Tateo, 2019-05-28 This book advances our theoretical understanding of the human experience By overcoming dualities such
as the relationship between reflection and action it allows a more in depth analysis of how concepts constitute
complementary parts of the complex human thinking to be developed Presenting texts written by leading philosophers and
psychologists it provides a comprehensive overview of the current state of theoretical elaboration which is then used to
discuss the place and value of reflection in moral and epistemic scenes These topics are accessible to experts and young
scholars in the field alike and offer scope for further reflections that could improve our understanding beyond the existing
models and isms The novelty of the book is in the dialogue established between several perspectives e g philosophers and
psychologists Europe America and Asia etc The contributions of philosophers and psychologists establish a fruitful dialogue
