Edwin Hartley Pratt

Realm Of Reason:

The Realm of Reason Christopher Peacocke, 2004 The Realm of Reason is a manifesto for a new rationalism in philosophy Christopher Peacocke develops an original theory of what makes a thinker entitled to form a given belief The theory is articulated in three principles of rationalism which together imply that all entitlement has an element that is independent of experience Peacocke elaborates this rationalism in detail for the classical issues of perceptual knowledge induction and the status of moral thought His new generalized approach to epistemology has applications throughout philosophy and it will interest all concerned with knowledge truth and rationality *Christian Ethics in Secular Cultures, Volume 2* Thomas K. Beiser, 2009-10-29 Diotima's Children is a re-examination of the rationalist tradition of aesthetics which prevailed in Germany in the late seventeenth and eighteenth century It is partly an historical survey of the central figures and themes of this tradition But it is also a philosophical defense of some of its leading ideas viz that beauty plays an integral role in life that aesthetic pleasure is the perception of perfection that aesthetic rules are inevitable and valuable It shows that the criticisms of Kant and Nietzsche of this tradition are largely unfounded The rationalist tradition deserves re-examination because it is of great historical significance marking the beginning of modern aesthetics art criticism and art history
