Public Policy in International Economic Law Diane Desierto, 2015-02-19 States reject inequality when they choose to ratify the International Covenant on Economic Social and Cultural Rights ICESCR but to date the ICESCR has not yet figured prominently in the policy calculus behind States' international economic decisions This book responds to the modern challenge of operationalizing the ICESCR particularly in the context of States' decisions within international trade finance and investment Differentiating between public policy mechanisms and institutional functional mandates in the international trade finance and investment systems this book shows legal and policy gateways for States to feasibly translate their fundamental duties to respect protect and fulfil economic social and cultural rights into their trade finance and investment commitments agreements and contracts It approaches the problem of harmonizing social protection objectives under the ICESCR with a State's international economic treaty obligations from the designing and interpreting international treaty texts up to the institutional monitoring and empirical analysis of ICESCR compliance In examining public policy options the book takes into account around five decades of States' implementation of social protection commitments under

I Kissed My Wounded Heart Goodbye James Cribari,2005-05

Official Reports of the Debates of the House of Commons of the Dominion of Canada Canada. Parliament. House of Commons,1907

The Development of Human Rights Law by the Judges of the International Court of Justice Shiv R.S. Bedi,2007-01-18 The jurisprudence of the International Court of Justice generally demonstrates that no rule of international law can be interpreted and applied without regard to its innate values and the basic principles of human rights Through its case law the ICJ has made immense contributions to the development of human rights law and in so doing continues to provide solutions to mounting international problems such as terrorism and unilateral use of force Part I of the book argues that the legislative spirit of contemporary international law lies in the doctrine of human rights and that the spirit of human rights doctrine lies in the principle of human dignity Furthermore it argues that the processes of international legislation and international adjudication are inseparable and that there is no norm of international law which does not intertwine the fundamental principle of human dignity with human rights doctrine Hence human rights law is more a school of law than merely a normative branch of international law and the ICJ s willingness to engage in the development of human rights law depends upon which judicial ideology its judges subscribe to In order to evaluate how this human rights spirit is manifested or occasionally not manifested through the vast jurisprudence of the ICJ Parts II and III critically examine the Court s principal contentious and advisory cases in which it has treated human rights questions The legal reasoning of the Court and the opinions appended to its decisions by its individual judges are analysed in light of the principle of human dignity and the doctrine of human rights

Modernizing the Role of the International Court of Justice Bertrand Ramcharan,2022-03-16 This book discusses the future role of the International Court of Justice ICJ in a world facing survival challenges It discusses threats such as climate change environmental degradation and pandemics and argues that in the future the ICJ will need to carry out judicial security and protection functions as it is the only organ of the United Nations UN that can discharge such functions in view of its independence and expertise The author proposes that the ICJ can apply a hitherto unused jurisdictional provision in Article 36 of its statute that allows it to deal with All Matters Specially Provided for in the UN Charter and presents three examples of issues that would require the urgent attention of the ICJ vaccine equity in a global pandemic climate disaster and mass movements of people across frontiers due to climate change and environmental

American Health Care Roger D. Feldman, President Clinton s health care reform proposals of 1993 represented the most far reaching program of social engineering attempted in the United States since the passage of Medicare and Medicaid in 1965 Under the guise of reforming the health care system the Clinton plan would have herded almost all Americans under age sixty five into large government sponsored health insurance purchasing alliances that would have contracted with insurers to offer a standard set of benefits at regulated prices The plan came under fire from both Republicans and Democrats including moderates from both parties but it soon became apparent that what doomed it was a public unwilling to trust government to manage their health care The critical literature has failed to offer a cogent analysis of why government control of health care does not work *American Health Care* delivers that analysis This volume examines why untoward consequences usually follow when government sets out to do good things The contributors demonstrate how hospital rate regulation raises hospital prices that no fault medical malpractice increases the occurrence of faulty medicine and that FDA regulation is a major cause for the escalating cost of new drugs Part 1 trace the genesis of Medicare and its later developments and argue the consumer advantages of medical savings accounts and written health contracts Part 2 explore the fallacies of antitrust policies that serve the interests of competitors attack community rating for making health insurance unaffordable to large numbers of young workers Part 3 contains a powerful critique of the FDA for withholding vital information on the health benefits of aspirin and shows how HMOs and other plans have caused pharmaceutical marketing to shift its focus from medical effectiveness to cost effectiveness The final section explores how the private sector is improving in the areas of regulating physician and other health professional fees and the supply and quality of health professionals *American Health Care* proposes reasonable balances between government and market options for in supply of health services Without denying the need for some governmental action the contributors show how far the market can go farther in performing critical functions in the health care industry This volume will be important reading for health policymakers economists and health care professionals Roger Feldman is professor at the Institute for Health Services Research University of Minnesota Mark V Pauly is professor in the Department of Health Care Systems of the Wharton School University of Pennsylvania

The Law of Nations in Global History C. H. Alexandrowicz, 2017-03-31 The history and

theory of international law have been transformed in recent years by post colonial and post imperial critiques of the universalistic claims of Western international law The origins of those critiques lie in the often overlooked work of the remarkable Polish British lawyer historian C H Alexandrowicz 1902-75 This volume collects Alexandrowicz's shorter historical writings on subjects from the law of nations in pre colonial India to the New International Economic Order of the 1970s and presents them as a challenging portrait of early modern and modern world history seen through the lens of the law of nations The book includes the first complete bibliography of Alexandrowicz's writings and the first biographical and critical introduction to his life and works It reveals the formative influence of his Polish roots and early work on canon law for his later scholarship undertaken in Madras 1951-61 and Sydney 1961-67 and the development of his thought regarding sovereignty statehood self determination and legal personality among many other topics still of urgent interest to international lawyers political theorists and global historians
