**White Innocence** Gloria Wekker, 2016-04-07 In *White Innocence* Gloria Wekker explores a central paradox of Dutch culture the passionate denial of racial discrimination and colonial violence coexisting alongside aggressive racism and xenophobia Accessing a cultural archive built over 400 years of Dutch colonial rule Wekker fundamentally challenges Dutch racial exceptionalism by undermining the dominant narrative of the Netherlands as a gentle and ethical nation Wekker analyzes the Dutch media's portrayal of black women and men the failure to grasp race in the Dutch academy contemporary conservative politics including gay politicians espousing anti immigrant rhetoric and the controversy surrounding the folkloric character Black Pete showing how the denial of racism and the expression of innocence safeguards white privilege Wekker uncovers the postcolonial legacy of race and its role in shaping the white Dutch self presenting the contested

Meijer, 2009 The relation between Islam and the West is the topic of an ongoing debate The debate often leaves us with a choice between two mutually exclusive worlds the modern West with its enlightenment and science and accompanying secular education or else Islam and Islamic education characterised by orthodoxy and tradition In the hope of promoting dialogue instead of polarisation the author a philosopher of education trained in the West searches for the ideas and ideals of education schooling and learning within Islam Wherever knowledge and learning have blossomed education schooling and teaching must have flourished too Which educational culture was part of the highly developed intellectual culture of classical Islam Current day modernist Muslim intellectuals take inspiration from this rich intellectual tradition of Islam The perspective on the future of Islamic education in the modern context in which the book results utilizes their ideas Hermeneutics the theory of interpretation is applied to the rereading and reinterpretation of the source texts of Islam Hermeneutics also offers an inspiring perspective on an education that strikes the balance between tradition and enlightenment      *Daders van groepsverkrachting. *Researching Religious Education: Classroom Processes and Outcomes* Friedrich Schweitzer, Reinhold Boschki, 2017 The question of how research on structures and outcomes in Religious Education can be carried out successfully is of current interest in many countries Next to the more traditional historical analytical and more recently international comparative approaches empirical research in religious education has been able to establish itself as a major approach to this field Moreover the contemporary discussion about comparative evaluation in schools has raised a number of questions which also refer to Religious Education What competences can pupils acquire in this subject Does Religious Education really support the acquisition and development of the competences aspired Are there differences in this respect between different forms of Religious Education or between different approaches to teaching With contributions from eight European countries the volume brings together approaches and research experiences that try to follow this lead by offering new and empirically based perspectives for the future improvement of teaching and learning in this school subject Whoever is interested in improving the practice of Religious Education then will not be able to bypass the question of researching processes and outcomes an insight which also refers to a small but growing number of studies in this field which can be identified in several countries
