Sprawling Places David Kolb, 2010-01-25 People often bemoan the spread of malls suburban strips subdivisions and other sprawling places in contemporary America But are these places as bad as critics claim In Sprawling Places David Kolb questions widely held assumptions about our built environments Kolb agrees there is a lot not to like about many contemporary places but to write them off simply as commodified nonplaces does not treat them critically Too often Kolb says aesthetic character and urban authenticity are the focus of critics when it is more important to understand a place s complexity and connectedness Kolb acknowledges that the places around us increasingly have banal exteriors yet they can be complex and can encourage their inhabitants to use them in multiple nonlinear ways Ultimately Kolb believes human activity within a place is what defines it Even our most idealized classical places he shows change over the course of history when subjected to new linkages and different flows of activity Engaging with the work of such writers and critics as Henri Lefebvre Manuel Castells Karsten Harries and Christian Norberg Schulz Kolb seeks to move discussions about sprawl away from the idea that we must choose between being rooted in the local Black Forest soil or wandering in directionless space By increasing our awareness of complexity and other issues Kolb hopes to broaden and deepen people s thinking about the contemporary built environment and to encourage better designs in the future
