## **Realms Of Knowledge Academic Departments In Secondary Schools:**

*Realms of Knowledge* Leslie Santee Siskin, 1994-01 This study examines academic departments as a context for teaching in the secondary school. It explores why teachers find departments to be crucial to the high school setting. In all three schools studied and in all four subjects English Maths Science and Social Science teachers even those who felt isolated in their classrooms located their sense of professional identity practice and community in their departments. Departments are seen as boundaries for dividing the school centres of social interaction a micro political decision making forum as a subject knowledge category. Those concerns are important at this time as various attacks are being made on school structures and subject and administration fragmentation in these cases subjects are seen as obstacles to change. To subject groups they are viewed as potential vehicles to carry and confirm the message.

*In Search of Deeper Learning* Jal Mehta, Sarah Fine, 2019-04-09 An award winning professor and an accomplished educator Jal Mehta and Sarah Fine take us beyond the hype of reform and inside some of America's most innovative classrooms to show what is working and what isn't. In a world where test scores have been king this boldly humanistic book offers a rich account of what education can be at its best.

## **Professional Learning in a School-Based**

**Community of Science Teachers** Wayne Melville, 2010-01-01 The ubiquitous science department occupies an unusual position in most secondary schools. Traditionally they have been part of the organisational structure of schools with administrative responsibilities over room allocations teaching assignments and the management of laboratory equipment. These are important roles but they only tell half the story. Science teachers are more than members of an organisational structure. They are also members of a science education community which is shaped by their shared understanding of science. The science department as community also possesses a pivotal if undervalued role in teacher professional learning. This book conceptualises professional learning as the engagement of teachers in a virtues based personal reflection and or public discourse around the episteme techne and phronesis in the spaces in between the metaphors of understanding community meanings practice and identity. As such it speaks to heads of science departments school administrators and those with an interest in leadership within schools.

**Teachers' Work During the Pandemic** Nina Bascia, 2022-12-15 This book

examines teachers work in the first two years of the COVID 19 pandemic where educators grappled with a worldwide virus that profoundly affected teaching and learning This difficult situation allowed educators and researchers to reflect critically on the enduring labor experiences that persist through this uncertain period some of them rooted in conditions prevalent long before the pandemic hit Written from a perspective that cuts across labor studies and education the book explains how cultural and legally inscribed expectations of teachers have been remarkably impermeable over time In particular the volume focuses on the educational transformations that have taken place worldwide since the pandemic occurred including reduced educational resources labor strife and contradictory governmental directives As the book articulates these changes affect some of the most persistent educational topics including student achievement student health and teacher satisfaction

**School Effectiveness, School Improvement** David Reynolds,2004-11-01 The pressure on schools to improve and to raise achievement continues to be a dominant issue in both school and government policies School Effectiveness and School Improvement seeks to develop the debate further providing academics and practitioners alike with a summary and discussion of research on school effectiveness and school improvement up to the present new perspectives on these fields developed from other traditions of thinking and research a consideration of the role of organization theory an integrated view of these current perspectives and clear practical implications for policy and practice

**Developing the ICT Capable School** Steve Kennewell,John Parkinson,Howard Tanner,2002-01-04 This book helps readers to improve the development of ICT capability through understanding the factors at work in whole school contexts Based on research that examined schools approaches to the development of pupils ICT capability and identified the factors which lead to success it provides practical advice but with clear justifications in terms of well researched principles and illustrations It covers issues specific to both primary and secondary phases of education together with a range of common concerns and will be of use to practitioners and school staff involved in planning and delivering ICT training This title will therefore provide readers with Greater understanding or personal ICT capability Knowledge of effective management teaching methods and co ordination strategies for ICT Understanding of the importance of a whole school approach

The New Institutionalism in Education Heinz-Dieter Meyer,Brian Rowan,2012-02-01 The New Institutionalism in Education brings together leading academics to explore the ongoing changes in K 12 and higher education in both the United States and abroad The contributors show that current educational trends including the increased globalization of education the growing emphasis on educational markets and school choice the rise of accountability systems and the persistent influence of business groups like textbook manufacturers and test makers on educational policy can best be understood when observed

through an institutional lens Because schools and universities are organizations that are stabilized by deeply institutionalized rules they are subject to the enduring problem of substantive educational reform This book gives researchers and policy analysts conceptual tools and empirical assessments to gauge the possibilities for institutional reform and innovation

**Professional Communities and the Work of High School Teaching** Milbrey W. McLaughlin, Joan E.

Talbert, 2001-10-20 American high schools have never been under more pressure to reform student populations are more diverse than ever resources are limited and teachers are expected to teach to high standards for all students While many reformers look for change at the state or district level the authors here argue that the most local contexts schools departments and communities matter the most to how well teachers perform in the classroom and how satisfied they are professionally Their findings based on one of the most extensive research projects ever done on secondary teaching show that departmental cultures play a crucial role in classroom settings and expectations In the same school for example social studies teachers described their students as apathetic and unwilling to work while English teachers described the same students as bright interesting and energetic With wide ranging implications for educational practice and policy this unprecedented look into teacher communities is essential reading for educators administrators and all those concerned with U S High Schools

Professor University of Minnesota      *School-University Partnerships in English Language Teacher Education* Cheri Chan, 2016-05-23 This book addresses the complex issues that arise in school university collaborative action research projects Employing sociocultural perspectives on examining professional practices of in service teachers it examines the complexities of negotiating beliefs identities and interpersonal relations when educators from two different institutional cultures collaborate Specifically the book explores issues such as the discourses that are operative in school university collaboration for English language teacher education the way in which beliefs interpersonal relations and identities are negotiated in school university partnership what tensions and complexities operate in collaborative action research discourse in an educational context and how school university collaboration can be achieved The book adopts a critical perspective and provides arguments from a non Western sociocultural perspective      *Taking Stock* Mary Anne Raywid, 1996      Values Education for Citizens in the New Century Zijian Li, 2006 This book is a collection of papers by international experts in education on the theory and practice of values education in global contexts Contemporary examples include Australia the U K Hong Kong Macau and Thailand      *Globalizing Minds* Iveta Silova, Daphne P. Hobson, 2014-05-01 Globalization has a profound effect on the mission and goals of education worldwide One of its most visible manifestations is the worldwide endorsement of the idea of education for global citizenship which has been enthusiastically supported by national governments politicians and policy makers across different nations Increasingly the educational institutions feel under pressure to respond to globalization forces by preparing students to engage competitively and successfully with this new realm lest their nations be left in the dust What is the role of international schools in implementing the idea of education for global citizenship How do these schools create a culturally unbiased global curriculum when the adopted models have been developed by Western societies and at the very least are replete with Western cultural values traditions and biases This collection of essays attempts to grapple with these complex issues while highlighting that culture and politics closely intertwine with schooling and curriculum as parents administrators teachers and students of different backgrounds and interests negotiate definitions of self and each other to construct knowledge in particular contexts The goal is to examine the complexity of factors that drive the global demand for education for global citizenship and de construct the contested nature of global citizenship by examining how the phenomenon is understood interpreted and modified in different cultural settings The authors provide not only a thick description of their cases but also a critical assessment of various attempts to initiate and implement educational reforms aimed at the development of globally minded citizens in various national settings

Making and Molding Identity in Schools Ann Locke Davidson, 1996-08-23 Making and Molding Identity in Schools delves into the lives of adolescents to examine how youths assert ethnic and racial identities in the face of policies discourses and practices that work both to reproduce and challenge social categories Detailed case studies illuminate adolescent voices and perspectives revealing that identity and academic engagement emanate not just from societal and cultural forces but also

from ordinary day to day interactions and experiences within school settings Drawing on contemporary social theory the author emphasizes the political and relational nature of race and ethnicity and illustrates the potential for identities and ideologies to vary over time and across school settings The book provides a needed expansion of theories that link youth identities and ideologies solely to cultural economic and political forces and provides insight into settings that allow students to engage without discarding their ethnic and racial selves **Educating Adolescents** Tim Urdan, Frank

Pajares, 2006-01-01 This volume of Adolescence and Education is devoted to an exploration of the challenges facing adolescents and their teachers as well as some of the strategies that have been adopted to address these challenges Although it is true that most adolescents survive this period of development with few enduring academic or psychological problems it is also true that a substantial proportion experience depression bullying and violence in school sexual harassment and a widening gap between their personal and academic needs Many of these problems emerge for the first time during adolescence
