In addition to having a nucleus, animal cells also contain other membrane-bound organelles, or tiny cellular structures, that carry out specific functions necessary for normal cellular operation. Organelles have a wide range of responsibilities that include everything from producing hormones and enzymes to providing energy for animal cells.

Animal cells are the basic unit of life in organisms of the kingdom Animalia. Plants, fungi, and protists all have eukaryotic cells, while bacteria and archaea have simpler prokaryotic cells. Animal cells
