What We Mean by Experience Marianne

Janack, 2012-11-07 Social scientists and scholars in the humanities all rely on first person descriptions of experience to understand how subjects construct their worlds The problem they always face is how to integrate first person accounts with an impersonal stance Over the course of the twentieth century this problem was compounded as the concept of experience itself came under scrutiny First hailed as a wellspring of knowledge and the weapon that would vanquish metaphysics and Cartesianism by pragmatists like Dewey and James by the century's end experience had become a mere vestige of both a holdover from seventeenth century empiricist metaphysics This devaluation of experience has left us bereft unable to account for first person perspectives and for any kind of agency or intentionality This book takes on the critique of empiricism and the

skepticism with regard to experience that has issued from two seemingly disparate intellectual strains of thought anti foundationalist and holistic philosophy of science and epistemology Kuhn and Rorty in particular and feminist critiques of identity politics Both strains end up marginalizing experience as a viable corrective for theory and both share notions of human beings and cognition that cause the problem of the relation between experience and our theories to present itself in a particular way Indeed they render experience an intractable problem by opening up a gap between a naturalistic understanding of human beings and an understanding of humans as cultural entities as non natural makers of meaning Marianne Janack aims to close this gap to allow us to be naturalistic and hermeneutic at once Drawing on cognitive neuroscience the pragmatist tradition and ecological psychology her book rescues experience as natural contact with the world

Entrepreneurship as Experience Michael H. Morris, Christopher G. Pryor, Minet Schindehutte, 2012 Do entrepreneurs create ventures or do venture experiences create entrepreneurs The authors of Entrepreneurship as Experience propose that the answer is both This important volume examines how individuals experience the creation of a venture as it happens and how that experience determines the types of entrepreneur and venture that ultimately emerge In essence entrepreneurship is an experience consisting of large numbers of key events such as a first sale hiring a first employee losing a big account events that are processed and made sense of by the entrepreneur They produce cognitive emotional and physiological responses which impact decision making and behavior The result is an experience that is purposive diverse uncertain ambiguous and transformative and unique to each individual Here the authors argue that as experience unfolds both entrepreneur and venture are being constructed and emerge in unique forms This experiential view introduces an entirely new lens through which entrepreneurship can be examined Entrepreneurship as Experience comprises chapters dedicated to sociological anthropological and psychological research related to human experiencing the volume presents a new frame for understanding the role of emotions and feelings in venture creation and lays out a conceptual framework for understanding how real time experiencing informs the entrepreneurial process New insights are provided regarding how the entrepreneurial mindset and an entrepreneurial identity are formed and why entrepreneurs take on certain traits and develop certain competencies Further the authors put forth new approaches to conducting research on the

entrepreneurial experience Students advanced as well as undergraduate and scholars of entrepreneurship innovation strategy and management will find themselves turning often to the ideas and research presented here

Perspective in Whitehead's Metaphysics Stephen David Ross,1983-01-01 Stephen David Ross presents an extensive detailed and critical interpretation of Whitehead s mature thought emphasizing the fundamental role of perspective in Whitehead s cosmology and tracing the conflicts and difficulties therein to tensions involving perspective in relation to other central features of Whitehead s thought Ross isolates four principles as having a fundamental role in whitehead s metaphysics perspective cosmology experience and mechanical analysis He argues that many of Whitehead s difficulties can be eliminated by raising the principle of perspective to prominence and by revising the other central features of Whitehead s theory accordingly This book addresses key Whiteheadian texts and secondary interpretations of Whitehead The discussion ranges over most of Whitehead s theory in Process and Reality and offers a number of significant and in some cases novel views on different aspects of Whitehead s theory perception prehension causation objective immortality self causation the extensive continuum natural order possibility concreteness and God Ross s concluding suggestions for modifying Whitehead s system promise to occasion much debate among process philosophers theologians and anyone concerned with Whitehead s thought

The Cambridge Handbook of Sociocultural Psychology Jaan Valsiner,Alberto Rosa,2007-06-04 This book first published in 2007 is an international overview of the state of our knowledge in sociocultural psychology as a discipline located at the crossroads between the natural and social sciences and the humanities Since the 1980s the field of psychology has encountered the growth of a new discipline cultural psychology that has built new connections between psychology sociology anthropology history and semiotics The handbook integrates contributions of sociocultural specialists from fifteen countries all tied together by the unifying focus on the role of sign systems in human relations with the environment It emphasizes theoretical and methodological discussions on the cultural nature of human psychological phenomena moving on to show how meaning is a natural feature of action and how it eventually produces conventional symbols for communication Such symbols shape individual experiences and create the conditions for consciousness and the self to emerge turn social norms into ethics and set history into motion

Quality of Life: From Nursing and Patient Perspectives Cynthia R. King,Pamela S. Hinds,2011-05-24

Routledge Handbook of the Tourist Experience Richard Sharpley,2021-11-17 Routledge Handbook of the Tourist Experience offers a comprehensive synthesis of contemporary research on the tourist experience It draws together multidisciplinary perspectives from leading tourism scholars to explore emergent tourist behaviours and motivations This handbook provides up to date critical discussions of established and emergent themes and issues related to the tourist experience from a primarily socio cultural perspective It opens with a detailed introduction which lays down the framework used to examine the dynamic parameters of the tourist experience Organised into five thematic sections chapters seek to build and enhance knowledge and understanding of the significance and meaning of diverse elements of the tourist

experience Section 1 conceptualises and understands the tourist experience through an exploration of conventional themes such as tourism as authentic and spiritual experience as well as emerging themes such as tourism as an embodied experience Section 2 investigates the new developing tourist demands and motivations and a growing interest in the travel career Section 3 considers the significance motives practices and experiences of different types of tourists and their roles such as the tourist as photographer Section 4 discusses the relevance of place to the tourist experience by exploring the relationship between tourism and place The last section Section 5 scrutinises the role of the tourist in creating their experiences through themes such as transformations in the tourist role from passive receiver of experiences to co creator of experiences and external mediators in creating tourist experiences This handbook is the first to fill a notable gap in the tourism literature and collate within a single volume critical insights into the diverse elements of the tourist experience today It will be of key interest to academics and students across the fields of tourism hospitality management geography marketing and consumer behaviour

Children's Self-determination in the Context of Early Childhood Education and Services Federico Farini, Angela Scollan, 2019-06-26 This book investigates the position of young children's self determination within a range of social contexts such as education social care mass media health politics law and the family It brings to the fore the voices of the children in the present with their interests agendas and rights Based on original primary research the chapters tackle hegemonic discourses on children's self determination as well as current policies and practices They address a broad range of topics from the planning of role play to national policies from the use of digital technologies for pedagogy to children's health and well being and from democratic practices in the classroom to the preservation of traditional family values The book presents case studies to unravel how childhood and young children's self determination are constructed at the intersection with intergenerational relationships Coming from different disciplines and using a diverse range of methodological traditions the contributions in the volume eventually converge to generate a rich complex and multi layered analysis of contemporary cultures of childhood and young children's rights

Rice Institute Pamphlet, 1929 **New Teacher Education for the Future** Yin Cheong Cheng, King Wai Chow, Kwok Tung Tsui, 2001-06-30 Serves to provide readers with an international understanding of how researchers and practitioners in different countries address some essential issues and initiatives in teacher education and development what they have found from their known and applied research and what the implications are of which are crucial to coping with challenges from the ongoing developments in teacher education

In Defence of Cosmopsychism Khai Wager, 2025-10-16 Is the cosmos itself conscious and could our minds be aspects of its vast overarching consciousness In this ambitious and original study Khai Wager defends cosmopsychism the view that the universe as a whole is conscious and that individual minds like ours derive from this cosmic consciousness Wager situates cosmopsychism within what he calls the landscape of fundamental consciousness bringing it into productive dialogue with closely related views such as panpsychism panqualityism and perennialism The result is a fresh

perspective on one of philosophy's deepest puzzles the nature and origin of consciousness The problem of phenomenal consciousness asks how subjective experience can emerge from non-conscious matter Fundamental approaches reject the idea that consciousness arises from non-conscious matter instead proposing that it is present at the most basic level of reality Panpsychism the most prominent such view holds that all fundamental microphysical entities are conscious This however leads to the combination problem how do billions of micro-level minds combine to form distinct macro-level minds like ours Cosmopsychism offers a radical alternative rather than being formed from a combination of micro-level instances of consciousness individual minds derive from a larger cosmic-level consciousness As a result cosmopsychism sidesteps the combination problem entirely However a new and equally pressing challenge arises the derivation problem how do individual minds derive from the cosmic consciousness Through rigorous and insightful analysis Wager argues that cosmopsychism can navigate these problems and offers a compelling alternative to both physicalism and panpsychism As such this first book-length treatment of cosmopsychism makes an illuminating contribution to debates about the nature of reality and our place within it **The Builder**, 1894 **Child Psychology in Retrospect and Prospect** Willard W. Hartup, Richard A.

Weinberg, 2014-02-25 This 32nd volume of the Minnesota Symposium on Child Psychology celebrates the 75th anniversary of the University of Minnesota's Institute of Child Development All eight essays are devoted to developmental science its history and current status Taken together the chapters in this book show how the history of science connects past and future how it gives the individual investigator an identity and sense of purpose how contemporary studies occur within larger traditions and how institutions like the Institute of Child Development constitute cultural traditions of their own Collectively these essays show that the past explains a great deal whether we want to know about the processes through which the child acquires symbolic thought or whether we want to know how and why during the last century a few enduring centers were established for the scientific study of children and adolescents Reading these essays one obtains a sense of how the past becomes evidence how it forms models for the way we think and how intellectual challenges arise Proceedings, 1927

The Transfer of Learning Sarah Leberman, Lex McDonald, 2016-02-17 The book addresses a crucial issue for all involved in education and training the transfer of learning to new and different contexts Educators employers and learners face the problem of ensuring that what is learnt in the classroom is able to be adapted and used in the workplace It focuses on adult learners in professional and vocational contexts The authors provide an accessible book on the transfer of learning which draws on multi-disciplinary perspectives from education psychology and management The Transfer of Learning will be useful both for postgraduate students and for practitioners wanting to deepen their understanding of transfer and for those interested in practical applications It combines theory and practice from international research and the authors' own case studies of transfer involving learners engaged in professional development and study towards qualifications Theories of adult learning change and lifelong learning are discussed in relation to the transfer of learning The purpose of this book is to

emphasise to tertiary educators and trainers the importance of transfer and in doing so highlight the participants voices as central foci in coming to an understanding of the process By doing this it balances the literature which has to date emphasized transfer from a trainer s and or organization s perspective There has been little if any substantive material on tertiary transfer issues and yet demands are increasing for tertiary education providers to be more accountable and more focused on developing students ability to use their learning in everyday work situations The book is unique in that it adopts a phenomenological perspective and underscores the significance of the participants voices in understanding issues
