#### **Realist Social Theory The Morphogenetic Approach:**

Realist Social Theory Margaret S. Archer, 1995-10-19 Building on her seminal contribution to social theory in Culture and agency Margaret Archer develops here her morphogenetic approach applying it to the problem of structure and agency Since structure and agency constitute different levels of stratified social reality each possesses distinctive emergent properties which are real and causally efficacious but irreducible to one another The problem therefore is shown to be how to link the two rather than conflate them as has been common practice whether in upwards conflation by the aggregation of individual acts downwards conflation through the structural orchestration of agents or more recently in central conflation which holds the two to be mutually constitutive and thus precludes any examination of their interplay by eliding them Realist social theory the morphogenetic approach thus not only rejects methodological individualism and collectivism but argues that the debate between them has been replaced by a new one between elisionary theorizing such as Giddens structuration theory and the emergentist theories based on a realist ontology of the social world. The morphogenetic approach is the sociological complement of transcendental realism and together they provide a basis for non conflationary theorizing which is also of direct utility to the practising social analyst **Rethinking Social Theory** Roger Sibeon, 2004-03-27 Identifies and explores unresolved controversies and ambiguities in present day sociological theorizing Realist Biography and European **Policy** Jeffrey David Turk, Adam Mrozowicki, 2013-12-11 Realist Biography and European Policy is the first concerted attempt to integrate the separate strands of critical realism as a developed philosophy for social science with biographical narrative methods as a concrete methodological approach The main goal is to demonstrate that the combination of critical realism and biographical methods is not only possible but it is exceptionally well suited for the exploration of newly emerging research fields within European policy studies This volume offers new insights to and is an indispensable reference for researchers in search of solid underpinnings for their own empirical research Foreword by Miriam Kennet Director of the Green Economics Institute Founder and Editor of the International Journal of Green Economics Contributors Tatiana Bajuk Sen ar Scientific Research Centre of the Slovenian Academy of Sciences and Arts Institute of Slovenian Ethnology Bob Carter University of Leicester Department of Sociology Prue Chamberlayne Open University Faculty of Health and Social Care Markieta Domecka independent researcher Norbert Kluge coordinator and adviser for the European Works Council of ThyssenKrupp AG Lyudmila Nurse director of Oxford XXI Elisabetta Perone University of Naples Federico II Valeria Pulignano Centre for Sociological Research KU Leuven Antonella Span University of Naples Federico II Tom Wengraf Middlesex University

Maccarini, 2019-03-01 This book addresses the problem of the transition to new forms of social order in the global world As a haunting sense of historical discontinuity pervades Western societies it offers a fresh perspective on the issue focusing on two basic coordinates to pinpoint the developmental path of rapidly changing societies one is the mechanism of unfettered social morphogenesis and the other is the specific kind of societal unification brought about by globalization with the related closure of the world The book draws on the theoretical work produced in the five volumes of the Springer series Social Morphogenesis and applies it in a sustained and concerted approach to the empirical examination of macro social change The first part of the book presents the social ontology of the morphogenetic approach and discusses its capacity to interpret macrosocial transitions. The second part then draws a prospective outline of the social formation known as the morphogenic society showing how unbound morphogenesis in a globalized world shapes such crucial phenomena as social norms war and violence openness and closure as adaptive responses from social organizations Lastly the third part examines the anthropological consequences of these societal trends focusing on self and character as well as on human fulfillment and the Educational Leadership and Critical Realism Anthony Thorpe, Jean Pierre Elonga Mboyo, 2025-09-18 Adopting a good life critical realist approach to educational leadership this book shows how applied theory can contribute to the development of mechanisms allowing for the effective leadership of organisations Through an examination of pertinent theories and debates in educational leadership and critical realist thought it moves to offer demonstrations of practical uses of critical realism that include the transformation of reflective practice the development and practice of leadership and the formulation as well as the enactment of policy Considering the role that realist thought can play in the resolution of educational crises in sub Saharan Africa and bridging the gap between research and practice the authors argue that change is possible and that it can be initiated from within the field of educational leadership Centred on a vision of social justice for human flourishing instead of operating within narrow and mechanistic pre occupations Educational Leadership and Critical Realism will appeal to scholars across the social sciences as well as to practitioners and policymakers in the field of education What Is a Person? Christian Smith, 2010 The task of understanding human beings what we ourselves are our constitution and condition is a perennial problem in philosophy and related disciplines Smith argues here that our understanding of human persons is threatened by technological development and capricious academic theories alike seeking to deny or relativize the personhood of humanity Smith's book puts a stake in the ground in defense of a view of the human that is genuinely humanistic in the traditional sense and capable of sustaining with intellectual coherence things like modern human rights and universal benevolence Souls in Transition Christian Smith, Patricia Snell, 2009-09-14 Based on candid interviews with thousands of

studies **Social Theory of International Politics** Alexander Wendt,1999-10-07 Drawing upon philosophy and social theory Social Theory of International Politics develops a theory of the international system as a social construction Alexander Wendt clarifies the central claims of the constructivist approach presenting a structural and idealist worldview which contrasts with the individualism and materialism which underpins much mainstream international relations theory He builds a cultural theory of international politics which takes whether states view each other as enemies rivals or friends as a fundamental determinant Wendt characterises these roles as cultures of anarchy described as Hobbesian Lockean and Kantian respectively These cultures are shared ideas which help shape state interests and capabilities and generate tendencies in the international system The book describes four factors which can drive structural change from one culture to another interdependence common fate homogenization and self restraint and examines the effects of capitalism and democracy in the emergence of a Kantian culture in the West Welcome to Social Theory Tom Brock, 2023-03-08 Welcome to Social Theory is exactly what students want a lucid and engaging introduction to social theory that carefully uses images examples and quotations to illustrate new ways of examining contemporary social life Tom Brock's comprehensive and accessible style produces an indispensable guide to social theory that examines the major theoretical traditions from Marxism through to poststructuralism and from feminism through to postcolonial theory new materialism and posthumanism Welcome to Social Theory gives careful appraisal of classical ideas and debates in social theory and traces their impact through discussion of major contemporary theorists including Michel Foucault Pierre Bourdieu Anthony Giddens Margaret Archer Judith Butler bell hooks Kimberl Crenshaw Edward Said Homi Bhabha Gayatri Spivak Bruno Latour Gilles Deleuze and Rosi Braidotti Social theory matters and this book shows why through relevant and compelling examples including the gig economy everyday sexism digital black feminism animal and environmental activism stigma and discrimination against migrants the need to decolonise the sociology curriculum and many more Welcome to Social theory is an indispensable text for undergraduate students who are new to social theory Dr Tom Brock is a Senior Lecturer of Sociology at Manchester History and the Study of Religion Stanley Stowers, 2024 How does one understand religion Metropolitan University Can one explain religion How does one understand the craft and discipline of the historian How can one best bring together the study of religion with the craft and discipline of the historian I am a historian who works in the study of religion and believe that the present intellectual moment offers enormous in some ways unprecedented opportunities both in the study of religion and historiography But at the same time difficulties and dangers loom together with the opportunities My specialty and prime set of examples lie in the study of ancient Mediterranean religion if indeed there is something that can rightly be called Mediterranean religion or even called religion Many specialists in the study of religion and also many of those who study ancient cultures doubt or even reject outright religion as a cross historical category on the one hand and on the other anything common about religion across the ancient Mediterranean And some cognitive scientists who against religion

specialists have argued for the centrality of gods to religion then agree with the skeptics that religion is not a coherent social object a social kind I will argue that long discredited forms of anti realism and untenable anthropocentrism haunt both groups Among other areas I work in Christianity and Judaism Do they belong to Mediterranean religion One can easily see how coming to an understanding of what religion is and what Mediterranean religion is form key questions I will argue that religion is a robust realistic entity a social kind and that ancient Mediterranean religion even with all of its great diversity operated with some key common principles It is no secret that Christianity and Judaism have presented themselves as unique and essentially untouched by an inferior and degenerate religiosity that characterized everyone else in the Mediterranean History looks different when one dispenses with such normatively heavy freight and situates the two within rather than outside of Mediterranean religion Morphogenesis Answers Its Critics Margaret S. Archer, 2024-03-27 In this final book by renowned sociologist Margaret S Archer her groundbreaking morphogenetic approach is defended refined and extended through a series of engagements with her critics Archer a pioneer of critical realism addresses key debates surrounding her work on structure agency and social change Each chapter responds to critiques from a different scholar using these exchanges as springboards to further develop her powerful explanatory framework Through these lively dialogues Archer elaborates her tools for analysing social and cultural dynamics This book offers readers a unique window into Archer's thought as she clarifies sharpens and expands her theoretical contributions in response to constructive criticism It will be an essential read for scholars and students across the social sciences and for anyone seeking to understand the forces that shape our social world and how we can reshape it The Logical Foundations of Social Theory Gert H. Mueller, 2014-08-20 The Logical Foundations of Social Theory describes Gert Mueller's argument that physical biological social moral and cultural reality form an asymmetrical hierarchy of founding and controlling relationships that condition social reality rather than mechanically determining it This book analyzes social stratification as labor wealth and power the moral order as solidarity ideology and morality and culture systems as art science and religion Bringing Back the Social into the Sociology of Religion, 2018-06-19 The contributors to Bringing Back the Social into the Sociology of Religion explore how bringing the social back into the sociology of religion makes possible a more adequate sociological understanding of such topics as power emotions the self or ethnic relations in religious life In particular they do so by engaging with social theories and addressing issues of epistemology and scientific reflexivity. The chapters of this book cover a range of different religious traditions and regions of the world such as Sufism in Pakistan the Kabbalah Centre in Europe Brazil and Israel African Christian missions in Europe and Evangelical Christianity in France and Oceania They are based upon original empirical research making use of a range of methods quantitative ethnographic and documentary Contributors are V ronique Altglas Peter Doak Yannick Fer Gwendoline Malogne Fer Christophe Monnot Eric Morier Genoud Alix Philippon Matthew Wood
