Looking Good And Doing Good Corporate Philanthropy And Corporate Power By Himmelstein:

Looking Good and Doing Good Jerome L. Himmelstein, 1997-05-22 Political controversy is a lens through which the author examines corporate philanthropy. He explains why corporate philanthropy has become politicized, how corporations respond to controversy about their donations, and what the conflicts tell us about corporate philanthropy and corporate politics. Himmelstein argues that corporate giving sometimes becomes politicized because it is inherently a complex social and political act. Drawing on in-depth interviews with managers at fifty-five of the largest corporate giving programs in the U.S., Himmelstein shows that corporate giving often finds itself as one manager put it, locked in a struggle between looking good and doing good. Communication in International Development Florencia Enghel, Jessica Noske-Turner, 2018-05-23 International development stakeholders harness communication with two broad purposes: to do good via communication for development and media assistance, and to communicate, do gooding via public relations and information. This book unpacks various ways in which different efforts to do good are combined with attempts to look good, be it in the eyes of donor constituencies at large or among more specific

audiences such as journalists or intra agency decision makers Development communication studies have tended to focus primarily on interventions aimed at doing good among recipients at the expense of examining the extent to which promotion and reputation management are elements of those practices This book establishes the importance of interrogating the tensions generated by overlapping uses of communication to do good and to look good within international development cooperation The book is a critical text for students and scholars in the areas of development communication and international development and will also appeal to practitioners working in international aid who are directly affected by the challenges of communicating for and about development

Ginsburgh,David Throsby,2006-09-13 Over the last 30 or 40 years a substantial literature has grown up in which the tools of economic theory and analysis have been applied to problems in the arts and culture Economists who have surveyed the field generally locate the origins of contemporary cultural economics as being in 1966 the year of publication of the first major work in modern times dedicated specifically to the economics of the arts It was a book by Baumol and Bowen which showed that economic analysis could illuminate the supply of and demand for artistic services the contribution of the arts sector to the economy and the role of public policy Following the appearance of the Baumol and Bowen work interest in the economics of the arts grew steadily embracing areas such as demand for the arts the economic functions of artists the role of the nonprofit sector and other areas Cultural economics also expanded to include the cultural or entertainment industries the media movies the publishing industry popular music as well as heritage and museum management property right questions in particular copyright and the role of new communication technologies such as the internet The field is therefore located at the crossroads of several disciplines economics and management but also art history art philosophy sociology and law The Handbook is placed firmly in economics but it also builds bridges across these various disciplines and will thus be of interest to researchers in all these different fields as well as to those who are engaged in cultural policy issues and the role of culture in the development of our societies Presents an overview of the history of art markets Addresses the value of art and consumer behavior toward

Regulating Multinationals in Developing Countries Edwin Mujih, 2016-04-08 Edwin Mujih explores the difficulties associated with regulating multinational companies operating in developing countries with a particular focus on extractive industries The author highlights the need to establish an international legally binding framework to ensure that multinationals operate in a socially responsible manner to protect local communities and the environment Edwin Mujih's analysis reveals that the existing mechanisms for controlling the behaviour of huge multinational entities are of normative force only that these are particularly inadequate and that the notion of corporate social responsibility is only meaningful where behaviour can be legally regulated *Regulating Multinationals in Developing Countries* features a study of the Chad and Cameroon Oil and pipeline project which highlights the problems arising in countries that have neither the capacity nor the will to effectively regulate those operating within their borders The author has evaluated compliance by the parties with their social and environmental obligations He has found that despite controversy surrounding inadequate regulation of this project in its incipient stages the system that was put in place following huge opposition from the affected communities and from NGOs is worthy of attention and could stand as a model for similar projects elsewhere This first title in Gower's Corporate Social Responsibility Series to approach CSR from a legal perspective provides insight not just into the complexity surrounding efforts to regulate multinationals operating in countries with weak regulatory regimes but also into the fundamental nature of multinational corporations and the debate about different notions of CSR itself

The Drug Company
Next Door Alexa S. Dietrich, 2013-06-07 This fascinating and most timely critical medical anthropology study successfully binds two still emergent areas of contemporary anthropological research in the global world the nature and significant impact of multinational pharmaceutical manufacturers on human social life everywhere and the contribution of corporations to the fast paced degradation of our life support system planet Earth Focusing on a pharmaceutically impacted town on the colonized island of Puerto Rico Dietrich ably demonstrates the value of ethnography carried out in small places in framing the large issues facing humanity Merrill Singer University of Connecticut The production of pharmaceuticals is among the most profitable industries on the planet Drug companies produce chemical substances that can save extend or substantially improve the quality of human life However even as the companies present themselves publicly as health and environmental stewards their factories are a significant source of air and water pollution toxic to people and the environment In Puerto Rico the pharmaceutical industry is the backbone of the island's economy in one small town alone there are over a dozen drug factories representing five multinationals the highest concentration per capita of such factories in the world It is a place where the enforcement of environmental regulations and the public trust they ensure are often violated in the name of economic development *The Drug Company Next Door* unites the concerns of critical medical anthropology with those of political ecology investigating the multi faceted role of pharmaceutical corporations as polluters economic providers and

social actors Rather than simply demonizing the drug companies the volume explores the dynamics involved in their interactions with the local community and discusses the strategies used by both individuals and community groups to deal with the consequences of pollution The Drug Company Next Door puts a human face on a growing set of problems for communities around the world Accessible and engaging the book encourages readers to think critically about the role of corporations in everyday life health and culture Alexa S Dietrich is Assistant Professor of Anthropology at Wagner College

DeBoer,2011-01-01 The goal of this volume of Research in Science Education is to examine the relationship between science education policy and practice and the special role that science education researchers play in influencing policy It has been suggested that the science education research community is isolated from the political process pays little attention to policy matters and has little influence on policy But to influence policy it is important to understand how policy is made and how it is implemented This volume sheds light on the intersection between policy and practice through both theoretical discussions and practical examples This book was written primarily about science education policy development in the context of the highly decentralized educational system of the United States But because policy development is fundamentally a social activity involving knowledge values and personal and community interests there are similarities in how education policy gets enacted and implemented around the world This volume is meant to be useful to science education researchers and to practitioners such as teachers and administrators because it provides information about which aspects of the science education enterprise are affected by state local and national policies It also provides helpful information for researchers and

practitioners who wonder how they might influence policy In particular it points out how the values of people who are affected by policy initiatives are critical to the implementation of those policies
