Kennedy,2024-11-14 Single Case Designs for Applied Research by Craig Kennedy helps readers explore single subject research designs grounded in real world examples drawn from classic and contemporary research in education and beyond This text aims to give readers precise and highly applicable

information and concepts in single case or single subject designs so readers can apply this knowledge to their own research and practice By focusing on the experimental nature of this design students learn about the purposes of single case research so they can adapt the designs using them as tools in their methodological toolboxes rather than as formulas to be followed Beginning with an overview of experiments single case designs and strategic issues the book then moves onto a review of measurement approaches different tactics for research designs and ways to understand data and analysis Boxed features throughout offer readers more explanation and background of key methodological concepts Reflection questions at the end of each chapter help students reinforce their knowledge This brief text concisely and thoroughly covers the landscape of single case designs

Advancing Research on Teachers' Professional Vision: Implementing novel Technologies, Methods and Theories Christian Kosel,Tina Seidel ,Christian Hartmann,Ann-Sophie Grub,2024-07-25 A classroom full of students can be overwhelming for teachers It is critical that teachers are able to filter and meaningfully interpret the relevant information in this complex scenario Much of this filtering and interpretation occurs through selective visual perception Over the last decade a rapidly growing number of studies in empirical educational research used eye tracking to investigate teachers selective visual perceptual processes in the classroom Theoretically visual attention and perception are often conceptualized as knowledge based noticing coupled with knowledge based reasoning about what is visually perceived Recent eye tracking studies have shown that experienced teachers in particular show improved selective attention of classroom events through faster detection of relevant information and improved monitoring of learning relevant situations Researchers agree that a critical driver of selective attention processes is the professional knowledge declarative procedural and metacognitive of experienced teachers which controls selective perceptual processes in a top down process The findings are significant and provide important insights for research on teacher professionalization
