Air University Review .1985 A Theory of Global Energy Governance Frédéric Sourgens, 2025-09-04 Energy governance today is at a crossroads Faced with the pressing issues of energy security climate change and the cost of energy policymakers must grapple with how to achieve critical outcomes in an increasingly tumultuous world A Theory of Global Energy Governance offers the first unitary and interdisciplinary theory of global energy governance that explains the interlinkage between domestic and global energy decision making processes It lays out a new path to resolve global energy geopolitical tensions grounded in a shared sense of belonging within the global energy commons Part I explores the theoretical relationship between development and energy systems Part II presents an understanding of energy governance as founded on a bond of energy belonging contrasting with the prevailing realpolitik approach In Part III Sourgens reimagines the role of institutions in the global energy system to harness the benefits of deeper energy cooperation Finally Part IV furthers the discussion of the global energy commons by highlighting the unique position and potential of energy systems to steer the world towards a broader conception of the common good **Ideology and International Relations in the Modern World** Alan Cassels, 2002-11-01 Cassels offers a novel perspective on the part played by ideology in international relations over the past two centuries His treatment is not restricted to the familiar totalitarian ideologies of communism and nazism but also includes conservatism liberalism and nationalism The focus and emphasis given to ideology in an historical survey of such broad scope make this book unusual and even controversial Air university review, 1984, 1984 The War Over Perpetual Peace E. Easley, 2004-12-02 This book examines the various competing interpretations of Kant's foundational Perpetual Peace since its initial publication in the late eighteenth century According to Easley's analysis there are two patterns of interpretations 1 the text endorses peace proposals above the state level 2 the text is in favour of peace proposals at the state level The principal explanation for these two patterns resides in the rise and fall of hopes for peace through international organizations It can also be attributed to the rise in the number of liberal states over time Eric Easley provides a comprehensive historical background and analytical framework for understanding Perpetual Peace allowing scholars of international relations to better understand and appreciate its complex meaning and see beyond the conventionally accepted interpretations of the day Global Limits Mark F.N. Franke, 2001-05-16 Explores the limits of Kantian approaches to the study of international affairs The Legacy of Pierre Bourdieu Simon Susen, Bryan S. Turner, 2013-12-01 These critical essays bring together prominent scholars in the social sciences to consider the diverse nature of the legacy of Pierre Bourdieu in contemporary social theory In offering a range of perspectives on the continuing relevance of Bourdieu s sociology the essays of this volume examine Bourdieu's relationship to both classical and contemporary social theory This collection constructs an intellectual bridge between French speaking and English speaking accounts of Bourdieu s work

Melancholy Politics Jean-Philippe Mathy, 2011-01-01 The current cultural climate in France is often described as one of

d clinisme or sinistrose a mixture of pessimism about the national future nostalgia for the past and a sinister sense of irreversible decline concerning the present The notion of democratic melancholia has become widely popular cropping up time and again in academic papers and newspaper articles In Melancholy Politics Jean Philippe Mathy examines the development of this disenchanted mood in the works of prominent French philosophers historians and sociologists since the beginning of the 1980s This period represents a significant turning point in French intellectual life as the legacy of major postwar and sixties theorists such as L vi Strauss Derrida and Foucault was increasingly challenged by a younger generation of authors who repudiated both Marxism and structuralism The book is not a classic intellectual or cultural history of post 1968 France but rather a contribution to the understanding of the present a collection of soundings into what remains largely a complex ongoing process Bounded Divinities F. Frohock, 2016-04-30 This serves as a handbook to guide us through the thickets of the sacred the secular religion and politics by charting the supernatural as a natural defining feature of religion Santer a is used as a case study to illustrate the similarities and differences among religious and political practices and Geography and Ethics James D. Smith, 2002-09-11 This book discusses effective dispute management represents a landmark exploration of the common terrain of geography and ethics Drawing together specially commissioned contributions from distinguished geographers across the UK North America and Australasia the place of geography in ethics and of ethics in geography is examined through wide ranging thematic chapters Geography and Ethics is divided into four sections for discussion and exploration of ideas Ethics and Space Ethics and Place Ethics and Nature and Ethics and knowledge all of which point to the rich interplay between geography and moral philosophy or ethics **State** Brian C. Rathbun, 2019-02-14 Challenges the assumption of the rationality of foreign policy makers in international relations showing how leaders systematically vary in the rationality of their thinking **Genocide and Mass Atrocities in** Asia Deborah Mayersen, Annie Pohlman, 2013-06-03 The twentieth century has been labelled the century of genocide and according to estimates more than 250 million civilians were victims of genocide and mass atrocities during this period This book provides one of the first regional perspectives on mass atrocities in Asia by exploring the issue through two central themes Bringing together experts in genocide studies and area specialists the book looks at the legacy of past genocides and mass atrocities with case studies on East Timor Cambodia and Indonesia It explores the enduring legacies of trauma and societal divisions the complex and continuing impacts of past mass violence and the role of transitional justice in the aftermath of mass atrocities in Asia Understanding these complex legacies is crucial for the region to build a future that acknowledges the past The book goes on to consider the prospects and challenges for preventing future mass atrocities in Asia and globally It discusses both regional and global factors that may impact on preventing future mass atrocities in Asia and highlights the value of a regional perspective in mass atrocity prevention Providing a detailed examination of genocide and mass atrocities through the themes of legacies and prevention the book is an important contribution to Asian Studies and

Speller, 2011 Bourdieu and Literature is a wide ranging rigorous and accessible introduction to the relationship between Pierre Bourdieu's work and literary studies It provides a comprehensive overview and critical assessment of his contributions to literary theory and his thinking about authors and literary works One of the foremost French intellectuals of the post war era Bourdieu has become a standard point of reference in the fields of anthropology linguistics art history cultural studies politics and sociology but his longstanding interest in literature has often been overlooked This study explores the impact of literature on Bourdieu's intellectual itinerary and how his literary understanding intersected with his sociological theory and thinking about cultural policy. This is the first full length study of Bourdieu s work on literature in English and it provides an invaluable resource for students and scholars of literary studies cultural theory and sociology Social States Alastair Iain Johnston, 2014-06-12 Constructive engagement became a catchphrase under the Clinton administration for America's reinvigorated efforts to pull China firmly into the international community as a responsible player one that abides by widely accepted norms Skeptics questioned the effectiveness of this policy and those that followed But how is such socialization supposed to work in the first place This has never been all that clear whether practiced by the Association of South East Asian Nations ASEAN Japan or the United States Social States is the first book to systematically test the effects of socialization in international relations to help explain why players on the world stage may be moved to cooperate when doing so is not in their material power interests Alastair Iain Johnston carries out his groundbreaking theoretical task through a richly detailed look at China's participation in international security institutions during two crucial decades of the rise of China from 1980 to 2000 Drawing on sociology and social psychology this book examines three microprocesses of socialization mimicking social influence and persuasion as they have played out in the attitudes of Chinese diplomats active in the Conference on Disarmament the Comprehensive Nuclear Test Ban the Convention on Conventional Weapons and the ASEAN Regional Forum Among the key conclusions Chinese officials in the post Mao era adopted more cooperative and more self constraining commitments to arms control and disarmament treaties thanks to their increasing social interactions in international security institutions The Theory and Practice of International Criminal Law Leila Nadya Sadat, Michael P. The result is a meticulously researched book exploring from a variety of perspectives the terms peoples and minorities in international law as well as relationships between minorities peoples and indigenous rights individuation and self determination Of special interest is the attempt of the author to explain the existence of double standards in international minority rights dubbing them games with the help of transactional analysis and to redefine and reframe the basic terms such as international law sovereignty self determination etc. The straightforward claim of the author is that the proposed theories can help both members of minorities and those in executive positions to gain insights on the cognitive level and make more congruent community oriented decisions on the practical level.
