**Eurocentrism: a marxian critical realist critique** Nick Hostettler, 2013-05-07 The political and social structures of modernity are dominated by really eurocentric forms and relations yet the theorisation of the eurocentricity of modernity remains barely developed At the same time modern political and social theory is fundamentally eurocentric yet the critique of eurocentrism remains marginal to marxian and critical realist theory Addressing the eurocentrism of both modernity and modern theory Eurocentrism A Marxian Critical Realist Critique discloses the deeply embedded constraints it imposes on historical and social reflexivity Building on the insights of post structuralism and post colonialism Eurocentrism shows how the powerful anti eurocentric tendencies of the marxian critique of civil society and the critical realist critique of philosophy have been misunderstood or ignored It develops the latent potential of these traditions to develop a systematically anti eurocentric approach to understanding and explaining modernity

Importantly they explore the ways in which these expressions are used or are taken up in struggles over cultural recognition and ultimately the practical ethical political and theoretical implications this has for archaeologists engaging in community work Finally they argue that there are very real advantages for archaeological research theory and practice to be gained from engaging with communities

New Materialist Explorations into Language Education Johanna Enns-Kananen, Taina Saarinen, 2022-10-10 This open access book analyzes language education through a socio material framework The authors revisit their position as researchers by decentering themselves and humans in general from the main focus of research activities and giving way to the materialities that are agentive but often overlooked parts of our research contexts and processes Through this critical posthumanist realism they are able to engage in research that sees society as an ethical

interrelationship between humans and the material world and explore the socio materialities of language education from the perspectives of material agency spatial and embodied materiality and human and non human assemblages Each chapter explores language educational contexts through a unique lens of socio materiality Based on how the authors conceptualize socio materiality the book is organized in three sections that seek answers to the following overarching questions In what ways do material agencies emerge in language educational contexts How are educational choices and experiences intertwined with materialities of spaces and bodies What assemblages of human and non human may occur in language education contexts Each chapter questions in its own way the notion of the human subject as rational enlightened being and sole possessor of agency and offers examples of allowing for other than human agency to enter the picture Together the contributors exemplify how researchers who have been committed to social constructionist thinking for most of their careers learn to make space for new theories thus inspiring and encouraging readers to remain open for new intellectual and embodied endeavors
