

## GEN Z

### Summary:

People who were born after 1995 were the Gen Z they have adapted to many social media apps such as Facebook, Twitter, Instagram and Snapchat. For Instagram they would be friends with people that has a high follower count like 2000 but if the followers were 80 you were known as not famous and people would not like to interact with you. They would also be counting their likes to be wow Infront of their friends. As for Twitter they would be checking on their retweets to also see how many people interacts with your posts. For Snapchat there is a feature snap map that allows friends to see your location so it ruins the privacy for people who don't like their current location to be seen. Due to all this many teenagers have been surveyed and they have many issues with the social medias changing their lives in a wrong way.

Screen time is one of the main problem since they spend most of the day posting just to impress the people who follow them in their social media accounts. After a survey was conducted Gen Z people around 66% of the conducted survey would be more happier if social media was not invented. This invention has caused many online bullying and stress for children just for them to impress their friends and have a better status in their life. Having such a life causes them stress and less focus in school since they have other priorities in showing off their wealth in purchasing goods. After the age of 16 many youngsters have started to remove one social media off their phone so they wouldn't have to spend much time of their day in showing off in many accounts.

They prefer meeting face to face since while being online they have started to base friendships online instead outdoors. By doing that it has affected many youngsters since they tend to feel shy meeting their friends because on what they would say about their looks. When the youngsters are online they don't feel that they are themselves since they are just portraying fake version of themselves .Instead connecting with each other offline. Before the Gen Z the youngsters of that time enjoy with being around each other and it has benefits like no screen time and being their real self since there was no online so base it on just hanging out with each other in their favorite places.

*Selected Essays and Letters* National Assessment of Educational Progress (Project), 1972      Heidegger on Being Self-Concealing Katherine Withy, 2022-05-02 What is Heidegger talking about when he says that being conceals itself This is the first study to systematically address that question Katherine Withy analyses texts from across Heidegger's philosophical career and sorts the various phenomena of concealing and concealment that Heidegger discusses into a highly structured taxonomy The taxonomy clarifies the relationships and differences between such phenomena as *l'th* forgottenness the nothing earth excess the backgrounding of the world and *un* truth as well as speaking falsely talking idly secrets mysteries seeming and inauthentic discovering But in relating and differentiating these phenomena the taxonomy shows that none of them is the self concealing of being Having established what the self concealing of being is not Withy establishes what it is She argues that being conceals itself in that it shows up to us as lacking the sorts of contrast cases that render entities determinate and intelligible This novel and powerful interpretation of the self concealing of being explains why the secondary literature to date has discussed it in vague and metaphorical terms as well as why Heidegger tends to collapse being's self concealing into the concealment of *l'th* Withy's interpretation is both a clarification of and a corrective to Heidegger's notoriously difficult and sometimes misleading discussions of being as self concealing      *Catalogue of Printed Books*, 1886

The debate over whether class size matters for teaching and learning is one of the most enduring and aggressive in education research Teachers often insist that small classes benefit their work But many experts argue that evidence from research shows class size has little impact on pupil outcomes so does not matter and this dominant view has informed policymaking internationally Here the lead researchers on the world s biggest study into class size effects present a counter argument Through detailed analysis of the complex relations involved in the classroom they reveal the mechanisms that support teachers experience and conclude that class size matters very much indeed Drawing on 20 years of systematic classroom observations surveys of practitioners detailed case studies and extensive reviews of research Peter Blatchford and Anthony Russell contend that common ways of researching the impact of class size are limited and sometimes misguided While class size may have no direct effect on pupil outcomes it has they say significant force through interconnections with classroom processes In describing these connections the book opens up the everyday world of the classroom and shows that the influence of class size is everywhere It impacts on teaching grouping practices and classroom management the quality of peer relations tasks given to pupils and on the time teachers have for marking assessments and understanding the strengths and challenges for individual pupils From their analysis the authors develop a new social pedagogical model of how class size influences work and identify policy conclusions and implications for teachers and schools
