**Markets, Uncertainty and Decision-making** Engelbertus Franciscus Maria Wubben,1993      Markets, Uncertainty and Decision-making Emiel F. M. Wubben,1993      *New Perspectives on Austrian Economics* Gerrit Meijer,2008-03-07 In recent years there has been a spectacular revival of interest in the economics of the Austrian school *New Perspectives on Austrian Economics* includes A keynote chapter by Israel Kirzner on the question of subjectivism within Austrian Economics Chapters on Menger Hayek and Schumpeter the Socialist Calculation debate Austrian perspectives on key theoretical issues including Uncertainty and Business Cycle Theory the policy implications of Austrian economics      **Beyond the Market** Jens Beckert,2009-01-10 *Beyond the Market* launches a sociological investigation into economic efficiency Prevailing economic theory which explains efficiency using formalized rational choice models often simplifies human behavior to the point of distortion Jens Beckert finds such theory to be particularly weak in explaining such crucial forms of economic behavior as cooperation innovation and action under conditions of uncertainty phenomena he identifies as the proper starting point for a sociology of economic action Beckert levels an enlightened critique at neoclassical economics arguing that understanding efficiency requires looking well beyond the market to the social cultural political and cognitive factors that influence the coordination of economic action Beckert searches social theory for the components of an alternative theory of action one that accounts for the social embedding of economic behavior In Durkheim and Parsons he finds especially useful approaches to cooperation in Luhmann a way to understand how people act under highly contingent conditions and in Giddens an understanding of creative action and innovation Together these provide building blocks for a research program that will yield a theoretically sophisticated understanding of how economic processes are coordinated and the ways that markets are embedded in social cultural and cognitive structures Containing one of the most fully informed critiques of the neoclassical analysis of economic efficiency as well as one of the most thoughtful blueprints for economic sociology this book reclaims for sociology the study of one of the most important arenas of human action      Critical Management Research in Eastern Europe M. Kelemen,M. Kostera,2002-10-23 The process of transition in Eastern European countries is one in which ideas of the past and present both local and Western meet and conflict Presenting a wealth of new ethnographic and interview based research *Critical Management Research in Eastern Europe* argues that the reform process in Central and Eastern Europe has been dominated by the traditional Western view of management practice However this approach overlooks the fact that certain managerial and organizational practices developed in Central and Eastern Europe may still be appropriate and indeed effective within this particular setting The book brings together authors from both East and West Europe to evaluate how the two systems can best be harmonized which is particularly important in the context of EU enlargement      A Symmetric Approach to the Labor Market Evelien Eggink,1994      *Artificial Intelligence: Anthropogenic Nature vs. Social Origin* Elena G. Popkova,Bruno S. Sergi,2020-02-22 This book presents advanced research studies on the topic of artificial

intelligence as a component of social and economic relations and processes It gathers research papers from the International Research to Practice Conference The 21st Century from the Positions of Modern Science Intellectual Digital and Innovative Aspects May 23 24 2019 Nizhny Novgorod Russia and the International Research to Practice Conference Economics of Pleasure a Science of Enjoying Economic Activities October 3 5 2019 Prague Czech Republic Both conferences were organized by the Autonomous Non Profit Organization Institute of Scientific Communications Volgograd What sets this book apart from other publications on the topic of artificial intelligence is that it approaches AI not as a technological tool but as an economic entity Bringing together papers by representatives of various fields of social and human knowledge it systematically reflects on various economic social and legal aspects of the creation application and development of artificial intelligence Given the multidisciplinary nature of its content the book will appeal to a broad target audience including those engaged in developing AI scientific research institutes and universities and Industry 4 0 enterprises interested in its implementation as well as state regulators for the digital economy

**Uncertainty in Economics** Peter Diamond, Michael Rothschild, 2014-05-10 Uncertainty in Economics Readings and Exercises provides information pertinent to the fundamental aspects of the economics of uncertainty This book discusses how uncertainty affects both individual behavior and standard equilibrium theory Organized into three parts encompassing 30 chapters this book begins with an overview of the relevance of expected utility maximization for positive and normative theories of individual choice This text then examines the biases in judgments which reveal some heuristics of thinking under uncertainty Other chapters consider the effect of restricting trade in contingent commodities to those trades that can be affected through the stock and bond markets This book discusses as well the individual problem of sequential choice and equilibria which are built around the notion of sequential choice The final chapter deals with an entirely different aspect of the economics of information and reverts to the assumption that markets are perfect and costless This book is a valuable resource for economists and students

*On the Theory and Measurement of Comparative Advantage* Olga Memedović, 1994 This is a thoroughly revised in depth analysis of the American presidency by a major scholar in the field The main goal of the text is to explain how the president's ability to implement policy is circumscribed by several major factors the Madisonian separation of powers the decentralized power structure in Congress the number of cross party coalitions needed to pass legislation a slow moving federal bureaucracy and the powerful influence of special interest groups opposed to many presidential initiatives Included in this second edition is coverage of the first two years of the Clinton presidency and a special chapter on the emergence of the presidential branch the White House staff and its displacement of the cabinet and the executive departments as the foremost decision making agents in the federal government a unique chapter not found in other texts Since highly unstable relations between the president and congress have become the hallmark of our national government especially in this era of divided government a new chapter on the president and congress has been added to the text The growing role of the vice president an original

chapter in the first edition has been expanded and updated to include the Gore vice presidency The chapter on proposed reforms of the presidency received wide approval in the first edition In the second edition special attention is devoted to the proposal to abolish the Electoral College and replace it with direct election of the president This edition focuses heavily on the activist presidential leadership of the modern presidency but notes its perishable nature High presidential approval ratings as George Bush demonstrated cannot be stockpiled or deposited in the bank to be drawn upon later Along the way the author makes several major points 1 the excessive demands that the American public imposes on its presidents threaten to turn the nation's highest office into a series of one term presidents 2 the decline of political parties as vehicles for mobilizing presidential support has forced the nation's chief executive to go over the heads of congress and directly to the public to solicit support for his policies and 3 the emerging dangers of electronic democracy and national referenda and the potential rise of a plebiscitary president all pose more imminent threats to our shared powers system than most presidential watchers have been willing to concede The Creation of Meaning in Advertising Marian Dingen, 1994 Based on the results of these studies recommendations for further research and implications for advertising practice are formulated

The Internationalisation of the Spanish Automobile Industry and Its Regional Impact Arnoud Lagendijk,1993 This study is a contribution to this organisational approach of spatial industrial change The first part of the study is devoted to the development of a dynamic theory of location of production featuring the concept of the growth periphery The second part discusses a specific case of a growth periphery namely the rise of the automobile industry in Spain highlighting the changes in the industrial and spatial organisation of the industry induced by increasing internationalisation of production

*Energizing Management Through Innovation and Entrepreneurship* Milé Terziovski,2008-09-04 This book provides an in depth understanding of key variables that play a significant role at the various stages of the innovation process leading to successful commercialisation of products and services Combining interdisciplinary studies in entrepreneurship and innovation the book consists of contributions focusing on theory research and practise in the field of innovation management and entrepreneurship The role of the entrepreneur is addressed as an innovator who recognises opportunities and convert these into marketable products and services through personal commitment financial resources and management skill taking appropriate level of risk Terziovski has selected a variety of chapters focusing on a wide ranging number of topics including corporate entrepreneurship entrepreneurial learning strategies the impact of entrepreneurial practises on competitiveness human resource management and knowledge management The main conclusion of the analysis in these chapters is that there is a strong relationship between innovation and entrepreneurship Moreover this book articulates two contradictory schools of thought first that firms with a higher entrepreneurial orientation have higher relative international sales and operate in a greater number of foreign

countries and secondly that entrepreneurial orientation is not associated with subsidiary financial or market performance but is positively and significantly associated with subsidiary idea generation which are subsequently converted into marketable products and services through the innovation process This book acts as a negotiation between these two perspectives
