liberty was still understood as a set of privileges distributed according to social rank rather than a universal right In fact it was because the Founders considered this assumption self evident that they felt confident in publicizing a highly liberal symbolic narrative of equal liberty to represent the Revolutionary endeavor The uncontrollable success of this narrative went far beyond the circumstances that gave birth to it because it put new cultural capital a conceptual arsenal of rights and freedoms at the disposal of ordinary people as well as political factions competing for their support providing priceless legitimacy to all those who would insist that its nominal inclusiveness include them in fact

The Boundaries of Afghans' Political Imagination Jolanta Sierakowska-Dyndo, 2014-08-11 In this book The Boundaries of Afghans Political Imagination the author seeks an answer to the question of how tradition specifically its normative axiological aspects shapes the political attitudes and actions of the Afghans The author points to two different concepts of social order which are moulded by the Pashtunwali on the one hand a tribal code which is part of Pashto language tradition and on the other hand by Sufism the religious and philosophical current in Islam expressed mainly in the Dari Persian language The two systems offer a different hierarchy of values and organize social reality by referring to two different models of order the circle and the pyramid While making an in depth analysis of the topic the author asserts that the social organization of the Pashtuns is based on the principle of representation and consensus Tribalism is shaped in the structure of a circle in which a group is the fundamental category Where tribal structure no longer performs its regulatory and organizational functions the pattern of social order is offered by the Sufi Brotherhoods which had long been very popular and powerful in this part of Asia The hierarchical organization of Sufism

based on a disciple master relationship and the principle of authoritarianism gradually established the structure of the pyramid as a model of social order and also of political order Religious Sufi Brotherhoods became the most accessible leadership pattern besides the tribal one to be fixed in the Afghans social imagination This analysis from the perspective of sociocultural and political anthropology will be indispensable for those interested in Afghan and Islamic societies
