Real Life Entertaining:

Entertainment Values Stephen Harrington, 2017-08-14 This collection brings together the work of a range of scholars from around the world with different perspectives on one simple question How can we assess the value of various entertainment products and forms Entertainment is everywhere The industries that produce it earn billions of dollars each year and employ hundreds of thousands of people Its pervasiveness means almost everyone has something to say about entertainment too whether it be our opinion on the latest Hollywood blockbuster a new celebrity couple or our concerns over its place in the world of politics And yet in spite of its significance entertainment has too often been dismissed with surprising ease within the academy as a mindless lowbrow even dangerous form of culture and therefore unworthy of serious appraisal let alone praise *Entertainment Values* challenges this assumption offering a better understanding of what entertainment is why we should take it seriously as well as helping us to appreciate the significant and complex impact it has on our culture

Amateur Media Dan Hunter, 2013 The rise of Web 2.0 has pushed the amateur to the forefront of public discourse public policy and media scholarship Typically non salaried non specialist and untrained in media production amateur producers are now seen as key drivers of the creative economy But how do the activities of citizen journalists fan fiction writers and bedroom musicians connect with longer traditions of extra institutional media production This edited collection provides a much needed interdisciplinary contextualisation of amateur media before and after Web 2.0 Surveying the institutional economic and legal construction of the amateur media producer via a series of case studies it features contributions from experts in the fields of law economics and media studies based in the UK Europe and Singapore Each section of the book contains a detailed case study on a selected topic followed by two further pieces providing additional analysis and commentary Using an extraordinary array of case studies and examples from YouTube to online games from subtitling communities to reality TV the book is neither a celebration of amateur production nor a denunciation of the demise of professional media industries Rather this book presents a critical dialogue across law and the humanities exploring the dynamic tensions and interdependencies between amateur and professional creative production This book will appeal to both academics and students of intellectual property and media law as well as to scholars and students of economics media cultural and internet studies
