No Return George Applegate, 2013-12-04 No one has ever returned from Mars Travel to and from the colony a private venture mounted by a consortium of Muslim investors has been embargoed since the Martian Fungus began decimating Earth's oceans Written off by its investors the Mars colony struggles to survive on its own The ecological disaster on Earth has caused famine and triggered political upheavals including the reemergence of an Islamic caliphate The colony whose residents are overwhelmingly Muslim has fallen under sharia law Eric Issa the colony's infidel Safety Officer investigates a bizarre death and uncovers a high level conspiracy that may explain how the Martian organism contaminated Earth He must quickly yet quietly identify the killer piece together the conspiracy and save his own skin all the while protecting the dead man's orphaned daughter who may hold the key to controlling the Martian Fungus on Earth A short story

Ambivalences of Creating Life Kristin Hagen, Margret Engelhard, Georg Toepfer, 2015-08-27 Synthetic biology is the label of a new technoscientific field with many different facets and agendas One common aim is to create life primarily by using engineering principles to design and modify biological systems for human use In a wider context the topic has become one of the big cases in the legitimization processes associated with the political agenda to solve global problems with the aid of bio technological innovation Conceptual level and meta level analyses are needed we should sort out conceptual ambiguities to agree on what we talk about and we need to spell out agendas to see the disagreements clearly The book is based on the interdisciplinary summer school Analyzing the societal dimensions of synthetic biology which took place in Berlin in September 2014 The contributions address controversial discussions around the philosophical examination

public perception moral evaluation and governance of synthetic biology **NASA Technical Memorandum** ,1994

Research and Technology Objectives and Plans Summary ,1993 A compilation of the summary portions of each of the RTOPs used for management review and control of research currently in progress throughout NASA P i Fourth Symposium on Chemical Evolution and the Origin and Evolution of Life Robert A. Jr Wharton,1991 This symposium was held at the NASA Ames Research Center Moffett Field California July 24 27 1990 The NASA Exobiology principal investigators reported their recent research findings Scientific papers were presented in the following areas cosmic evolution of biogenic compounds prebiotic evolution planetary and molecular early evolution of life biological and geochemical evolution of advanced life solar system exploration and the Search for Extraterrestrial Intelligence SETI The Origin and Early Evolution of Life Tom Fenchel,2002 Origin and Early Evolution of Life draws on evidence from molecular genetics the structure and function of extant organisms and geology It covers the period from about 4 billion years ago when life is thought to have originated to about 600 million years ago when multicellular organisms first arose There are significant gaps in our understanding of the earliest evolution of life forms but an insight into the topic leads to a more profound understanding of life itself Particular emphasis is placed on the fact that although life arose very soon after the origin of the Earth it was represented only by simple microbial life forms for approximately 85% of this time Increase in complexity beyond the microbial level took place only very late in the history of life *Looking for Life, Searching the Solar System* Paul Clancy,André Brack,Gerda Horneck,2005-06-23 Broad ranging book covering life its origins survival and the search for other life in the Solar System *A New History of Life* Peter Ward,Joe Kirschvink,2015-04-07 The history of life on Earth is in some form or another known to us all or so we think A New History of Life offers a provocative new account based on the latest scientific research of how life on our planet evolved the first major new synthesis for general readers in two decades Charles Darwin s theories first published more than 150 years ago form the backbone of how we understand the history of the Earth In reality the currently accepted history of life on Earth is so flawed so out of date that it s past time we need a New History of Life In their latest book Joe Kirschvink and Peter Ward will show that many of our most cherished beliefs about the evolution of life are wrong Gathering and analyzing years of discoveries and research not yet widely known to the public A New History of Life proposes a different origin of species than the one Darwin proposed one which includes eight foot long centipedes a frozen snowball Earth and the seeds for life originating on Mars Drawing on their years of experience in paleontology biology chemistry and astrobiology experts Ward and Kirschvink paint a picture of the origins life on Earth that are at once too fabulous to imagine and too familiar to dismiss and looking forward A New History of Life brilliantly assembles insights from some of the latest scientific research to understand how life on Earth can and might evolve far into the future *The Nature of Life* Mark A. Bedau,Carol E. Cleland,2018-11-22 Introduces a broad range of scientific and philosophical issues about life through the original historical and contemporary sources *Soviet Life* ,1974-07
