in early Victorian Britain some fifty to seventy years after the actual work of Watt Cavendish and Lavoisier The central historical question to which the book addresses itself is why the priority claims of long dead natural philosophers so preoccupied a wide range of people in the later period The answer to the question lies in understanding the enormous symbolic importance of James Watt and Henry Cavendish in nineteenth century science and society More than credit for a particular discovery was at stake here When we examine the various agenda of the participants in the Victorian phase of the water controversy we find it driven by filial loyalty and nationalism but also most importantly by ideological struggles about the nature of science and its relation to technological invention and innovation in British society At a more general theoretical level this study also provides important insights into conceptions of the nature of discovery as they are debated by modern historians philosophers and sociologists of science \*\*Creations to Burn\*\* Robynne Eagan, 2008-09-01 A little science a little arts and crafts a little math a lot creative and a whole lot of fun This packet is full of activities and ideas that give free reign to students curiosity and stretch their creativity There are opportunities to investigate create and discover in all areas of the curriculum Clear step by step instructions make the activities easy and fun for students while the aims and objectives extension activities and assessment tools make it a helpful resource for teachers
