Stalin's forays into scholarship can be understood only within the context of international tensions institutional conflicts and the growing uncertainty about the proper relationship between scientific knowledge and Party dictated truths The nature of Stalin's interventions makes clear that more was at stake than high politics these science wars were about asserting that the Party was rational and modern and about codifying the Soviet worldview in a battle for the hearts and minds of people around the globe during the early Cold War Ultimately however the effort to develop a scientific basis for Soviet ideology undermined the system's legitimacy

*Beyond the Science Wars* Ullica Christina Olofsdotter Segerstråle,Ullica Segerstråle,2000-08-03 Contextualizes the Science Wars from interdisciplinary sociological historical scientific political and cultural perspectives

*Science Studies during the Cold War and Beyond* Elena Aronova,Simone Turchetti,2016-09-24 This book examines the ways in which studies of science intertwined with Cold War politics in both familiar and less familiar battlefields of the Cold War Taken together the essays highlight two primary roles for science studies as a new field of expertise institutionalized during the Cold War in different political regimes Firstly science studies played a political role in cultural Cold War in sustaining as well as destabilizing political ideologies in different political and national contexts Secondly it was an instrument of science policies in the early Cold War the studies of

science were promoted as the underpinning for the national policies framed with regard to both global geopolitics and local national priorities. As this book demonstrates, however, the wider we cast our net extending our histories beyond the more researched developments in the Anglophone West, the more complex and ambivalent both the science studies and the Cold War become outside these more familiar spaces. The national stories collected in this book may appear incommensurable with what we know as science studies today, but these stories present a vantage point from which to pluralize some of the visions that were constitutive to the construction of Cold War as a juxtaposition of the liberal democracies in the West and the communist East.

Western Marxism Domenico Losurdo, 2024-09-17 A stinging critique of Western Marxism counterposing its complicity with imperialist logic against a resurgent anti imperialism. *Western Marxism: How It Was Born, How It Died, How It Can Be Reborn* is a paradigm shifting book that provides a trenchant critique of the Western left intelligentsia. It reveals how its dominant ideological orientation, characterized by defeatism, utopianism, and anti communism, is rooted in the political economy of imperialism. Internationally acclaimed theorist Domenico Losurdo thus provides a fresh and challenging perspective on purportedly radical thinkers who have been widely promoted in the imperial core, including those affiliated with the Frankfurt School, French Theory, and operaismo, as well as Hannah Arendt, Giorgio Agamben, Michael Hardt, and Slavoj Žižek among others. His critique also has wide reaching implications for trend setting discourses inspired by this coterie of intellectuals, from postcolonial and decolonial theory to subaltern studies and beyond. Far from being a negative undertaking, however, this book is grounded in the positive project of reigniting anti imperialist Marxism. As a complement to the Italian edition of *Western Marxism*, this first ever English translation also features the unprecedented publication of a major lecture that demystifies Western Marxism and its role in imperialists' efforts to denigrate the achievements of actually existing socialism. Raising the stakes of what it means to produce critical theory, *Western Marxism* will surely provoke wide debate and a reevaluation of hallowed canons.

Marxism and Alienation Nicholas Churchich, 1990 An exposition and critique of the views of Marx and Marxists in which Marx's views are compared with other views and are explored in terms of theories, causes, and the transcendence of alienation, self alienation, and self realization, and economic, religious, philosophic, scientific, social, and political alienation.

Historicism and Its Problems Ernst Troeltsch, 2024-10-01 This is a translation of Ernst Troeltsch's last 1923 major work. It is an exhaustive study of the methods of historiography and of German, French, English, and Italian philosophies of history during the nineteenth century. It is motivated by the purpose of developing the proper concept of historical development for overcoming bad historicism, i.e. unlimited relativism, with good historicism, with relativity, not relativism, and determining how values drawn from history can be used to shape the future. It concludes with a sketch of the unwritten second volume on the material philosophy of history.
