Casebook of the Brief Psychotherapies
 Richard A. Wells, Vincent J. Giannetti, 2013-11-11

Following the publication of the *Handbook of the Brief Psychotherapies*, Wells and Giannetti, 1990, the editors began to conceptualize the idea of a collection of case studies encompassing a number of the commonly encountered clinical problems that have been treated with such approaches. *The Casebook of the Brief Psychotherapies* is the result. The Casebook details clinical interventions with client populations as diverse as substance abusers, torture victims, the physically handicapped, and other exceptional groups, and the economically disadvantaged, with emotional and behavioral problems, as well as individuals experiencing sexual dysfunction or eating disorders. In addition, topics such as bereavement, depression, anger, and many crucial aspects of marital and family therapy are discussed by eminent clinical practitioners. Although the cases draw heavily upon cognitive-behavioral and strategic structural formulations, psychodynamic, interpersonal, and experiential approaches are also included. The Casebook is clinically oriented, with a minimum of theory. Ample case material and commentary allow the reader to experience directly the application of brief therapy to specific client problems. What emerges from this compendium of approaches and problems is a tapestry of action-oriented problem-solving skill-building, rational approaches to therapy that balance the client's ability to change with the demands and limits of time.

Dynamic psychotherapy research has become revitalized, especially in the last three decades. This major study by Sidney Blatt, Richard Ford, and their associates evaluates long-term intensive treatment, hospitalization, and 4 times a week psychotherapy of very disturbed patients at the Austen Riggs Center. The center provides a felicitous setting for recovery: beautiful buildings on lovely wooded grounds just off the quiet main street of the New England town of Stockbridge, Massachusetts. The center, which has been headed in succession by such capable leaders as Robert Knight, Otto Will, Daniel Schwartz, and now Edward Shapiro, has been well known for decades for its type of intensive hospitalization and psychotherapy. Included in its staff have been such illustrious

contributors as Erik Erikson David Rapaport George Klein and Margaret Brenman The Rapaport Klein study group has been meeting there yearly since Rapaport's death in 1960 Although the center is a long term care treatment facility it remains successful and solvent even in these days of increasingly short term treatment Sidney Blatt Professor of Psychology and Psychiatry at Yale University and Richard Ford of the Austen Riggs Center and their associates assembled a sample of 90 patients who had been in long term treatment and who had been given initially and at 15 months a set of psychological tests including the Rorschach the Thematic Apperception Test a form of the Wechsler Intelligence Test and the Human Figure Drawings
