Realities Of Literature:

Russian Literature, Ideals and Realities Pëtr Alekseevič Kropotkin, 1916 *Creating Realities* Erhan

Simsek, 2019-02-20 Business is woven into the very fabric of American life yet rarely surfaces in the nation's literary history. Even in novels about business it proves an elusive motif that fails to mirror actual business organizations. This book argues that literary representations of business remain ineffable because business serves potential aesthetic functions subtly yet meaningfully impacting readers. Exploring the complex representation of business in realist, naturalist, and modernist works, Erhan Simsek reveals these functions by analyzing how the motif intertwines with social developments, literary movements, and author biographies. He thus illuminates the motif itself while highlighting the utility of a focus on the changing functions of literature.

Other Times, Other Realities Arnold H. Modell, 1990 Nearly a century has passed since Freud's theories unleashed a revolution in our understanding of the human psyche. Yet as Arnold Modell firmly points out, we still do not possess a theory that explains how psychoanalysis works. *Other Times, Other Realities* provides brilliant insight into this perplexing problem and lays the foundation for a comprehensive theory of psychoanalytic treatment. Modell's careful consideration of Freudian theory, the interpretations of contemporary ego psychology, and the contribution of object theory discloses the changing significance of the fundamental elements of the therapeutic process. In *Other Times, Other Realities*, readers will discover an illuminating synthesis of concepts underlying the various interpretations of the psychoanalytic process.

Challenging Realities: Magic Realism in Contemporary American Women's Fiction M. Aquest llibre és el resultat del treball realitzat a les universitats de Sheffield i la de València i representa una valuosa investigació i una important contribució als estudis literaris.

Transcultural Realities Virginia H. Milhouse, Molefi Kete Asante, Peter O. Nwosu, 2001-07-24 *Transcultural Realities* is an important collection of essays written by an outstanding cast of critical scholars who discuss the importance of transculture in interdisciplinary contexts. The primary goal of the contributors is to help the reader to understand that a state of community or harmony cannot be achieved in the world until we are all ready to accept different cultural forms, norms, and orientations. In this book, transculture is defined as a form of culture created not from within separate spheres but in the holistic forms of diverse cultures. It is based on the principle that a single culture in and of itself is incomplete and requires interaction and dialogue with other cultures. *Transcultural Realities* is divided into five parts: Transcultural issues in international and cross-cultural contexts; Historical and religious struggles within and between nations; Socially constructed

racial identities and their consequences for transculturalism in the United States The transformative effects of sojourning in diverse cultural environments The fundamentals of transcultural research Editors Virginia H Milhouse Molefi Kete Asante and Peter O Nwosu set out to meet three specific needs First that the book s interdisciplinary approach to theory and practice in cross cultural relations will make it an important book for several fields of study including intercultural and interpersonal communication international relations human relations psychology anthropology philosophy and sociology Second that the book will be a reference tool for scholars of transcultural research providing up to date information on cross cultural relations that are transcultural in nature And finally through the use of research is critical to a fuller understanding of cross cultural relations in a transcultural world

Theories of Literary Realism Dario Villanueva, 1997-04-24 Realism has not only shaped important schools and periods in literary history but has also been a fundamental constant of all literature its first theoretical formulation being the principle of mimesis in Aristotle s Poetics Realism can be considered by extension one of the main aspects of literary theory the aims of which must be to define its concepts clearly and to neutralize the imprecision polysemy and ambiguity that often characterized the application of realism This book explores the possibilities and limits of a concept of realism that seeks a point of equilibrium between the principle of the autonomy of the literary work vis a vis reality and the complex relations that the work clearly establishes with this reality It acknowledges that it is a personal response to the poststructuralist crisis in literary theory By concentrating on the study of the literary work of art as a verbal construction the great Continental and Anglo American tradition of formalism and New Criticism has ended up neglecting the second mimetic aspect of the literary problematic thus dissociating literature from life

Mimesis in a Cognitive Perspective Nicolae Babuts,2011-12-31 Mimesis is a critical and philosophical term going back to Aristotle It carries a wide range of meanings including imitation representation mimicry the act of expression and the presentation of self In modern literary criticism mimesis has received renewed attention in the last two or three decades and been subject to wide ranging interpretations Nicolae Babuts looks at the concept of mimesis from a cognitive perspective He identifies two main strands the mimetic relation of art and poetry to the world defined in terms of reference to an external reality and the importance of memory in the making of plots or storytelling Babuts suggests that there is a material identity we cannot know beyond the limits of our senses and intellect and a symbolic or coded identity that is processed by memory All writers including Mallarmé in his esoteric poetry Flaubert in his realist narratives and Mihai Eminescu the Romanian poet in his romantic poems rely on mimetic strategies to link the two identities the images in memory to the outside reality All order their narratives in accordance with the dynamics of memory Babuts describes this phenomenon with great insight showing how new traditions are formed *Library of Congress Subject Headings* Library of Congress,Library of Congress. The Addresses and Journal of Proceedings of the National Educational Association ,1890 **The Reality - Fiction Opposition in Children's Literature**

Adrian Zagler,2011 Bachelor Thesis from the year 2010 in the subject English Language and Literature Studies Literature grade 1 University of Graz language English abstract Since the 1970s scholarly interest in children's literature has grown and numerous studies looking into the complexity and thematic and structural depth of the texts have been published Simultaneously the notion of metareferentiality has sparked interest among scholars from various disciplines Metareferentiality though not unique to the twentieth and the twenty first centuries is said to be one of the key cultural phenomena of our time And yet these two fields of interest namely children's literature and metareferentiality have only very rarely been studied in the same context Metareferential elements in children's books are often seen as phenomena of dream worlds Thus they allow a traditional non critical reading in which the metareferential elements do not necessarily trigger medial awareness in the readers but can be explained logically and within the framework of the represented story worlds Consequently the epistemological status of reality would not be threatened by these texts However as this paper aims to prove such a reading for instance of the Alice stories *Die Unendliche Geschichte* and *The Book of Lost Things* although undeniably possible falls short of the true scope of the texts As will be shown all four books address the question of the status of fiction with reference to its opposition to reality albeit in different ways In their treatment of the subject they are clearly metafictional texts with epistemological and ontological concerns that require experienced readers to fully grasp their messages Nevertheless they are still publicly perceived as children's literature and are enjoyed by children and adults alike

After some general remarks on the genre of children's literature and on metareferentiality this paper focuses on a particular form of metareference
