*Longhorn Beetles (Coleoptera, Cerambycidae) of Fennoscandia and Denmark* S. Bílý, O. Mehl, 2023-12-28 [The Royal Entomological Society Book of British Insects](#) Peter C. Barnard, 2011-10-24 The Royal Entomological Society RES and Wiley Blackwell are proud to present this landmark publication celebrating the wonderful diversity of the insects of the British Isles and the work of the RES founded 1833 This book is the only modern systematic account of all 558 families of British insects covering not just the large and familiar groups that are included in popular books but even the smallest and least known It is beautifully illustrated throughout in full colour with photographs by experienced wildlife photographers to show the range of diversity both morphological and behavioural among the 24 000 species All of the 6 000 genera of British insects are listed and indexed along with all the family names and higher groups There is a summary of the classification biology and economic importance of each family together with further references for detailed identification All species currently subject to legal protection in the United Kingdom are also listed The Royal Entomological Society is one of the oldest and most prestigious of its kind in the world It is the leading organisation for professional entomologists and its main aim has always been the promotion of knowledge about insects The RES began its famous Handbooks for the Identification of British Insects in 1949 and new works in that series continue to be published The Royal Entomological Society Book of British Insects has been produced to demonstrate the on going commitment of the RES to educate and encourage each generation to study these fascinating creatures This is a key reference work for serious students of entomology and amateur entomologists as well as for professionals who need a comprehensive source of information about the insect groups of the British Isles they may be less familiar with [Cerambycidae of the World](#) Qiao Wang, 2017-01-06 There are more than 36 000 described species in the family Cerambycidae in the world With the significant increase of international trade in the recent decades many cerambycid species have become major plant pests outside their natural distribution range causing serious environmental problems at great cost Cerambycid pests of field vine and tree crops and of forest and urban trees cost billions of dollars in production losses damage to landscapes and management expenditures worldwide Cerambycidae of the World Biology and Pest Management is the first comprehensive text dealing with all aspects of cerambycid beetles in a global context It presents our current knowledge on the biology classification ecology plant disease transmission and biological cultural and chemical control tactics including biosecurity measures from across the world Written by a team of global experts this book provides an entrance to the scientific literature on Cerambycidae for scientists in research institutions primary industries and universities and will serve as an essential reference for agricultural and quarantine professionals in governmental departments throughout the world **The Collembola of Fennoscandia and Denmark, Part I: Poduromorpha** Arne Fjellberg, 2024-03-11 This is the first part of a multivolume monograph dealing with the about 400 species of springtails

Collembola which are known to occur in the Nordic countries including the Arctic Islands Volume 1 contains richly illustrated identification keys and full descriptions of 161 species of the section Poduromorpha The geographical distribution and the preferred natural habitats of the species are summarised New morphological concepts in species diagnostics are introduced in particular concerning the mouthparts morphology which greatly aids in precise identification of the many difficult species of the family Onychiuridae The book will be indispensable to everyone working with springtail identification in northern Europe The introduction of new diagnostic characters will be of universal interest to any Collembola taxonomist

*Catalogue of Palaearctic Coleoptera* Ivan Löbl, 2003 This is the sixth volume of a comprehensive series which covers about 100 000 species of Coleoptera known to occur in the Palaearctic Region The information provided for each species is as follows primary taxonomic information of all available names in the genus and species levels published by the end of 1999 the taxonomic information below subfamily organized alphabetically and the type species of genera and subgenera including synonyms Distributional data of species and subspecies is given per country Detailed distributional information for strict endemics is provided and introduced species are indicated The series is a collective work of about one hundred coleopterists from Europe Japan America and Australia *Identifying British Insects and Arachnids* Peter Charles Barnard, 1999-04-15

Essential guide to the specialist literature for the identification of British insects and arachnids **Fauna Entomologica Scandinavica** Societas Entomologica Scandinavica, 1992 **Provisional Atlas of the Longhorn Beetles (Coleoptera, Cerambycidae) of Britain** P. F. G. Twinn, 1999 Chrysomeloidea I (Vesperidae, Disteniidae, Cerambycidae), 2020-11-04 The aim of Catalogue of Palaearctic Coleoptera is to provide a tool that addresses the most urgent needs 1 a complete list of available names of taxa occurring in the Palaearctic Region with authors and publications dates 2 a list of references to primary publications 3 distributions of the species and subspecies Thus the Catalogue is expected to respond to questions related to biodiversity and to increase the badly needed nomenclatural stability The present updated and revised Catalogue is a collective international work by 12 authors from Austria Belgium China Korea Japan and Russia It includes about 6453 species names of 913 genera The general structure and the taxonomic distributional and bibliographical information of the first edition of the Catalogue are followed with minor changes *Morphology and Systematics* Richard A.B. Leschen, Rolf G. Beutel, 2014-04-01 Northern Emporium Søren M. Sindbæk, 2022-07-01 In the early Middle Ages a network of maritime trading towns emporia emerged along the northern coasts of Europe These early urban sites are among archaeology's most notable contributions to our knowledge of the period between the disintegration of the Western Roman Empire and the growth of a maritime oriented world in the Viking Age Ribe on the western coast of Denmark is one of these sites In 2017-18 the Northern Emporium research project conducted seminal research excavations which provided new foundations for the study of this nodal point between Western Europe Scandinavia and the world beyond This first volume presents the results of these excavations and analyses to piece together the history of the emporium and its social fabric The research employs

novel high definition methods to explore the networks of the site integrating an extensive use of geoarchaeology and 3D stratigraphic recording with intensive environmental sampling and artefact recovery resulting in more than 100 000 artefact finds The results transform our understanding of key points of the early history of the North Sea region Through the remains of dwellings and workshops the traces left by traders sailors weavers tailors comb makers and skilled producers of glass beads and metal ornaments we follow the creation of Viking Age social networks along with some of the most iconic artistic products of this world and the daily lives of some of its notable inhabitants

Entomologica Fennica ,1990 The journal will publish principally Finnish entomological investigations on ecology faunistics behavior and systematics of insects and other terrestrial arthropods

Traces of Common Xylophagous Insects in Wood Magali Toriti,Aline Durand,Fabien Fohrer,2021-07-21 This atlas presents a concrete tool to identify xylophagous activity by the remains they left in wooded areas in Western Europe Xylophagous insects are among the largest predators of woody tissues They leave discriminating traces different for each species according to their bioecology and so it is necessary to know how to recognize and characterize them The book is a practical tool to help identify and interpret them through a standardized presentation of the most ubiquitous families and a key to their determination It presents descriptions of the galleries and of morphometry of the faecal pellets based on macroscopic features for xylophagous identification and includes information about the origin and distribution of the xylophagous biological cycles bioclimatic conditions and bioecology and the type of woods that are attacked The book will be a useful guide for forest managers heritage conservationists environmental engineers bioarchaeologists entomologists loggers and wood anatomists
