understanding of many aspects of daily life during the Civil War era and gain appreciation for the vast differences between life today and 150 years ago      *Sealed with Blood* Sarah J. Purcell, 2010-08-03 The first martyr to the cause of American liberty was Major General Joseph Warren a well known political orator physician and president of the Provincial Congress of Massachusetts Shot in the face at close range at Bunker Hill Warren was at once transformed into a national hero with his story appearing throughout the colonies in newspapers songs pamphlets sermons and even theater productions His death though shockingly violent was not unlike tens of thousands of others but his sacrifice came to mean something much more significant to the American public *Sealed with Blood* reveals how public memories and commemorations of Revolutionary War heroes such as those for Warren helped Americans form a common bond and create a new national identity Drawing from extensive research on civic celebrations and commemorative literature in the half century that followed the War for Independence Sarah Purcell shows how people invoked memories of their participation in and sacrifices during the war when they wanted to shore up their political interests make money argue for racial equality solidify their class status or protect their personal reputations Images were also used especially those of martyred officers as examples of glory and sacrifice for the sake of American political principles By the midnineteenth century African Americans women and especially poor white veterans used memories of the Revolutionary War to articulate their own more inclusive visions of the American nation and to try to enhance their social and political status Black slaves made explicit the connection between military service and claims to freedom from bondage Between 1775 and 1825 the very idea of the American nation itself was also democratized as the role of the people in keeping the sacred memory of the Revolutionary War broadened      *Grief and Sorrow in the Roman World* Anthony Smart, 2024-12-26 Engaging with the long history of emotions this book provides a new narrative of how grief was defined experienced and used in Ancient Rome From studies of tears and weeping to Roman funerary monuments and inscriptions the role of female grief in navigating political conflict and letters of consolation *Grief and Sorrow in the Roman World* explores the language of grief and individuality of sorrow in Rome and asks how and why they shaped their emotions in this way Revisiting familiar sources such as Livy and Plutarch it offers new interpretations to place the Roman emotional framework against our own Can we recognise our own notions of grief in the Ancient World Do we feel pain in the same way as our Roman ancestors did Exploring these questions and more Anthony Smart challenges existing perceptions of grief and sorrow in the Roman world and places emotions at the centre of this rich culture      ***Damned Nation*** Kathryn Gin Lum, 2014-08-01 Among the pressing concerns of Americans in the first century of nationhood were day to day survival political harmony exploration of the continent foreign policy and fixed deeply in the collective consciousness hell and eternal damnation The fear of fire and brimstone and the worm that never dies exerted a profound and lasting influence on Americans ideas about themselves their neighbors and the rest of the world Kathryn Gin Lum poses a number of vital questions Why did the fear of hell survive Enlightenment critiques in America after largely subsiding in Europe and

elsewhere What were the consequences for early and antebellum Americans of living with the fear of seeing themselves and many people they knew eternally damned How did they live under the weighty obligation to save as many souls as possible What about those who rejected this sense of obligation and fear Gin Lum shows that beneath early Americans' vaunted millennial optimism lurked a pervasive anxiety that rather than being favored by God they and their nation might be the object of divine wrath As time honored social hierarchies crumbled before revival fire economic unease and political chaos saved and damned became as crucial distinctions as race class and gender The threat of damnation became an impetus for or deterrent from all kinds of behaviors from reading novels to owning slaves Gin Lum tracks the idea of hell from the Revolution to Reconstruction She considers the ideas of theological leaders like Jonathan Edwards and Charles Finney as well as those of ordinary women and men She discusses the views of Native Americans Americans of European and African descent residents of Northern insane asylums and Southern plantations New England's clergy and missionaries overseas and even proponents of Swedenborgianism and annihilationism *Damned Nation* offers a captivating account of an idea that played a transformative role in America's intellectual and cultural history Parting Ways Denise Carson, 2011-04-10 Carson explores in captivating detail the new alternatives to traditional institutionalized dying mourning and memorialization She deftly paints a vivid portrait of her own experiences and successfully ties in conceptual research on newer death rituals This book is truly unique and timely Tony Bell Professor Emeritus at California State University Fullerton Department of Sociology *Parting Ways* provides a fresh and contemporary perspective on American death rituals Carson expertly weaves her personal narrative around existing research and in the process she delivers an important analysis on ritual and death that is poignant and widely accessible Justin Holcomb Reformed Theological Seminary *Women in George Washington's World* Charlene M. Boyer Lewis, George W. Boudreau, 2022-07-27 George Washington lived in an age of revolutions during which he faced political upheaval war economic change and social shifts These revolutions affected American women in profound ways and the women Washington knew personally professionally and politically lived lives that reveal these multifaceted transformations Although Washington often operated in male dominated arenas he participated in complex and meaningful relationships with women from across society A lively and accessibly written volume *Women in George Washington's World* highlights some of the women Black and white free and enslaved whom Washington knew Women who admired and memorialized him women who provided him love and solace women who frustrated him and women who worked for or against him all of these women are chronicled through their own experiences and identities The essays written by established and emerging historians of gender reveal the lives of a diverse group of women including plantation mistresses and enslaved workers Loyalists and Patriots poets and socialites as well as mothers wives and sisters Collectively women emerge as strong actors during the American Revolution and its aftermath not merely passive spectators or occasional participants Although usually not on battlefields or in government offices women made choices and acted in ways that affected their own their

Credition - An Interdisciplinary Approach to the Nature of Beliefs and Believing  
Rüdiger J. Seitz, Hans Ferdinand Angel, Raymond Paloutzian, Ann Taves, 2023-07-27 The concept of credition represents an innovative research field at the interface of the natural sciences and the humanities addressing the nature of beliefs and believing Credition signifies the integrative information processing that is brought about by neurophysiologically defined neural activity in the brain affording decision making In analogy to cognition and emotion it is mediated by neural processes and constrains behavior by predictive coding Three categories of beliefs have been defined on the background of evolutionary biology that can be differentiated linguistically The goal of the collection of research papers is to provide an interdisciplinary discourse on an international level in the emerging field of credition On this basis individual group specific and cultural narratives of secular and non secular origin can become normative in particular when enhanced by ritual acts Also the recently defined belief categories can pave the way for novel approaches of empirical research on the formation of civilizations and cultures as well as for new perspectives on the psychopathological understanding of mental disorders The disciplines of empirical research such as cognitive science neurophysiology neuropsychology social neuroscience shall counteract with theoretical disciplines such as anthropology philosophy and theology in order to elaborate premises that are suited to bridge the scientific gap The potential contributors will submit their abstracts such that they are available for the International meeting Credition An Interdisciplinary Challenge that is going to take place in October 2021 in Hannover Germany Following the symposium the participants shall elaborate their perspective concerning beliefs and believing based on their expertise and the information they have learned during the symposium The authors are expected to submit a concise paper of 2000 words C Type Article

**A Visitation of God** Sean A. Scott, 2011 When Abraham Lincoln expressed gratitude for the northern churches in the spring of 1864 it had nothing to do with his appreciation of doctrine liturgy or Christian fellowship Collectively the churches earned the president's admiration with rabid patriotism and support for the war Ministers publicly proclaimed the righteousness of the Union condemned slavery and asserted that God favored the federal army Yet all of this would have amounted to nothing more than empty bravado without the support of the men and women sitting in the pews This outstanding book examines the Civil War from the perspective of the northern laity those religious civilians whose personal faith influenced their views on politics and slavery helped them cope with physical separation and death engendered by the war and ultimately enabled them to discern the hand of God in the struggle to preserve the national Union From Lincoln's election to his assassination the book weaves together political military social and intellectual history

into a religious narrative of the Civil War on the northern home front Packed with compelling human interest stories this account draws on letters diaries newspapers and church records along with published sources to conclusively demonstrate that many devout civilians regarded the Civil War as a contest imbued with religious meaning In the process of giving their loyal support to the government as individual citizens religious Northerners politicized the church as a collective institution and used it to uphold the Union so the purified nation could promote Christianity around the world Christian patriotism helped win the war but the politicization of religion did not lead to the redemption of the state

**The Museum of Other People** Adam Kuper,2024-04-16 A MOST ANTICIPATED BOOK From one of the world s most distinguished anthropologists an important and timely work of cultural history that looks at the origins and much debated future of anthropology museums A provocative look at questions of ethnography ownership and restitution the argument Kuper makes in The Museum of Other People is important precisely because just about no one else is making it He asks the questions that others are too shy to pose Required reading Financial Times UK In this deeply researched immersive history Adam Kuper tells the story of how foreign and prehistoric peoples and cultures were represented in Western museums of anthropology Originally created as colonial enterprises their halls were populated by displays of plundered art artifacts dioramas bones and relics Kuper reveals the politics and struggles of trying to build these museums in Germany France and England in the mid 19th century and the dramatic encounters between the very colorful and eccentric collectors curators political figures and high members of the church who founded them He also details the creation of contemporary museums and exhibitions including the Smithsonian the Harvard s Peabody Museum of American Archaeology and Ethnology and the famous 1893 World s Columbian Exposition in Chicago which was inspired by the Paris World Fair of 1889 Despite the widespread popularity and cultural importance of these institutions there also lies a murky legacy of imperialism colonialism and scientific racism in their creation Kuper tackles difficult questions of repatriation and justice and how best to ensure that the future of these museums is an ethical appreciative one that promotes learning and cultural exchange A stunning unique accessible work based on a lifetime of research The Museum of Other People reckons with the painfully fraught history of museums of natural history and how curators anthropologists and museumgoers alike can move forward alongside these time honored institutions Walt

Whitman in Context Joanna Levin,Edward Whitley,2018-05-31 Walt Whitman is a poet of contexts His poetic practice was one of observing absorbing and then reflecting the world around him Walt Whitman in Context provides brief provocative explorations of thirty eight different contexts geographic literary cultural and political through which to engage Whitman s life and work Written by distinguished scholars of Whitman and nineteenth century American literature and culture this collection synthesizes scholarly and historical sources and brings together new readings and original research *Cultural Change in Modern World History* Peter N. Stearns,2018-12-13 In this innovative textbook leading world historian Peter Stearns analyses key examples of culture change from around the world highlighting what culture change involves and how it

can be explained and assessed both historically and in the contemporary world Culture change is one of the most interesting and significant features of human society but until now there has been no book for the classroom which looks explicitly at this phenomenon Cultural Change in Modern World History covers different kinds and levels of culture change since 1500 from colonial culture contact in British India to modernization in Meiji Japan and changing attitudes towards gay marriage in the past decade considering how we should define culture change how to deal with causation and how to evaluate continuities and consequences Stearns addresses fundamental questions why do groups of people change their beliefs and values and what happens when they do Conversely why do some groups resist culture change and how do some manage to combine novel and more traditional cultural components Figuring out how better to understand why groups or societies change their minds or refuse to do so provides a crucial perspective on human behaviors and values As the first book to explore this important question Cultural Change in Modern World History is a ground breaking text for students of world history cultural history and anthropology

*Studies in Irreversibility* Benjamin Schreier, 2009-10-02 The premise of *Studies in Irreversibility* Texts and Contexts is that there is a big difference between phenomena practices processes and events that are irreversible and those that are reversible and moreover that this difference and its manifold implications remain underappreciated so long as the analysis of culture continues to anchor itself in an emphasis on the capacities of human agency If messianic modes posit a future to justify the present and so interpret the influence of the past the papers in this collection are devoted to examining the present of experience from the perspective of its uncompromising and irreducible past finding in irreversibility a key to an interpretation of futurity Together these papers outline a method of examining experience as something more or at least other than the desire to know it and in so doing they shed light on the powerful role of normativity in the narratives we construct in and about culture Through novel analyses from the disciplines of literature art criticism history philosophy ethnic studies and ethics the contributors to this book address key questions about the nature of irreversibility What differentiates the experience of the irreversible from the experience of the reversible How is irreversibility recognized What happens when we acknowledge something to be irreversible How has society contended with irreversibility and what sorts of tools exist today to interpret its significance Wary of impetuously fixing the meaning of a still elusive concept this volume collects papers that employ a wide array of methodologies mindful that no one critical approach may yet have proved itself Irreversibility is not simply a quality of the texts examined in this volume nor is it strictly speaking a lens through which otherwise coherent or stable texts are examined rather it emerges as a model that brings together texts and the thinking of them By together outlining a method of examining culture that moves beyond reliance on tropes such as functionalism teleology and chance tropes that have dominated twentieth century cultural analysis these papers help to inaugurate a new paradigm in the study of culture
